Miceli,2011-06-20 Surveys the contributions that economic theory has made to the often contentious debate over the government s use of its power of eminent domain as prescribed by the Fifth Amendment It addresses such questions as when should the government be allowed to take private property without the owner s consent Does it depend on how the land will be used Also what amount of compensation is the landowner entitled to receive if any The recent case of *Kelo v New London* 2005 revitalized the debate but it was only the latest skirmish in the ongoing struggle between advocates of strong governmental powers to acquire private property in the public interest and private property rights advocates Written for a general audience the book advances a coherent theory that views eminent domain within the context of the government s proper role in an economic system whose primary objective is to achieve efficient land use Reforming WTO Rules on State-Owned Enterprises Yingying Wu,2019-01-28 This book argues that the trade distorting effects of advantages associated with SOEs are more severe from an economic perspective and the behavior of SOEs after receiving advantages is of more concern compared to private owned enterprises POEs The premise is that the existence of SOEs per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to SOEs compared to POEs and ii the behavior of SOEs once they receive advantages The book offers a systematic analysis focusing on the various advantages granted to SOEs and their subsequent behavior Its detailed analysis reveals the inadequacy of current WTO rules and is complemented by a number of concrete proposals *The Elgar Companion to Ronald H. Integration: The EU Experience and Implications for Regulatory Reform in China Niels Philipsen, Stefan E.

Weishaar, Guangdong Xu, 2015-11-06 This book examines the relationship between regulation and market integration with a special focus on China. It pursues a Law and Economics and Comparative Law approach. China and EU to analyze the current obstacles to market integration and domestic economic growth in China. Topics covered at the national level include competition law, public procurement rules and financial regulation. At the regional and local level, this book addresses questions related to administrative monopolies, self-regulation, legal services markets and environmental law. The Paradox of Punishment Thomas J. Miceli, 2019-11-06 This book explores the insights that can be gained by looking at the criminal

justice system from an economic point of view. It provides an economic analysis of the institutional structure and function of the criminal justice system, how its policies are formulated and how they affect behavior. Yet it goes beyond an examination of specific policies to address the broad question of how law influences behavior. For example, it examines how concepts such as the possibility of redemption affect the decisions of repeat offenders and whether individual responsibility is or should be a pre-requisite for punishment. Finally, the book argues that in addition to the threat of criminal sanctions, law inculcates principles of acceptable behavior among citizens by asserting that certain acts are against the law. This expressive function of law can influence behavior to the extent that at least some people in society are receptive to such a message. For these people, the moral content of law has more than mere symbolic value and consequently it can expand the scope of traditional law enforcement while lowering its cost. Another goal of the book is therefore to use economic theory to assess this dualistic function of law by specifically recognizing how its policies can both internalize an ethic of obedience to the law among some people irrespective of its consequences while simultaneously threatening to punish those who only respond to external incentives. The Encyclopedia of Libertarianism Ronald Hamowy, 2008-08-15 Provides an introduction to and compendium of libertarian scholarship via a series of brief articles on the historical, sociological and economic aspects of libertarianism within the broader context.

Competition Laws in Conflict Richard Allen Epstein, Michael S. Greve, 2004 Moreover, states have powerful incentives to permit domestic industries to exploit outsiders or even to facilitate such practices. High-profile antitrust conflicts from the prosecution of Microsoft in state, national and international forums to the transatlantic disagreement over the European Union's merger policy illustrate the difficulties. Possible solutions to these problems range from improved intergovernmental cooperation to direct policy harmonization to a new regime of structured competition in antitrust policy modeled on U.S. corporation law. Antitrust Policy and Vertical Restraints Robert W. Hahn, 2007-03-01 Antitrust law is intended to protect consumer welfare and foster competition At first glance however it is often unclear whether certain business practices have positive or detrimental effects Businesses frequently engage in activities that may appear anticompetitive on the surface but are actually beneficial to consumers Business tying practices for example make the sale of one product conditional upon the sale of another product This practice can either deprive consumers of choice and drive up prices or lower costs and improve convenience Therefore it is critical that policymakers have a keen understanding of which vertical restraints limitations imposed on businesses by firms located in the production chain are likely to harm consumers more than they benefit competition In order to formulate economically efficient policies they must be able to identify and limit those practices that are likely to do more harm than good In Antitrust Policy and Vertical Restraints a group of leading scholars takes a hard look at how restraints limit the conditions under which firms may purchase sell or resell a good or service The authors representing both sides of the antitrust debate over tying practices provide a uniquely broad perspective on this critical economic policy issue Contributors include Dennis Carlton University of Chicago David Evans University College London Bruce Kobayashi George Mason University and Michael Waldman Cornell University
