Flooded Reflections Of Hurricane Floyd:

Flooded Friends of Braswell Library,2004-01-01 *Hurricanes* Paul V. Kislow,2008 A hurricane is a tropical storm with winds that have reached a constant speed of 74 miles per hour or more Hurricane winds blow in a large spiral around a relative calm centre known as the eye The eye is generally 20 to 30 miles wide and the storm may extend outward 400 miles As a hurricane approaches the skies will begin to darken and winds will grow in strength As a hurricane nears land it can bring torrential rains high winds and storm surges A single hurricane can last for more than 2 weeks over open waters and can run a path across the entire length of the eastern seaboard August and September are peak months during the hurricane season that lasts from 1 June to 30 November This book presents the facts and history of hurricanes Flood Hazards and Health Roger Few,Franziska Matthies,2013-06-17 Flood hazards and the risks they present to human health are an increasing concern across the globe in terms of lives well being and livelihoods and the public resources needed to plan for and deal with the health impacts This book is the first detailed assessment and discussion of the global health implications of flooding and future flood risk It combines an analysis of the human health impacts of flooding with analysis of individual and societal response to those risks and sets these findings in light of potential future increases in flood hazard as a result of climate change Written and edited by leading researchers and practitioners on flood hazards and human health the volume brings together findings from epidemiological environmental social and institutional studies with analysis rooted in an approach that emphasizes the developmental as well as environmental causes of flood risk and the socially differentiated nature of vulnerability and coping capacity The first part of the book sets out the scope of the issues and provides a detailed discussion of the global health impacts of floods and the nature of human response to the health risks posed The second part presents new research evidence on specific health aspects of floods covering mental health infectious diseases local level responses and the responses of health systems drawing on case study material from Europe Africa Asia and North America including the impact of Hurricane Katrina in 2005 The conclusion synthesizes insights from the previous chapters and discusses priorities for policy practice and research It draws out implications for present and future adaptation to flooding and emphasizes the need to integrate action on health with the broader agenda of long term risk reduction This is indispensable reading for professionals and researchers working on hazard and disaster planning risk reduction and public health in all countries and contexts **The North Carolina Historical Review** ,2007 *Analyzing and Interpreting Qualitative Research* Charles Vanover,Paul Mihas,Johnny Saldana,2021-04-14 This text provides comprehensive coverage of the key methods for analyzing interpreting and writing up qualitative research in a single volume and drawing on the expertise of major names in the field Covering all the steps in the process of analyzing interpreting and presenting findings in qualitative research the authors utilize a consistent chapter structure that provides novice and seasoned researchers with pragmatic how to strategies Each chapter introduces the method uses one of the authors own research projects as a case

Hang-Ups Benjamin Linley Wild, 2024-01-11 The Covid 19 pandemic heightened people's awareness of long standing inequalities within the fashion industry Amid calls for greater accountability and ethical awareness efforts are being made within and beyond the industry chiefly in the cultural and education sectors to decentralize fashion to make the conception creation and consumption of fashionable dress and appearance less western centric Supporting this premise Hang Ups argues that purposeful and permanent change within the fashion industry and fashion education is more likely if it is understood how the contemporary industry became western centric To institute effective change it is necessary to revert to first principles and understand how the fashion industry developed into what it is today During a period when the concepts of fashion history and culture are being intensely scrutinized and with suggestions they are reaching their nadir the imperative to understand the extent to which they relate and facilitate the presentation of people's fashionable bodies is urgent Hang Ups explores the origins and consequences of the fashion industry's western centrism by focusing on nine binaries defined in the crucible of empire that continue to be sites of negotiation as the west's traditions and ideals are contested by different cultural perspectives and changing global realities
