Maisto,2013-06-29 With the recent increase in the scope of drug and alcohol problems has come an awareness of the need for solutions In this context federal support for research on drug problems increased tremendously during the last 10 to 15 years with the establishment of the National Institute on Drug Abuse NIDA and the National Institute on Alcohol Abuse and Alcoholism NIAAA Funding from these and other sources has led to a substantial increase in the quantity and quality of published work related to substance abuse As data accumulate it is becoming more apparent that substance abuse problems are extremely complex and are influenced by a variety of biological psychological and environmental variables Unfortunately it has proved difficult to go beyond this conclusion to a description of how these multiple factors work together to influence the development of and recovery from drug and alcohol dependence The purpose of this book is to try to meet that objective by including in one volume literature reviews and theoretical analyses from a wide variety of drug researchers We chose the authors in an attempt to assure that each of the various levels of analysis appropriate to the substance abuse problems would be included In each case the author was asked to consider how the variables in his or her particular domain might contribute to the appearance of individual differences in both alcohol and drug problems      **Special Report to the U.S. Congress on Alcohol and Health from the Secretary of Health, Education, and Welfare** ,1978
