Fire Management Food and Agriculture Organization of the United Nations, 2007-01-01 Fire management is an essential part of sustainable forest management This publication complements the Global Forest Resources Assessment 2005 FRA 2005 as an in depth thematic study on the incidence impact and management of forest fires in different regions of the world It was developed from 12 regional papers prepared within the framework of the Global Wildland Fire Network of the United Nations International Strategy for Disaster Reduction It provides the best estimate of the global fire situation to date and gives a good indication of the scale of the impact of vegetation fires on society on the economy and on the environment This global assessment will be of interest not only to fire specialists but also to policy makers forest managers and those involved in collecting reliable and current information on fire in different types of vegetation It is an important contribution to FAO's efforts to enhance international cooperation in fire management *Costs, Benefits, and Farmer Adoption of Agroforestry* Dean Current, Ernst Lutz, Sara J. Scherr, 1995 Bibliography pp 195 209 **Forestry Policies in the Caribbean** Food and Agriculture Organization of the United Nations, 1998-01-01

Climate change vulnerability assessment of forests and forest-dependent people Food and Agriculture Organization of the United Nations, 2019-11-29 Negative impacts of climate change on forests threaten the delivery of crucial wood and non wood goods and environmental services on which an estimated 1.6 billion people fully or partly depend Assessment of the vulnerability of forests and forest dependent people to climate change is a necessary first step for identifying the risks and the most vulnerable areas and people and for developing measures for adaptation and targeting them for specific contexts This publication provides practical technical guidance for forest vulnerability assessment in the context of climate change It describes the elements that should be considered for

different time horizons and outlines a structured approach for conducting these assessments The framework will guide practitioners in conducting a step by step analysis and will facilitate the choice and use of appropriate tools and methods Background information is provided separately in text boxes to assist readers with differing amounts of experience in forestry climate change and assessment practices The publication will provide useful support to any vulnerability assessment with a forest and tree related component Trade in Forest Products Ian James Bourke,1988-01-01 **Making forest concessions in the tropics work to achieve the 2030 Agenda** Food and Agriculture Organization of the United Nations,2018-07-30 The specific objective of these Voluntary Guidelines is to promote the sustainable management of public production natural forests in tropical countries through forest concessions thereby fulfilling their potential contribution to the achievement of Agenda 2030 Forest concession regimes are treated here as forest policy instruments and should be aligned with the sustainable forest management objectives agreed by countries in the UNFF The current Guidelines intend to serve as guidance for making forest concessions an effective economic instrument of forest policy in the context of the 2030 Agenda transforming them into an instrument capable of delivering sustainable forest management in all its dimensions and generating socio economic benefits to relevant stakeholders *Forestry Extension Curricula* D. Sim,H. A. Hilmi,1988

Forestry Policies of Selected Countries in Asia and the Pacific Food and Agriculture Organization of the United Nations,1993-01-01 **Studies on the Volume and Yield of Tropical Forest Stands: Dry forest formations** Food and Agriculture Organization of the United Nations,1989-01-01 Small-scale Forest-based Processing Enterprises Food and Agriculture Organization of the United Nations,1987-01-01 *Climate change for forest policy-makers* Food and Agriculture Organization of the United Nations,2019-02-18 The critical role of forests in climate change mitigation and adaptation is now widely recognized Forests contribute significantly to climate change mitigation through their carbon sink and carbon storage functions They play an essential role in reducing vulnerabilities and enhancing adaptation of people and ecosystems to climate change and climate variability the negative impacts of which are becoming increasingly evident in many parts of the world In many countries climate change issues have not been fully addressed in national forest policies forestry mitigation and adaptation needs at national level have not been thoroughly considered in national climate change strategies and cross sectoral dimensions of climate change impacts and response measures have not been fully appreciated This publication seeks to provide a practical approach to the process of integrating climate change into national forest programmes The aim is to assist senior officials in government administrations and the representatives of other stakeholders including civil society organizations and the private sector prepare the forest sector for the challenges and opportunities posed by climate change This document complements a set of guidelines prepared by FAO in 2013 to support forest managers incorporate climate change considerations into forest management plans and practices Guide to the classical biological control of insect pests in planted and natural forests Food and Agriculture Organization of the United Nations,2019-05-31 This publication explains

the why and how of classical biological control in forestry and addresses the potential risks associated with such programmes. Written by a team of experts it provides general theory and practical guidelines featuring 11 case studies of successful implementation efforts worldwide. While insect pests already damage millions of hectares of forest worldwide each year the extent of such damage is increasing as the impacts of climate change become more evident and as international trade grows facilitating the pests spread. Classical biological control is a well tried cost effective approach to the management of invasive forest pests which involves the importing of natural enemies of non native pests from their countries of origin with the aim of establishing permanent self sustaining populations capable of sustainably reducing pest populations below damaging levels.
