Daugherty,2015-06-02 Excerpt from Principles of Economic Zoology The authors have long felt the need of one book in the hands of the student which would give not only the salient facts of structural Zoology and the development of the various branches of animals but also such facts of natural history or the life and habits of animals as to show the interrelations of structure habit and environment For we believe that a knowledge of both structure and life history is necessary before any suggestions or discoveries can be made concerning the principles which underlie and control all animal life including that of man For it is principles and their application for which we are searching This book is an attempt to supply this need It is especially designed to accompany the Field and Laboratory Guide Part I For the sake of the natural history many examples have been included To reduce the size of the book it has been necessary to print this natural history in smaller type but that in no way implies that it is of minor importance and it is by far the most interesting portion of the subject The scientific names need not in all cases be learned They have been used because common names are so often misleading About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
