**Economic Planning and Social Justice in Developing Countries** Ozay Mehmet,2014-05-12 First published in 1978

this book was written at a time when belief was high in Western guided economic development of the emerging countries The success of Marshall Plan in war torn Europe generated a US led optimism that with generous inflows of aid and technical assistance the Third World could be won over in the Cold War The author s direct experience as a young academic economist in Cyprus Malaysia Uganda and Liberia led him to question this general optimism the reality on the ground in the developing world did not seem to match Western optimism Theories and blueprints made in the West did not fit the requirements of developing countries Higher production and better income distribution were inseparable twin objectives of developing nations That meant production of a higher national output must at the same time promote social justice Investment must create adequate jobs so that new entrants into rapidly expanding labor force could be gainfully employed Yet the dominant Western theories of development at the time in particular the Trickle Down Theory of Growth prescribed Growth First Distribution Later strategy Similarly Import Substitution Industrialization theories were emphasized at the expense of export led growth Dualistic Growth theories preached urban biased anti rural development This book was written as a rebuttal of such faulty theorizing and misguided professional technical assistance and the book s message is no less valid today than in the 1970 s
