Brucker, 1983 **Florence** Gene A. Brucker, 1998 **Florence** Brucker, 1984 Florence, the Golden Age, 1138-1737 Gene A. Brucker, 1984 Historian Brucker relates the story of Florence s Golden Age and the conjoined forces that transformed the city on the Arno into one of the most glorious civilizations the world has known Brucker s story of the premier city of the Italian Renaissance tells of great families and common people wars and economic dislocations natural catastrophes and religious turmoil and extraordinary artistic and literary achievement The creative growth of the city was made possible through its role as an economic center the zeal of its small manufacturing industries and the enterprise of the merchants who spread Florentine influence well beyond the city s walls and territories The book is enlivened with the voices of historical protagonists whose words richly convey the tenor of the times Brucker s accessible writing is also complemented by a wealth of paintings and drawings 200 of them in full color From publisher description **Quantitative Studies of the Renaissance Florentine Economy and Society** Richard T. Lindholm, 2017-01-02 Quantitative Studies of the Renaissance Florentine Economy and Society is a collection of nine quantitative studies probing aspects of Renaissance Florentine economy and society The collection organized by topic source material and analysis methods discusses risk and return specifically the population s responses to the plague and also the measurement of interest rates The work analyzes the population s wealth distribution the impact of taxes and subsidies on art and architecture the level of neighborhood segregation and the accumulation of wealth Additionally this study assesses the competitiveness of Florentine markets and the level of monopoly power the nature of women s work and the impact of business risk on the organization of industrial production **Coping with Crisis: The Resilience and Vulnerability of Pre-Industrial Settlements** Daniel R. Curtis, 2016-05-13 Why in the pre industrial period were some settlements resilient and stable over the long term while other settlements were vulnerable to crisis Indeed what made certain human habitations more prone to decline or even total collapse than others All pre industrial societies had to face certain challenges exogenous environmental hazards such as earthquakes or plagues economic or political hazards from outside such as warfare or expropriation of property or hazards of their own making such as soil erosion or subsistence crises How then can we explain why some societies were able to overcome or negate these problems while other societies proved susceptible to failure as settlements contracted stagnated were abandoned or even disappeared entirely This book has been stimulated by the questions and hypotheses put forward by a recent disaster studies literature in particular by placing the intrinsic arrangement of societies at the forefront of the explanatory framework Essentially it is suggested that the resilience or vulnerability of habitation has less to do with

exogenous crises themselves but on endogenous societal responses which dictate a the extent of destruction caused by crises and the capacity for society to protect itself and b the capacity to create a sufficient recovery By empirically testing the explanatory framework on a number of societies between the Middle Ages and the nineteenth century in England the Low Countries and Italy it is ultimately argued in this book that rather than the protective functions of the state or the market or the implementation of technological innovation or capital investment the most resilient human habitations in the pre industrial period were those than displayed an equitable distribution of property and a well balanced distribution of power between social interest groups Equitable distributions of power and property were the underlying conditions in pre industrial societies that all

Push Me, Pull You Sarah Blick, Laura Deborah Gelfand, 2011-05-01 Late Medieval and Renaissance art was surprisingly pushy its architecture demanded that people move through it in prescribed patterns its sculptures played elaborate games alternating between concealment and revelation while its paintings charged viewers with imaginatively moving through them Viewers wanted to interact with artwork in emotional and or performative ways This inventive and personal interface between viewers and artists sometimes conflicted with the Church s prescribed devotional models and in some cases it complemented them Artists and patrons responded to the desire for both spontaneous and sanctioned interactions by creating original ways to amplify devotional experiences The authors included here study the provocation and the reactions associated with medieval and Renaissance art and architecture These essays trace the impetus towards interactivity from the points of view of their creators and those who used them Contributors include Mickey Abel Alfred Acres Kathleen Ashley Viola Belghaus Sarah Blick Erika Boeckeler Robert L A Clark Lloyd DeWitt Michelle Erhardt Megan H Foster Campbell Juan Luis Gonz lez Garc a Laura D Gelfand Elina Gertsman Walter S Gibson Margaret Goehring Lex Hermans Fredrika Jacobs Annette LeZotte Jane C Long Henry Luttikhuizen Elizabeth Monroe Scott B Montgomery Amy M Morris Vibeke Olson Katherine Poole Alexa Sand Donna L Sadler Pamela Sheingorn Suzanne Karr Schmidt Anne Rudloff Stanton Janet Snyder Rita Tekippe Mark Trowbridge Mark S Tucker Kristen Van Ausdall Susan Ward

Mona Lisa Martin Kemp,Giuseppe Pallanti,2017-05-26 Read this book and the world s most famous image will never look the same again For the world s greatest cultural icon still has secrets to reveal not the silly secrets that the Leonardo loonies continue to advance but previously unknown facts about the lives of Leonardo his father Lisa Gherardini the subject of the portrait and her husband Francesco del Giocondo From this factual beginning we see how the painting metamorphosed into a universal picture that became the prime vehicle for Leonardo s prodigious knowledge of the human and natural worlds We learn about the new money of the ambitious merchant who married into the old gentry of Lisa s family We discover Lisa s life as a wife and mother her association with sexual scandals and her later life in a convent We meet for the first time previously undiscovered members of Leonardo s immediate family and discover new information about his early life The tiny hill town of Vinci is placed before us with its widespread poverty We find out about the career and possessions of his father a notable lawyer in Florence The meaning of the portrait that resulted from these human circumstances is vividly illuminated though Renaissance love poetry and verses specifically dedicated to Leonardo We come to understand how Leonardo s sciences of optics psychology anatomy and geology are embraced in his poetic science of art Recent scientific examinations of the

painting disclose how it evolved to assume its present appearance in Leonardo's experimental hands Above all we cut through the suppositions and the myths to show that the portrait is a product of real people in a real place at a real time This is the book that brings back a sense of reality into the creation of the portrait of Lisa del Giocondo And the actual Mona Lisa it turns out is even more astonishing and transcendent than the Mona Lisa of legend
