**Non-Violence and Ecological Imperatives** Ramin Jahanbegloo,Pooja Sharma,2025-08-05 Violence impregnates human life in many ways We do violence to individuals or groups We do violence to plants and animals We do violence to the planet Earth However Nature will not survive our arrogance and patterns of exploiting and destroying the biosphere if we do not break the cycle of violence As such any moral effort to stop barbaric consumerism and chaotic nihilism is simultaneously the possibility of making life and biodiversity flourish on Earth The moral imperative is thus also an ecological imperative Therefore the question is how can we talk about non violence in the current ecological crisis Put differently we can also ask how can non violence be brought to our ecological concerns Martin Luther King Jr once said Injustice anywhere is a threat to justice everywhere The notion of injustice becomes all the more crucial when applied to excluding animals and plants from the history of our planet This eco moral crisis must become more public as the ecological trajectory of the Earth foreshadows a very troublesome future Non violence and Ecological Imperative is a contribution to the relevance and potential of the philosophy of non violence in showing clearly that our viable ecological future depends on attitudes and strategies that are rooted in the Gandhian moment of civilising humanity as an antidote to the violent modern techno industrial way of life The interdependence and cooperation between humans and nature are inevitable Non exploitative and non violent prerequisites of Gandhian ideology entail that interdependence and cooperation must be based on altruistic values and not on self interest and materialistic values This signifies immeasurable love not only among humans but also with nature Thus absolute love substitutes greed Non possession from an absolute love revolutionises the socio ecological paradigm of human civilisation Various ecological scientists and economists have asserted the need for revisiting the harmony between human activities and nature Stern et al 1998 concluded that economic growth would never result in improvement in environmental quality Arrow et al 1995 concluded that economic growth is not a panacea for environmental quality Meadows et al 1972 in his book The Limits to Growth claimed that environmental limits would cause the collapse of the world economic system Against this backdrop Gandhi advocated the process of recycling and minimising waste so that

humans adopt a lifestyle that integrates with the ecosystem Humans must dwell in a life that converges with the law of nature and maintains ecological harmony This notion of continuity of life is inspired by the Gandhian philosophy of non violence and absolute love The moment there is a break in continuity it results in violence leading to unrest or conflict dismantling the process of continuity

**The Modern Anthropology of India** Peter Berger, Frank Heidemann, 2013-06-03. *The Modern Anthropology of India* is an accessible textbook providing a critical overview of the ethnographic work done in India since 1947. It assesses the history of research in each region and serves as a practical and comprehensive guide to the main themes dealt with by ethnographers. It highlights key analytical concepts and paradigms that came to be of relevance in particular regions in the recent history of research in India and which possibly gained a pan-Indian or even trans-Indian significance. Structured according to the states of the Indian union, contributors raise several key questions, including: What themes were ethnographers interested in? What are the significant ethnographic contributions? How are peoples, communities, and cultural areas represented? How has the ethnographic research in the area developed? Filling a significant gap in the literature, the book is an invaluable resource to students and researchers in the field of Indian anthropology, ethnography, regional anthropology, and postcolonial studies. It is also of interest to students of South Asian studies in general, as it provides an extensive and critical overview of regionally
