Ohashi, 2013-11-20 This book provides a new perspective of China's controversial foreign aid strategy The chapters offer a thorough examination of data to show how China has created knowledge in its long experiences of aid and how this accumulated knowledge could contribute to other developing countries The book also examines China's aid philosophy and strategy through an Asian perspective instead of the Western perspective that is postulated in existing academic literature This is important as China shares a number of common features with other Asian donors including India and Japan Finally the book explores how to utilize the potential effect of this rising major donor for worldwide development and poverty reduction

Liberal Internationalism and the Decline of the State P. Hammarlund, 2005-03-01 This book provides a critical analysis of the liberal ideas of the decline of the state through a historical comparison It takes special note of the implications of state failure to control economic growth and market exigencies for international relations The book is divided into three

sections The first analyzes Cobden Mitrany and Ohmae's empirical claims the second looks at their normative judgements and the third looks at their predictive assertions It concludes that the three primarily propose normative arguments for less state involvement in economic and international relations but conceal them in empirical and predictive assertions The liberal idea of the decline of the state is more of an ideological statement in response to political social and economic trends than an objective observation of an empirically verifiable fact

China's Rise in the Age of Globalization Jianyong Yue, 2018-01-12

This book deconstructs a series of myths surrounding China's economic rise The first myth is that globalization led directly to China's rise the second is that China is another East Asian developmental state the third that China's market reform had been implemented in an incremental way and fourth that China's resilient authoritarianism has been effective in ensuring the country's economic and political transformation Yue argues that the China model is one of crony comprador capitalism that has hindered the country's attempts at economic and political modernity It is argued that the United States strategy of integrating China into the international system is self defeating in the long run not because such an approach has created a restless empire capable of challenging US primacy but because the Chinese miracle has subsequently backfired on the liberal order created after World War Two Covering the entire reform period from the end of the Cultural Revolution in 1976 to the present day the author calls for readers to rethink globalization and leave more policy space for China and the developing nations to pursue national development through internal integration which is more conducive to democratic transition and global peace

Russia's Response to Sanctions Richard Connolly, 2018-07-05 In the first in depth analysis of the effects of sanctions on the Russian political economy Richard Connolly details the Western sanctions targeting the energy defense and financial sectors and the Russian response He explores how the Western sanctions have caused Russian officials to formulate rapid policy responses to enable the country to adapt to the new circumstances The sanctions and the Russian response have caused the state's role in the Russian economy to grow stronger and caused its policymakers to accelerate efforts to shift Russia's foreign economic relations away from the West and toward Asia Connolly analyzes how the political economy in Russia and the nature of the country's integration with the global economy have been fundamentally reshaped He demonstrates that a new system of political economy is emerging in Russia and how it is crucial to understanding Russia's future trajectory

Globalization Jürgen Osterhammel, Niels P. Petersson, 2005 Globalization has become a popular buzzword for explaining today's world The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages But is this much discussed phenomenon really an invention of modern times In this work Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new after all Arguing that the world did not turn global overnight the book traces the emergence of globalization over the past seven or eight centuries In fact the authors write the phenomenon can be traced back to early modern large scale trading for example the silk trade between China and the Mediterranean region the shipping routes between the Arabian Peninsula and India and the more frequently traveled caravan routes of the Near East and North Africa all conduits for people goods coins artwork and ideas Osterhammel and Petersson argue that the period from 1750 to 1880 an era characterized by the development of free trade and the long distance impact of the industrial revolution represented an important phase in the globalization phenomenon Moreover they demonstrate how globalization in the mid twentieth century opened up the prospect of global destruction though nuclear war and ecological catastrophe In the end the authors write today's globalization is part of a long running transformation and has not ushered in a global age radically different from anything that came before This book will appeal to historians economists and anyone in the social sciences who is interested in the historical emergence of globalization
