Communist Planning versus Rationality János Mátyás Kovács, 2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there

is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning
