Economics Patricia Donohue-White, 2002-01-01 Foundations of Economic Personalism is a series of three book length monographs each closely examining a significant dimension of the Center for Economic Personalism s unique synthesis of Christian personalism and free economic market theory In the aftermath of the momentous geo political and economic changes of the late 1980s a small group of Christian social ethicists began to converse with free market economists over the morality of market activity This interdisciplinary exchange eventually led to the founding of a new academic subdiscipline under the rubric of economic personalism These scholars attempt to integrate economic theory history and methodology with Christian personalism s stress upon human dignity humane social structures and social justice This second volume in the series surveys the anthropological foundations to the disciplines of economics and moral theology The first part of the book presents an overview of the German French and Polish branches of personalist thought Particular attention is given to theological anthropology especially as it is developed by such thinkers as Emmanuel Mounier Max Scheler Gabriel Marcel Karol Wojtyla and Emil Brunner Part two surveys models of human nature that have been espoused by various schools of free market thought including mainstream neoclassical economics In conclusion the authors demonstrate how an expanded

understanding of human nature can augment the ability of economic science to model and predict human behavior The Oxford Handbook of Christianity and Economics Paul Oslington, 2014-01-31 Many important contemporary debates cross economics and religion in turn raising questions about the relationship between the two fields This book edited by a leader in the new interdisciplinary field of economics and religion and with contributions by experts on different aspects of the relationship between economics and Christianity maps the current state of scholarship and points to new directions for the field It covers the history of the relationship between economics and Christianity economic thinking in the main Christian traditions and the role of religion in economic development as well as new work on the economics of religious behavior and religious markets and topics of debate between economists and theologians It is essential reading for economists concerned with the foundations of their discipline historians moral philosophers theologians seeking to engage with economics and public policy researchers and practitioners *Wealth of Persons* John McNerney, 2016-08-31 Thomas Piketty's Capital in the Twenty First Century initiated a great debate not just about inequality but also regarding the failures found in the economic models used by theoreticians and practitioners alike Wealth of Persons offers a totally different perspective that challenges the very terms of the debate The Great Recession reveals a great existential rift at the core of certain economic reflections thereby showing the real crisis of the crisis of economics In the human sciences we have created a kind of Tower of Babel where we cannot understand each other any longer The breakdowns occur equally on the personal social political and economic levels There is a need for an about face in method to restore harmony among dissociated disciplines Wealth of Persons offers a key to such a restoration applying insights and analysis taken from different economic scholars schools of thought philosophical traditions various disciplines and charismatic entrepreneurs Wealth of Persons aims at recapturing an adequate understanding of the acting human person in the economic drama one that measures up to the reality The investigation is a passport allowing entry into the land of economic knowledge properly unfolding the anthropological meaning of the free economy Law and Economics Margaret Oppenheimer, Nicholas Mercuro, 2015-06-01 The economic analysis of legal and regulatory issues need not be limited to the neoclassical economic approach The expert contributors to this work employ a variety of heterodox legal economic theories to address a broad range of legal issues They demonstrate how these various approaches can lead to very different conclusions concerning the role of the law and legal intervention in a wide array of contexts The schools of thought and methodologies represented here include institutional economics new institutional economics socio economics social economics behavioral economics game theory feminist economics Rawlsian economics radical economics Austrian economics and personalist economics The legal and regulatory issues examined include anti trust and competition corporate governance the environment and natural resources land use and property rights unions and collective bargaining welfare benefits work time regulation and standards sexual harassment in the workplace obligations of employers and employees to each other crime torts and even the structure of government Each contributor

brings a different emphasis and provides thoughtful sometimes provocative analysis and conclusions Together these heterodox insights will provide valuable supplementary reading for courses in law and economics as well as public policy and business courses at both the graduate and undergraduate levels

Public Policy Analysis Wil A. H. Thissen, Warren E. Walker, 2012-10-05 Traditional policy analysis approaches are characterized by a focus on system modeling and choosing among policy alternatives While successful in many cases this approach has been increasingly criticized for being technocratic and ignoring the behavioral and political dimensions of most policy processes In recent decades increased awareness of the multi actor multiple perspective and poly centric character of many policy processes has led to the development of a variety of different perspectives on the styles and roles of policy analysis and to new analytical tools and approaches for example argumentative approaches participative policy analysis and negotiation support As a result the field has become multi faceted and somewhat fragmented Public Policy Analysis New Developments acknowledges the variety of approaches and provides a synthesis of the traditional and new approaches to policy analysis It provides an overview and typology of different types of policy analytic activities characterizing them according to differences in character and leading values and linking them to a variety of theoretical notions on policymaking Thereby it provides assistance to both end users and analysts in choosing an appropriate approach given a specific policy situation By broadening the traditional approach and methods to include the analysis of actors and actor networks related to the policy issue at hand it deepens the state of the art in certain areas While the main focus of the book is on the cognitive dimensions of policy analysis it also links the policy analysis process to the policymaking process showing how to identify and involve all relevant stakeholders in the process and how to create favorable conditions for use of the results of policy analytic efforts by the policy actors The book has as its major objective to describe the state of the art and the latest developments in ex ante policy analysis It is divided into two parts Part I explores and structures policy analysis developments the development and description of approaches to diagnose policy situations design policy analytic efforts and policy process conditions Part II focuses on recent developments regarding models and modeling for policy analysis placing modeling approaches in the context of the variety of conditions

and approaches elaborated in Part I *Weaving Relationships* Kathryn Anderson, 2006-01-01 *Weaving Relationships* tells the remarkable little known story of a movement that transcends barriers of geography language culture and economic disparity The story begins in the early 1980s when 200 000 Maya men women and children crossed the Guatemalan border into Mexico fleeing genocide by the Guatemalan army and seeking refuge A decade later many of the refugees returned to their homeland along with 140 Canadians members of Project Accompaniment The Canadians were there by their side to provide companionship and more significantly as an act of solidarity *Weaving Relationships* describes the historical roots of this solidarity focusing on the Maya in Guatemala It relates the story of Project Accompaniment and two of its founders in Canada the Christian Task Force on Central America and the Maritimes Guatemala Breaking the Silence Network It reveals solidarity s impact on the Canadians and Guatemalans whose lives have been changed by the experience of relationships across borders It presents solidarity not as a work of charity apart from or for them but as a bond of mutuality of friendship and common struggle with those who are marginalized excluded and impoverished in this world This book speaks of a spirituality based on community and justice and challenges the church to move beyond its preoccupation with its own survival to solidarity with those who are suffering It is a book about hope in the face of death and despair *Solar Energy in America's Future* Stanford Research Institute, 1977 **Solar Energy in America's Future** John S. Reuyl, Stanford Research Institute, 1977
