scientists in general *Britain and the Dictatorships of Argentina and Chile, 1973-82* Grace Livingstone, 2018-05-28 This book explores the links between the British government and the dictatorships of Argentina and Chile 1973-82 using newly opened British archives. It gives the most complete picture to date of British arms sales, military visits and diplomatic links with the Argentine and Chilean military regimes before the Falklands war. It also provides new evidence that Britain had strategic and economic interests in the Falkland Islands and was keen to exploit the oil around the Islands. It looks at the impact of private corporations and social movements such as the Chile Solidarity Campaign and human rights groups on foreign policy. By analyzing the social background of British diplomats and tracing the informal social networks between government officials and the private sector, it considers the pro-business biases of state officials. It describes how the Foreign Office tried to dissuade the Labour governments of 1974-79 from imposing sanctions on the Pinochet regime in Chile and discusses whether unelected officials place constraints on politicians aiming to pursue an ethical foreign policy. *Weaving Transnational Solidarity* Katherine O'Donnell, 2010-07-26 *Weaving Transnational Solidarity* from the Catskills to Chiapas and Beyond analyzes the grassroots economic justice work 1998-2009 of three groups: two Mexican organizations, Jolom Mayaetik (Mayan women's weaving cooperative) and Kinal Antzetik (NGO in the highlands of Chiapas) and an informal international solidarity network. The book provides scholar-activist ethnographic case study data which contributes to understanding collective organization, indigenous rights and the solidarity process within transnational social movements and critically reflects on Fair Trade, health and education solidarity efforts as well as the class, ethnic and gender dimensions of neoliberal globalization. Central themes include solidarity, human rights and social justice. Indigenous women's voices are featured in the book as powerful in transnational justice organizing in the global south and north. *Critical Global Studies* vol 2

Environmental Politics in Latin America Benedicte Bull, Mariel Aguilar-Stoen, 2014-11-13 Since colonial times the position of the social, political and economic elites in Latin America has been intimately connected to their control over natural resources. Consequently, struggles to protect the environment from over-exploitation and contamination have been related to marginalized groups' struggles against local, national and transnational elites. The recent rise of progressive left-leaning governments, often supported by groups struggling for environmental justice, has challenged the established elites and raised expectations about new regimes for natural resource management. Based on case studies in eight Latin American countries (Argentina, Brazil, Chile, Ecuador, Colombia, Bolivia, El Salvador and Guatemala), this book investigates the extent to which there have been elite shifts, how new governments have related to old elites and how that has impacted on environmental governance and the management of natural resources. It examines the rise of new cadres of technocrats and the old economic and political elites' struggle to remain influential. The book also discusses the challenges faced in trying to overcome structural inequalities to ensure a more sustainable and equitable governance of natural resources. This timely book will be of great interest to researchers and masters students in development studies, environmental management and

governance geography political science and Latin American area studies
