Risk and the Rupee in Pakistan's New Economy

Antonia Settle, 2020-10-29 In a world of open markets and global trade development thinking seeks stability and prosperity for the world's poor by expanding access to financial products. This book challenges the development sector's embrace of financial inclusion by exploring how the new risks and instabilities that accompany the pivot towards the global economy undermine the functioning of money itself. Cast against fundamental change in the monetary environment accompanying the globalisation of markets, the book examines the rapid liberalisation of money and markets in Pakistan. It argues that liberalisation has generated substantive problems not only for the central bank as guardian of national currency but for ordinary households. By pinpointing how globalisation generates new risks for households in the everyday economy, the book reveals jarring contradictions between free markets and financial inclusion whilst challenging money theory by positing substantive and empirically grounded monetary contestation that demonstrates a burden of risk imposed on ordinary people that is only exacerbated by financial inclusion.

Pakistan's Security and the India-US Strategic Partnership Syed Shahid Hussain Bukhari, 2020-09-15 This book explores the relationship between the developing India-US strategic Partnership and Pakistan's security. It assesses India and the US's areas of cooperation to show that the partnership will bring drastic changes for India's military capabilities and modernization of its forces. The book shows that in addition to enhancing India's domestic nuclear stockpiles through the nuclear cooperation agreement, collaboration in high-tech areas such as space and innovative technologies will enable India to acquire sophisticated delivery systems as well as surveillance capacity. The author argues that these advancements will enable India to destabilize the strategic balance in the region. The book also briefly explores the nuclear doctrines of India and Pakistan that provide an insight into the role of nuclear weapons in maintaining deterrence in the region. To understand the power dynamics caused by the strategic partnership and their impact on strategic stability in South Asia, the author utilizes the Balance of Power and Power Transition theories. A timely analysis of the India-US Strategic Partnership with a Pakistan angle, the book will be of interest to academics working in the fields of Asian security, Asian politics, especially South Asia strategic studies, international relations, political science, nuclear non-proliferation, conflict studies, arms control, and security studies.
