**Gender Equality in a Global Perspective** Anders Ortenblad, Raili Marling, Snjezana Vasiljevic, 2017-01-06 Gender Equality in a Global Perspective looks to discuss whether Gender Equality can be adopted as it has been defined in international documents anywhere or whether it needs to be adapted in a more local context discuss which factors and perspectives need to be taken into account when adapting Gender Equality to specific contexts suggest research approaches for studies on whether a universal Western concept of Gender Equality fits in certain specific contexts and finally suggests challenges to the existing interpretation of Gender Equality e g theory of intersectionality and the development of legal and policy framework This book is situated within the tradition of comparative gender studies While most other such books take up and compare various ways of implementing or not implementing gender equality this book studies and compares whether or not and to what extent a specific definition of Gender Equality GE could be adopted by various nations Thus all chapter contributors will engage with the same definition of GE which will be presented within the book and discuss the possibilities and constraints related to applying such a definition in their particular national context The readers will learn about the problems of applying a universal concept of Gender Equality and the possible reasons for and modes of adapting Gender Equality to different contexts Gender Equality in a Global Perspective looks to maintain a critical and reflexive stance towards the issues raised and will seek to present multiple perspectives and open ended answers As such it hopes to contribute to the international discussion of human rights more broadly and Gender Equality specifically The intended audience is not limited only to but will include policy makers scholars and students with an interest in Gender issues Organizational Theory Political Science Human Development Policy Analysis Globalization and other management sub disciplines

**Inequality and Sustainable Development** Naierossadat Hoseini, 2014 According to the most quoted definition of sustainable development it can be defined as development that meets the needs of the present without compromising the ability of future generations to meet their own needs In fact sustainable development refers to a development process which enhances peoples capacity to create and consume wealth on a lasting basis Sustainable development requires among other things a socio economic and environment conditions which enables men and women to engage in and sustain the development process The social relationships between individuals and communities can either promote or constrain sustainable development The three dimensions of gender equality and sustainable development which will be discussed in this paper are a Gender and economic dimension of sustainable development b Gender and social dimension of sustainable development c Gender and environmental dimension of sustainable development These dimensions have equal and interrelated importance The paper will explain that stressing the environmental and social dimensions of sustainable development in the absence of economics neglects the financial capital needed to pay for progress Building up the economic and social aspects of sustainability while neglecting the environment degrades the natural capital needed for growth Focusing on economics and the environment without attention to social factors may lead to growth but just for a few and not for all society In the paper we refer to some studies indicate that gender inequalities are extracting high economic costs and leading to social inequities and environmental degradation around the world The present paper tries to provide a critical perspective on the current sustainable development paradigm and tries to integrate a human rights approach too In the Beijing Platform for Action governments agreed that Equality between women and men is a matter of human rights and a condition for social justice and is also a necessary and fundamental prerequisite for equality development and peace A transformed partnership based on equality between women and men is a condition for people centered sustainable development While UN member states acknowledged at the Rio 20 Conference that gender equality and effective participation of women are important for effective action on all aspects of sustainable development Finally the paper conclude that sustainable development is a multidimensional process It encompasses economic social political cultural and environmental dimension s In this paper we will explain the aforementioned dimensions in detail and the importance of gender issues and gender equality in sustainable development will be discussed Finally based on findings of the paper some recommendations for promoting gender equality will be presented

2006 **The Economics of Gender Equality in the Labour Market** Meltem İnce Yenilmez, Gül Ş. Huyugüzel Kışla, 2021-03-07 This book evaluates the global labour market in the context of gender equality and the associated policies

and regulations particularly in developing markets to recommend measures for encouraging gender equality. It exposes the barriers that women employees encounter as well as some of the societal and workplace policies they specifically are subject to. Important themes within this topic include participation rates, the looming gap in hourly pay, availability of part-time and full-time positions, value and social status associated with jobs held by men and women. The book examines how global gender policy objectives such as gender equality in careers, gender balance in decision making and gender dimensions in research can be incorporated into policy frameworks. The book analyzes the gendered nature of assumptions, processes and theories. The juxtaposition between family and work, tradition and modernity and dependency and autonomy clearly still seems to be misunderstood. Therefore, the book asks whether work improves women's positions in society and/or changes their roles in their families. The authors explore and uncover the connections among employment, entrepreneurship, migration, economies and gender, global labour markets and provide helpful solutions to the perceptions surrounding women's status, risks and inequality that limit their economic participation. This insightful read provides comprehensive details on a variety of themes and encourages further research on policies that are key to promoting gender equality. The book will appeal to postgraduate students and researchers of labour and feminist economics, the economics of gender, women's studies and sociology.
