Previously published as The New History of Florida      **Production and Packaging of Non-Carbonated Fruit Juices and Fruit Beverages** Philip R. Ashurst,2013-11-09 In the period of about five years since the first edition of this book appeared many changes have occurred in the fruit juice and beverage markets The growth of markets has continued blunted to some extent no doubt by the recession that has featured prominently in the economies of the major consuming nations But perhaps the most significant area that has affected juices in particular is the issue of authenticity Commercial scandals of substantial proportions have been seen on both sides of the Atlantic because of fraudulent practice Major strides have been made in the development of techniques to detect and measure adulterants in the major juices A contri bution to Chapter 1 describes one of the more important scientific techniques to have been developed as a routine test method to detect the addition of carbohydrates to juices Another and perhaps more welcome development in non carbonated beverages during the past few years is the rapid growth of sports drinks Beverages based on glucose syrup have been popular for many years and in some parts of the world isotonic products have long featured in the sports arena A combination of benefits is now available from a wide range of preparations formulated and marketed as sports drinks and featuring widely in beverage markets world wide A

Sangaramoorthy,2014-03-26 There is an inherently powerful and complex paradox underlying HIV AIDS prevention between the focus on collective advocacy mobilized to combat global HIV AIDS and the staggeringly disproportionate rates of HIV AIDS in many places In *Treating AIDS* Thurka Sangaramoorthy examines the everyday practices of HIV AIDS prevention in the United States from the perspective of AIDS experts and Haitian immigrants in South Florida Although there is worldwide emphasis on the universality of HIV AIDS as a social political economic and biomedical problem developments in HIV AIDS prevention are rooted in and focused exclusively on disparities in HIV AIDS morbidity and mortality framed through the rubric of race ethnicity and nationality Everyone is at equal risk for contracting HIV AIDS Sangaramoorthy notes but the ways in which people experience and manage that risk and the disease itself is highly dependent on race ethnic identity sexuality gender immigration status and other notions of difference Sangaramoorthy documents in detail the work of AIDS prevention programs and their effect on the health and well being of Haitians a transnational community long plagued by the stigma of being stereotyped in public discourse as disease carriers By tracing the ways in which public knowledge of AIDS prevention science circulates from sites of surveillance and regulation to various clinics and hospitals to the social worlds embraced by this immigrant community she ultimately demonstrates the ways in which AIDS prevention programs help to reinforce categories of individual and collective difference and how they continue to sustain the persistent and pernicious idea of race and ethnicity as risk factors for the disease      Discovering the Civil War in Florida Paul Taylor,2001 Chronicles both land and sea maneuvers in Florida during the Civil War
