Joint Chiefs of Staff, 1972 National Security Management Correspondence Course Industrial College of the Armed Forces (U.S.), 1974 **United States Foreign Economic Policy-making** Kenneth A. Gold, 2019-07-19 This book develops an analytical framework for understanding United States foreign agricultural policy through a state interest approach and describes and analyses seven cases of food policy decisions through this perspective which shows that decision makers sought on most occasions to utilise US food resources to accomplish foreign policy objectives A fundamental aspect of the statist approach is the recognition that those sectors representing the interest of the state will inevitably confront other actors in the policy process who are likely pursuing conflicting objectives This book looks at contemporary circumstances in the formulation of US agricultural policy in particular those alterations that occurred beginning in 1972 It offers an analysis of the nature of foreign economic policy and outlines the re emergence of economics as an important component of US foreign policy and an analysis of the concept of food power National Security Strategy of the United States United States. President (1981-1989 : Reagan), 1988 *National Power and the Structure of Foreign Trade* Albert Hirschman, 2024-06-14 This study begins with a brief survey of economic thought on the relationship between foreign trade and national power from the Mercantilists on Chapter II attempts a systematic theoretical approach to the subject It first makes clear the fundamental basis of the possible use of foreign trade as an instrument of national power policy Using well known concepts of economic analysis it proceeds to show under what conditions and by means of what policies this instrument is likely to attain its highest efficiency The principles of power policy thus deduced theoretically are then compared with the actual practices followed by German trading methods in recent years Toward the end of this chapter the reader will be carried into a detailed discussion of certain problems of the theory of international trade which are touched upon earlier in the chapter Chapter III is applied to the historical background of our problem It gives a survey of the literature on economic aggression before and during World War I and brings out the importance of the Paris Economic Conference of the Allies in 1916 for the Versailles Treaty

and postwar economic policies In Chapter IV we review in the light of our theoretical and historical analyses certain safeguards or remedies which could be or have been proposed to prevent the use of foreign trade as an instrument of national power policies Certain questions raised in Part 1 can be answered in quantitative terms Part 2 consists therefore of an exposition of various trends of international trade in recent years disclosed by statistical analysis In Chapter V we calculate an index number expressing the extent to which the trade of the large trading nations is or has been directed by preference toward the smaller trading countries Chapter VI gives index numbers for the degree of concentration of their foreign trade on one or a few big markets or sources of supply Finally in Chapter VII we measure the extent to which world trade has been based primarily on an exchange of manufactures against raw materials and foodstuffs This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1945 with an expanded edition published in 1980

National Power and International Geostructure Daniel Morales Ruvalcaba, Alberto Rocha Valencia, 2024-04-18 This book addresses three innovative aspects for the study of International Relations first proposes a novel theoretical methodological framework for the study of national power and based on this a quantitative analysis technique is formulated that allows us to study the evolution of state power over almost five decades Second states play a fundamental role in the international system which is why the study of their roles in the world cannot be limited to old insufficient and contradictory categorizations Having new categories of states becomes an even more urgent task in the rapidly changing international order than it is today This book proposes nine categories of powers and states that cover all the countries that currently exist Third the international geostructure of world power is proposed which represents a new theoretical notion that helps to explain how the international insertion of states and their possibilities of action are conditioned by the unequal distribution of national power and by their structural positioning in the international system This book is for all students of International Relations academics and people who want to understand national power as a fundamental factor in relations between countries
