*Choosing Environmental Policy* Winston Harrington, Richard D. Morgenstern, Thomas Sterner, 2010-09-30 The two distinct approaches to environmental policy include direct regulation sometimes called command and control policies and regulation by economic or market based incentives This book is the first to compare the costs and outcomes of these approaches by examining realworld applications In a unique format paired case studies from the United States and Europe contrast direct regulation on one side of the Atlantic with an incentivebased policy on the other For example Germany's direct regulation of SO<sub>2</sub> emissions is compared with an incentive approach in the U S Direct regulation of water pollution via the U S Clean Water Act is contrasted with Hollands incentive based fee system Additional studies contrast solutions for eliminating leaded gasoline and reducing nitrogen oxide emissions CFCs and chlorinated solvents The cases presented in *Choosing Environmental Policy* were selected to allow the sharpest most direct comparisons of direct regulation and incentive based strategies In practice environmental policy is often a mix of both types of instruments This innovative investigation will interest scholars students and policymakers who want more precise information as to what kind of blend will yield the most effective policy Are incentive instruments more efficient than regulatory ones Do regulatory policies necessarily have higher administrative costs Are incentive policies more difficult to monitor Are firms more likely to oppose market based instruments or traditional regulation These are some of the important questions the authors address often with surprising results
