Herbert Alfred Swenson

Economics For Urban Social Planning:

Economics for Urban Social Planning William Hendon, 1975
Theory and Practice of Social Planning Alfred J. Kahn, 1969 Discusses the intellectual processes involved in social planning Professor Kahn provides critical tools for the analysis of the planning process and shows what social planning is and can be Clarifying the major phases in the planning process he shows how planning can succeed or fail at any one of these stages He examined planners in their various roles as neutral technicians and as advocates as representatives of interest groups and as public officials The book describes both the social aspects of planning and the relationship between social and physical plans
Urban Water Planning Herbert Alfred Swenson, 1972
Urban Social Capital Gregory W. Streich, 2016-02-11 This volume presents a kaleidoscopic view of the norms and forms of contemporary city life focusing especially on the processes of social capital de formation in the urban milieu It brings together studies from highly diverse urban settings such as squatter re settlement projects in Kathmandu urban funeral societies in Africa an HIV AIDS community in Los Angeles the poor of Harare pensioners in Shanghai Maori gangs in Auckland and a Roma boxing club in Prague among others Contributors draw on contemporary theory and research in social capital political economy urban planning and policy social movements civil society and democracy to explore how social norms networks connections and ties are created deployed and often frayed under conditions of social complexity inequality cultural pluralism and the ethno racial diversity and division characteristic of urban contexts throughout the world In this way the volume engages in a genuinely globalized and globalizing discussion of contemporary urban social life and stands as a unique and timely interdisciplinary contribution to the ever expanding literature devoted to social capital
The Oxford Handbook of Urban Economics and Planning Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the

most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics **China's Urban Transport Development Strategy** Stephen Stares,Zhi Liu,1996 World Bank Discussion Paper No 352 Presents the proceedings of the China Urban Transport Symposium held in Beijing November 9 11 1995 jointly sponsored by China s Ministry of Construction and Ministry of Finance the People s Bank of China the World Bank and the Asian Development Bank The symposium addressed a wide range of topics including motor vehicle pollution urban transport management and planning bicycles in cities mass rapid transit public transit reform and the role of the private sector
