economic development illustrating that differences in human behaviour across cities and regions are a significant deep rooted cause of uneven development Fusing a range of concepts relating to culture psychology human agency institutions and power it proposes that the long term differentials in economic development between cities and regions both within and across nations is strongly connected to the underlying forms of behaviour enacted by humans on an individual and collective basis Given a world of finite and limited resources coupled with a rapidly growing population especially in cities and urban regions human behaviour and the expectations and preferences upon which it is based are central to understanding how notions of development may change in coming years This book provides a novel theory of the role of psychocultural context and human behavioural and institutional frameworks in uneven economic development on a global scale **Community, Economic Creativity, and Organization** Ash Amin, Joanne Roberts, 2008-09-25 Communities of practice like social capital and networks is an idea that has been widely adopted in the social sciences particularly in discussion of innovation and creativity This book evaluates the concept and its uses and will be an essential guide for students and researchers
