Durbin, 2013-04-15 The issue of planning prompted some of the fiercest debate in mid twentieth century economics *Politics of Economic Planning* collects together a number of papers from journals and contributed books that examine the problems of economic planning in a free society They fall into three groups Part 1 explains the idea of socialism and defines it in relation to democracy Part 2 discusses problems of economic planning both in relation to political economy on the practice of planning and with the application of the theory of value to the conditions of a centrally directed economy Part 3 examines the nature of economics Principles of Economic Planning W. Boettke, 2000 Economic Planning and Industrial Policy in the Globalizing Economy Murat Yülek, 2014-09-04 This book discusses national development planning in the context of a globalized world economy National economic development planning the process of defining strategic economic objectives for a country and designing policies and institutional frameworks to attain them was popular in many countries in the 1960s and 1970s Over time it lost its appeal More recently with globalization accelerating and economic competition increasing it is making a comeback in different countries under different forms National planning in this new era is different than the earlier quantitative planning approaches It employs different tools such as strategic visions and action plans revived forms of physical infrastructure planning industrial policy and cluster policy Built on the research of international scholars with firsthand knowledge of the countries in question this volume presents and evaluates current national planning strategies and policy worldwide It will be of interest to both academicians who study and teach globalization and development as well as policy makers who may use it as a reference as they contemplate their own strategies Revival: Economic Planning in Soviet Russia (1935) F. A Hayek, Boris Brutzkus, 2018-12-20 The ideas set forth in these pages matured in the authors mind during the early years of constructive communism in Petrograd The communist government intoxicated by its successes in the counter revolution had promised to deal promptly with all economic problems now that its hands were free to do so It was at this moment of its greatest triumphs that the author put forward his contention that the system of Marxian communism as then conceived was intrinsically unsound and must inevitably break down **National Economic Planning, Balanced Growth, and Full**

Frisch,2012-12-06 It is probably true as the editor of these essays and studies by Ragnar Frisch points out that the majority of economists are not well aware of the contributions made to their discipline by Frisch This certainly does not apply however to econometricians In fact Frisch was one of the founding fathers of the Econometric Society and for the first decade of its existence its recognized leader in Europe The annual European meetings were inspired by his enthusiasm his unprecedented didactic talents and his amazingly diversified contributions It is also clear that those members of the Swedish Academy of Sciences who selected candidates for the Nobel Memorial Prize in Economic Science were fully aware of Ragnar Frisch s pathbreaking work when they decided to award him that famous Prize While much of Frisch s earlier work has been

published in his later years of activity he hardly took the time to shape the results of his work in an optimal way for wider circulation Although an impressively lucid writer he evidently gave priority to solutions of some of the planning problems he was involved in rather than to formulating them in the characteristically crystal clear and well structured expositions of earlier years I very much welcome therefore Dr Long's initiative to make available to a wider public within the profession some of the few texts Frisch himself produced probably under pressure from his immediate friends and colleagues
