

## **RHETORICAL METHODS IN THE FINANCE AND ECONOMICS DISCOURSE COMMUNITIES**

A discourse community is a group of people who convey thoughts about a certain issue using the same vocabulary and shared knowledge. The finance industry is a good illustration of a highly restricted discourse group that makes it exceedingly challenging to join without any education or expertise. Many of the rhetorical techniques used in the discourse communities of economics and finance are similar. Examples include the use of mathematical models and very precise vocabulary. In order to successfully convey fresh ideas within specialised areas, these communities use various tactics, which are examined in this research. In order to properly communicate thoughts to other members of this community, the jargon and vocabulary used by this community are quite particular. This explains in part why this discourse community is exclusive. Second, this group use visual tools like graphs and charts to explain things like economic or stock market movements. Without context, it would be quite difficult for someone outside of this group to understand these graphic representations. Last but not least, the job that professionals in this industry do is unique in that it involves either direct or indirect involvement in managing the finances of individuals and organisations. To communicate within this society, one must have a certain degree of awareness of the complexities that result from utilising financial jargon. The effective conveyance of ideas using community-specific language is a typical objective of communication that occurs in academic publications, online forums, and professional job settings.

Scholarly publications in finance and economics use distinctive vocabulary to convey ideas to their niche speech audience. Many of the financial or economic journal articles need a specialised experience in this sector and understanding of particular issues in order to be understood. Most of the lingo is exclusive to this group and is seldom ever used outside of it. For instance, the term "equity" is used in communities of financial discourse to refer to an ownership interest in a company represented by common stock; nevertheless, the term "equity" may have several meanings depending on the situation. Due to their ignorance of the vocabulary being employed, those outside of this group may misunderstand concepts. The exact nature of the diction developed for use in scientific publications may be confusing to anyone outside of this group. The exclusive use of diction is immediately apparent in the abstract of the article, "Corporate expansion during pro-market reforms in emerging

*Economics As Discourse* Warren J. Samuels, 2013-04-17 1 Warren J Samuels The study of economics as discourse requires a perspective that focuses on the relationships among knowledge or truth discourse or language and meaning Central to this task is the recognition that the conduct of economic analysis uses words and that words embody meanings that are applied to the object of study but do not necessarily derive from that object although they define that object for us Knowledge Economists are engaged in efforts to understand and explain the economy In the pursuit of this knowledge they have attempted to make coherent the respects in which belief is to be accepted as knowledge or the senses in which this knowledge has the quality of truth The field of methodology in economics parallels the fields of epistemology and philosophy of science in the attempt to make sense of and to prescribe the terms on which efforts at knowledge may be accepted as true or the terms on which statements can be accepted as knowledge The conduct of such methodological inquiry typically treats economics as a science 1 2 ECONOMICS AS DISCOURSE engaged in the pursuit of truth as an epistemological category though there have almost always been economists who were skeptical of the status of economics as a science and the pursuit of knowledge is only one of three putative functions of economics the other two being psychic balm and social control

**Strategies of Economic Order** Keith Tribe, 2007-04-19 This book provides an overview of two hundred years of German economic thought from the Staatswissenschaften of the eighteenth century to National Socialism and the Social Market Whereas classical economics from Smith through Ricardo to Marx and Mill emphasised value distribution and production German economic thought had a long running tradition of human need and the varying conditions for order These ideas are brought together by a conception of rational action and therefore a rationalistic appraisal of welfare and order By taking this perspective the usual contrast of market and planning approaches to economic organisation is subsumed by an approach which focuses on the construction of order in economic processes This book highlights the continuity of this practical approach of German economists through the two centuries under consideration from the Cameralists to the Ordoliberals

**The Language of Economics** Willie Henderson, Tony Dudley-Evans, 1990 This volume draws together various strands of research and teaching related to language and economics The key paper is that of Professor McCloskey an economist who has criticized the evidence of economics writing in his book *The Rhetoric of Economics*

**Essays on the Methodology and Discourse of Economics** Warren J. Samuels, 2014-01-14 Contains a collection of articles on economics as a system of discourse and on certain epistemological problems of economics The treatment of both topics centres on the role of often implicit assumptions as to whose interests count in reaching conclusions especially as to policy

**Postindustrial Possibilities** Fred L. Block, 1990-05 Changing economic realities have outmoded much of traditional economic and social theory Block has taken an inchoate concept and given it precision and force His analyses of the new technologies are a major contribution to the revived field of economic sociology but they also contribute to the ongoing debates on industrial policy

and the expansion of democratic decision making Daniel Bell Harvard University Block's book marks the coming of age of economic sociology By challenging the central concepts of neo classical economics Block allows us to think in new ways about healthy economic growth in the context of a more democratic society He provides a powerful and hopeful analysis of some of our most daunting problems Robert N Bellah co author of *Habits of the Heart* Block has undertaken the ambitious task of laying out the possibilities that lie within modern capitalism but are obscured by the conventional perceptions of its economic structure and institutions By closely examining these perceptions ranging from labor and capital to that great tutelary deity the market Block enables us to see alternative arrangements for achieving qualitative economic growth At a time when thinking about the future of advanced capitalism was ever more necessary or more difficult *Postindustrial Possibilities* seems to me exactly the clear critical and constructive vision that social theory needs Robert L Heilbroner New School for Social Research From start to finish this original and provocative book is impossible to put down *Postindustrial Possibilities* clarifies and makes sense of our contemporary great transformation In so doing it not only maps social reality incisively it also provides a powerful critique of the tools in the kitbag of social science the superb chapter on the market alone is worth the price of admission At once normative historical and policy oriented the book suggests an alternative approach rooted in economic sociology that significantly broadens the scope of discussion about possible futures for the United States Ira Katznelson New School for Social Research A brilliant book that illuminates both the quandaries and possibilities of postindustrial society Writing in the tradition of Karl Polanyi Fred Block provides a refreshing antidote to the triumphalism of free market ideology that dominates our era and also lays the intellectual groundwork for alternative and more humane forms of economic organization Frances Fox Piven City University of New York **Land, Labour, and Economic Discourse** Keith Tribe, 1978 **Economic Thought and Discourse in the 20th Century** Warren J. Samuels, Jeff Biddle, Thomas W. Patchak-Schuster, 1993 This work on the history of economics deals with three major figures Hicks Veblen and Marshall It describes Hicks' theoretical stance on the functions of the history of economic thought Veblen's work on war and peace and the discursive structure of Marshall's work *Economics Metaphor in Economics and Specialised Discourse* Maurizio Gotti, José Mateo, Francisco Yus, 2021-09-30 This book approaches metaphor in specialised discourses covering various fields The studies presented in the book adopt different research frameworks ranging from pragmatics to conceptual metaphor theory among others The book is divided into three Sections that analyse major specialised discourses where metaphor is frequently found and the role that metaphor plays in these discourses The first Section approaches the discourse of Business and Economics from different perspectives The second Section addresses the use of metaphor in politics diplomacy and law Finally Section three covers the use of metaphors in other specialised discourses such as marine fashion gender or health *Discourse Analysis and Austerity* Kate Power, Tanweer Ali, Eva Lebdušková, 2019-03-04 In the immediate aftermath of the global financial crisis of 2008 governments around the developed

world coordinated policy moves to stimulate economic activity and avert a depression In subsequent years however cuts to public expenditure or austerity have become the dominant narrative in public debate on economic policy This unique collaboration between economists and linguists examines manifestations of the discourses of austerity as these have played out in media policy and academic settings across Europe and the Americas Adopting a critical perspective it seeks to elucidate the discursive and argumentation strategies used to consolidate austerity as the dominant economic policy narrative of the twenty first century Dialogue within Discourse Communities Julia Bamford, Marina Bondi, 2011-12-07 The book explores aspects of reflexivity and interactivity in a variety of academic genres oral and written scientific and educational Academic discourse is explored from a variety of perspectives that take a dialogic view of language use as their starting point ranging from conversation analysis to descriptive or applied genre studies Particular attention is paid to the way metadiscursive expressions contribute to a representation of the communicative procedures that characterise the ongoing scientific and educational dialogues Governing Economy Keith Tribe, 1988-08-26 Language, Communication and the Economy Guido Erreygers, Geert Jacobs, 2005-11-24 This volume brings together a number of wide ranging transdisciplinary research articles on the interface between discourse studies and economics It explores in what way economics can contribute to the analysis of discursive practices in various institutional settings as well as investigating what role discourse studies can play in economic research The contributors are linguists communication scholars economists and other social scientists drawing on various traditions including Critical Discourse Analysis Cognitive Linguistics ethnography and the literature on the rhetoric of economics and on economic storytelling All articles are essentially empirical focusing on the details of actual language use The type of data analysed ranges from the minutes of university policy meetings and large scale corpora of newspaper language over books of economic theory from both well respected economists and monetary cranks to cartoons from The Economist **Essays in the Methodology and Discourse of Economics** Warren J. Samuels, 1992-06-01 An essential addition to any economics library these five volumes present the contributions and writings of an influential and prolific scholar **The Popularisation of Business and Economic English in Online Newspapers** Elisa Mattiello, 2014-08-11 This book investigates the evolution of economic discourse from fully specialised texts towards popularisation Popularising texts on economics and business related matters has hitherto been a neglected and under explored area of enquiry and yet it deserves attention and study on account of the new fascinating insights it offers into specialised language and discourse The present book explores this under researched area via the qualitative analysis of a modern genre namely newspapers on the web In particular it scrutinises authentic extracts principally drawn from The Guardian Online in order to show on the one hand the popularising effect of the Internet on business and economic discourse and on the other hand the realistic vocabulary currently used in economic and professional jargon The introductory chapter discusses the popularisation of specialised text at large and of new media discourse in particular It describes this

phenomenon as a reformulation process whereby specialised knowledge is transformed into everyday or lay knowledge and also as a recontextualisation process whereby popularisation discourse is adapted to the appropriateness conditions of the new genres and to the constraints of the media employed. Popularisation it is claimed implies relevant changes not only in terms of terminological simplifications and adaptations to the public's prior knowledge but also in terms of the roles undertaken by the participants in the communicative event. The remaining chapters are organised into thematic units whose topics range from global economy economic growth and financial crisis to business management employment and sales. This part provides an in depth investigation of various topics related to the economics and business worlds combined with systematic explanations of linguistic phenomena at various language levels from morphology to syntax semantics and the lexicon. In this book the lexicon of ESP is offered in a fresh less formal style which will attract younger and non expert readers alongside experts and professionals. The book is of considerable interest to students at undergraduate and postgraduate levels lecturers professors entrepreneurs specialists and to those scholars who investigate ESP and its popularisation.

*Explorations in Economic Methodology* Roger E. Backhouse, 2006-10-19 Roger Backhouse is a key figure in the field of economic methodology. *Explorations in Economic Methodology* both clarifies and responds to the issues raised by the literature and argues that methodology is an essential activity. Offering a constructive but critical response to the recent literature this collection provides important new insights for students and researchers in economic methodology and the philosophy of science.

**Economics and Language** William Henderson, 2017-09-08 First published in 2003 Routledge is an imprint of Taylor Francis an informa company. *Language, Communication and the Economy* Guido Erreygers, Geert Jacobs, 2005-01-01 This volume brings together a number of wide ranging transdisciplinary research articles on the interface between discourse studies and economics. It explores in what way economics can contribute to the analysis of discursive practices in various institutional settings as well as investigating what role discourse studies can play in economic research. The contributors are linguists communication scholars economists and other social scientists drawing on various traditions including Critical Discourse Analysis Cognitive Linguistics ethnography and the literature on the rhetoric of economics and on economic storytelling. All articles are essentially empirical focusing on the details of actual language use. The type of data analysed ranges from the minutes of university policy meetings and large scale corpora of newspaper language over books of economic theory from both well respected economists and monetary cranks to cartoons from *The Economist*.

**Economics as Rhetoric** Anne Isla, 2024-07-26 Bernard Maris was killed in Paris on January 7 2015 during the terrorist attack against the satirical magazine *Charlie Hebdo*. He remains one of the most original intellectuals of contemporary France but despite being a uniquely original heterodox thinker his international reputation has been compromised by the fact that his writings are inaccessible to non French speakers. This book remedies that. By providing an overview of Bernard Maris' life and intellectual trajectory as well as an English translation of an anthology of his most relevant writings this volume provides the

international audience for the first time ever the chance to know and understand the contribution of this major heterodox economist An outstanding and atypical figure in economic thought and a virulent critic of mainstream dominant economics he was also an all round actor and thinker of his time Through rigorous reasoning he questioned the notion of well being which he argued is too often conflated with having more Enslavement by work or the endless destructive accumulation of natural wealth is also inherent to the capitalist system Probably his most original contribution is his epistemological reflection on the very nature of economics and his appraisal of this discipline as a form of rhetoric This book will be of great interest to readers in heterodox economics economic methodology epistemology and French literature and culture more broadly

*Economics and Language* Roger E. Backhouse, 2020-09-16 First published in 1993 The importance of language in economics has been neglected and dominated by techniques from other disciplines This looks at the wider methodological implications of language within economics in a practical and theoretical way

Postcolonialism Meets Economics Eiman O. Zein-Elabdin, S. Charusheela, 2004 The wide array of contributions to this book draws on the rapidly growing body of post colonial studies to critique both orthodox and heterodox economics
