Economic Growth in Latin America and the Caribbean Mario A. Gutiérrez, 2007 This study helps to provide a statistical framework for analyzing the growth story of Latin America It helps to demonstrate that some growth episodes are not well captured by standard growth theories and econometric work developed and based on different economic context and time periods The study confirms some general conclusions reached in the literature but provides evidence that raises doubt about others

Economic Growth in Latin America in the Late 20th Century Andrés Solimano, Raimundo Soto, United Nations. Economic Commission for Latin America and the Caribbean, 2005 The purpose of this paper is to advance our understanding of the growth patterns of the Latin American economy in the final decades of the 20th century The paper focuses on the analysis of medium to long run growth as opposed to the standard discussion of the determinants of high frequency fluctuations business cycles and disentangles the contribution of factor accumulation and total factor productivity It also aims to understand the spells of prosperity and stagnation in several important economies of the region as well as identify stories of growth decline and divergence in recent decades

After the Boom-Commodity Prices and Economic Growth in Latin America and the Caribbean Bertrand Gruss, 2014-08-15

After skyrocketing over the past decade commodity prices have remained stable or eased somewhat since mid 2011 and most projections suggest they are not likely to resume the upward trend observed in the last decade This paper analyzes what this turn in the commodity price cycle may imply for output growth in Latin America and the Caribbean The analysis suggests that growth in the years ahead for the average commodity exporter in the region could be significantly lower than during the commodity boom even if commodity prices were to remain stable at their current still high levels Slower than expected growth in China represents a key downside risk The results caution against trying to offset the current economic slowdown with demand side stimulus and underscore the need for ambitious structural reforms to secure strong growth over the medium term

Honoring the Past, Building the Future Ricardo Ávila,2009-01-01 Although science has unlocked the secrets of the human genome the causes of social and economic development remain stubbornly enigmatic Why do some countries adopt new technologies more readily than others Why does income inequality persist in some regions even in the face of rapid economic growth Why do some societies welcome the challenges of globalization while others attempt to turn back the tide Honoring the Past Building the Future examines these and many related questions through the experience of Latin America and the Caribbean In an accessible journalistic style author Ricardo vila explores a tumultuous half century in which the region went from backwater to breadbasket from dictatorship to democracy and from economic basket case to emerging power

Economic Development Division,2001 This paper describes trends in economic growth and it s causes in several Latin American countries in the 20th century This paper stresses that the proximate causes of economic growth are not independent of the ultimate causes of growth Proximate causes of economic growth are those areas of causality where models and quantification is possible Ultimate causes of economic growth are much more difficult to quantify The paper concludes with a description of some of the most important characteristics of economic development in the region

Economic Growth in Latin America Mario A. Gutiérrez,United Nations. Economic Commission for Latin America and the Caribbean. Economic Development Division,2005

The Long March Shahid Javed Burki,Guillermo Perry,1997-01-01 Detailed discussion of reforms necessary to accelerate economic growth and reduce poverty in the region Reforms include equity market development civil service reform in health and education investment labor market liberalization and greater trade openness Handbook of Latin American Studies v 57 *¿Integracion comercial como un camino al desarrollo?* World Bank,2019-10-10 After a period of rapid economic growth associated with high commodity prices the Latin America and Caribbean region has again entered a phase of lackluster performance Overall this slowdown seems more self inflicted than imported and the outlook for the region is not encouraging either A tepid export response constrains the prospect of growing through external demand whereas limited fiscal space leaves little room to stimulate domestic demand The outlook could

deteriorate further if the international environment became less conducive This report explores whether inward looking development strategies could be one of the reasons for slow growth in Latin America and the Caribbean Trade barriers are higher than in other developing regions and while numerous preferential trade agreements have been signed many of them are intra regional The report shows that South North agreements are associated with increases in economic complexity and faster economic growth than South South agreements It illustrates the point by assessing the economic social spatial and environmental impacts of two major South North agreements signed over the last year **Towards Sustained**

Revisiting the Link between Trade, Growth and Inequality Ms.Kimberly Beaton,Aliona Cebotari,Andras Komaromi,2017-03-09 We revisit the relationship between international trade economic growth and inequality with a focus on Latin America and the Caribbean The paper combines two approaches First we employ a cross country panel framework to analyze the macroeconomic effects of international trade on economic growth and inequality considering the strength of trade connections as well as characteristics of countries export markets and products Second we consider event studies of past episodes of trade liberalization to extract general lessons on the impact of trade liberalization on economic growth and its structure and inequality Both approaches consistently point to two broad messages First trade openness and connectivity to the center of the trade network has substantial macroeconomic benefits Second we do not find a statistically significant or economically sizable direct impact of trade on overall income inequality
