1979 82 These tables provide estimates of the sources of growth for eight output measures in each period Denison stresses that the 1973 82 period of slow growth in unfinished He observes no improvement in the productivity trend only a weak cyclical recovery from a 1982 low Sources of growth tables isolate the contributions made to growth between input and output per unit of input Even so it is not possible to quantify separately the contribution of all determinants and Denison evaluates qualitatively the effects of other developments on the productivity slowdown **The American Economic Review** ,1920 The Problem of Fatigue in Relation to the Programme of "basic Education" in India Gundappa Radjasekharan,1961 *Fundamentals of the Physical Environment* Peter Smithson,Ken Addison,Ken Atkinson,2005-08-02 The third edition of this popular textbook has been extensively revised to incorporate current thinking and knowledge in the area of physical geography and the environment whilst retaining its basic structure **Renewable and Sustainable Energy** Wei Guo Pan,Jian Xing Ren,Yong Guang Li,2011-10-07 Selected peer reviewed papers from the 2011 International Conference on Energy Environment and Sustainable Development ICEESD 2011 October 21 23 2011 Shanghai China Journal of the Royal Society of Arts Royal Society of Arts (Great Britain),1921 *Real Business Cycles* James Hartley,Kevin Hoover,Kevin D.
