Economic Theory and Christian Belief Andrew J. Britton, Peter Humphrey Sedgwick, 2003 Any attempt to use the Bible as a basis for addressing contemporary economic issues needs to recognise the fundamental differences in underlying philosophy between economic theory and Christian belief Neo classical economic theory embodies a view of the world and of human nature derived from the Enlightenment of the eighteenth century which has become immensely influential in recent times Economic man is a rational independent being set in an environment of scarcity but able to improve his welfare by transactions in a market economy This anthropology is explained and examined systematically in this book following broadly the pattern of an economics textbook and drawing on some recent work in methodology In each chapter a second part presents a contrasting view of the same subject matter drawn from the Bible as interpreted by contemporary scholars This gives a radically different account of human life and well being centred on the community and its relationship with God in which prosperity abundance and hope for the future are divine blessings and gifts Despite the wide gaps between economic theory and Christian belief some points of contact can be made and there are suggestions as to how a dialogue between them might be conducted **International Books in Print 1990** Barbara Hopkinson, 1990 Books

Religion Frank Knight,Thornton W. Merriam,2013-10-08 First Published in 1998 In this highly fragmented culture of ours books are needed to integrate fields of interest ordinarily considered separately to state their common problems and to deal with their differences in the light of other criteria than the separate functions and local loyalties of the special interests in themselves This book was originated with that purpose in mind Specifically this book deals with the practical dualism of our modern morals With the traditional Christian ethic at one pole and the variegated often contradictory assemblage of practices and precepts of our secular life at the other it has never been co ordinated or made intelligible from within

Dean,A. M. C. Waterman,2012-12-06 Normative Social Theory James M Dean and A M C Waterman University of Manitoba 1 Economics and Religion Once Again This hook is a sequel to Economics and Religion Are They Distinct Brennan and Waterman 1994 That volume was motivated by a frustration born of many disappointing encounters between economists and theologians in the 1980s Can bishops synods and other voices of organized religion bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to that of the purely secular knowledge economists believe they can supply Can economists bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to the fundamental values that inform social ethics and that are still guarded to a large extent by religious tradition All too often the two sides talked at cross purposes Well intentioned economists coexisted for a few hours or days with well intentioned theologians whose manner of conceiving social reality was radically incompatible with their own There seemed to be no common ground The first requisite of any genuine conversation is an agreed conceptual framework that is able to accommodate the peculiar social vision both of the economist and of theologian and to display the logical relation between the two **Marketplace of the Gods** Larry Witham,2010-05-05 Two centuries after Adam Smith illuminated the workings of the marketplace a new movement among economists and social scientists is expanding his insights into a groundbreaking economics of religion Using cutting edge ideas from the behavioral sciences and a deep knowledge of religious history this new approach is making sense not only of past beliefs but of religion today In Marketplace of the Gods award winning journalist Larry Witham tells the inside story of this expanding economic approach to religion the puzzles it tries to solve the controversies it has stirred and the people who are making it happen He shows that the economic approach while evoking images of stock markets or accounting ledgers actually begins with a simple idea about human beings as rational actors judging costs and benefits in life Every life has limits so human experience is a series of trade offs balancing resources to make choices for the best possible benefits As the

economics of religion shows this model can be applied to the rich story of the human race and its gods Beginning with the individual the choices in religion shape households groups movements and entire religious economies of nations On the one hand this mixing of the profane and the sacred the economic and the religious is an exciting exchange of ideas between economics sociology psychology history and theology On the other it has spurred a lively protest Indeed for some the economic approach seems to transform our good angels into grubby consumers As Witham shows however the economic approach to religion has insights for everyone believers and skeptics alike He illuminates this approach in a volume rich with ideas history contemporary events and the insights of some of our sharpest modern day thinkers **Divine Economy** D. Stephen Long, 2002-09-11 What has theology to do with economics This first book to address the question directly will be welcomed by all those with an interest in exploring how theology can inform economic debate *Economics in Christian Perspective* Victor V. Claar, Robin J. Klay, 2015-04-21 Victor Claar and Robin Klay introduce students to the basic principles of economics and then evaluate the principles and issues as seen from a Christian perspective This textbook places the economic life in the context of Christian discipleship and stewardship This text is for use in any course needing a survey of the principles of economics Religion and Economics Bruce Chilton, Jacob Neusner, 2000 The Oxford Handbook of Christianity and Economics Paul Oslington, 2014-01-31 Many important contemporary debates cross economics and religion in turn raising questions about the relationship between the two fields This book edited by a leader in the new interdisciplinary field of economics and religion and with contributions by experts on different aspects of the relationship between economics and Christianity maps the current state of scholarship and points to new directions for the field It covers the history of the relationship between economics and Christianity economic thinking in the main Christian traditions and the role of religion in economic development as well as new work on the economics of religious behavior and religious markets and topics of debate between economists and theologians It is essential reading for economists concerned with the foundations of their discipline historians moral philosophers theologians seeking to engage with economics and public policy researchers and practitioners
