European art was a consuming interest of both Robert Lehman and his father Philip Lehman an interest reflected in the remarkable number and quality of drawings they owned from the fifteenth and early sixteenth centuries In addition to an important group of early German drawings the collection includes a Saint Paul from a series associated with Jan van Eyck and the famous Scupstoel from the circle of Rogier van der Weyden the only design for a decorative sculpture to survive from the fifteenth century The great artists of the seventeenth century Peter Paul Rubens Jacob Jordaens Claude Lorrain and Rembrandt among them are also represented Rembrandt by seven drawings including the large study of Leonardo's Last Supper that would stay in his mind all through his career Drawings by Antoine Watteau Jean Honor Fragonard Gabriel de Saint Aubin Thomas Gainsborough Paul Sandby and George Romney are among the many from eighteenth century France and England The volume discusses all 153 drawings at length placing each in its art historical setting and complementing the discussion with comparative illustrations of related works This e book on the MetPublications website is also accompanied by links to related works and under the Additional resourcestab are links to Met works of art and Heilbrunn Timeline of Art History essays and timelines viewed May 1 2014

Drawings from the Age of Bruegel, Rubens, and Rembrandt

William W. Robinson, 2016-08-02 This superb book presents 100 notable examples from the Harvard Art Museums distinguished collection of Dutch Flemish and Netherlandish drawings from the 16th to 18th century Featuring such masters as Pieter Bruegel the Elder Peter Paul Rubens and Rembrandt van Rijn the volume showcases beautiful color illustrations accompanied by insightful commentary on prevalent styles and techniques Genres that define this artistic period landscape scenes of everyday life portraiture and still life are explored in detail The book also presents the results of new conservation and technical study including infrared analysis and scientific examinations of drawing materials This revelatory new research has allowed previously illegible underdrawings and inscriptions in many of the artworks to surface for the first time shedding light on longstanding mysteries of production and provenance

Italian Fifteenth- to Seventeenth-century Drawings Anna Forlani Tempesti, Metropolitan Museum of Art (New York, N.Y.), 1991 Perhaps more than any other collector of his generation in the United States Robert Lehman was interested in acquiring early drawings He made a great effort to add drawings to the collection of paintings sculpture ceramics glass and other objects that his father Philip Lehman had begun assembling The 116 Italian drawings analyzed and discussed in this volume are among the more than 2 000 works of art from the collection now housed in the Robert Lehman Wing of The Metropolitan Museum of Art Robert Lehman's collection demonstrates the variety of drawings produced in Italy from the fifteenth to the seventeenth century a period when the purposes and techniques of drawings as well as the aims and abilities of the artist who made them became increasingly sophisticated The volume includes an elaborate design for an equestrian monument by Antonio Pollaiuolo a magnificent study of a bear by Leonardo da Vinci a cartoon by Luca Signorelli a study for a vault fresco by Taddeo Zuccaro and many other drawings that are among the best Italian examples to have survived from that era Most types of drawings in a wide variety of

techniques are represented figure studies grand compositions landscapes cartoons modelli and even sculptors studies
Metropolitan Museum of Art website **Flemish Drawings of the Seventeenth Century from the Collection of Frits Lugt, Institut Néerlandais, Paris** Institut néerlandais (Paris, France),1972 **Master Drawings from the Courtauld Collections** Courtauld Institute Galleries,William Bradford,Helen Braham,1991 *Art Market and Connoisseurship* Anna Tummers,Koenraad Jonckheere,2025-10-01 The question whether or not seventeenth century painters such as Rembrandt and Rubens created the paintings which were later sold under their names has caused many a heated debate Much is still unknown about the ways in which paintings were produced assessed priced and marketed For example did contemporary connoisseurs expect masters such as Rembrandt to paint their works entirely by their own hand Who was credited with the ability to assess paintings How did a painting s price relate to its quality And how did connoisseurship change as the art market became increasingly complex The contributors to this essential volume trace the evolution of connoisseurship in the booming art market of the seventeenth and eighteenth centuries Among them are the renowned Golden Age scholars Eric Jan Sluiter Hans Van Miegroet and Neil De Marchi It is not to be missed by anyone with an interest in the Old Masters and the early modern art market
