Economics Of Nonconvex Ecosystems:

The Economics of Non-Convex Ecosystems Partha Dasgupta, Karl-Göran Mäler, 2006-04-11 Economists often assume that ecosystem and population dynamics are subject to convex even linear processes But research by ecosystem and population ecologists suggests that such processes are very often non convex for example a possible flip of the Gulf Stream due to fresh water intrusion from melting glaciers This has dramatic implications for environmental and resource economics since mistakes in management could prove more costly than imagined

Mathematical Models in Economics - Volume II

Wei-Bin Zhang, 2010-06-10 Mathematical Models in Economics is a component of Encyclopedia of Mathematical Sciences in which is part of the global Encyclopedia of Life Support Systems EOLSS an integrated compendium of twenty one Encyclopedias This theme is organized into several different topics and introduces the applications of mathematics to economics Mathematical economics has experienced rapid growth generating many new academic fields associated with the development of mathematical theory and computer Mathematics is the backbone of modern economics It plays a basic role in creating ideas constructing new theories and empirically testing ideas and theories Mathematics is now an integral part of economics The main advances in modern economics are characterized by applying mathematics to various economic problems Many of today's profound insights into economic problems could hardly be obtained without the help of mathematics The concepts of equilibrium versus non equilibrium stability versus instability and steady states versus chaos in the contemporary literature are difficult to explain without mathematics The theme discusses on modern versions of some classical economic theories taking account of balancing between significance of economic issues and mathematical techniques These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

The Measurement of Environmental and Resource Values A. Myrick Freeman III, Joseph A. Herriges, Catherine L. Kling, 2014-06-05 The first edition of this important work was the winner of the 2002 Publication of Enduring Quality award by the Association of Environmental and Resource Economists The continuing premise for the book is that estimates of the economic values of environmental and natural resource services are essential for effective policy making As previous editions the third edition which includes two additional co authors presents a comprehensive treatment of the theory and methods involved in estimating environmental benefits Researchers policy makers and practitioners will welcome the work as an up to date reference on recent developments Students will gain a better understanding of the contribution that economics as a discipline can make to decisions concerning pollution control and human health recreation environmental amenities and other critical issues concerning the way we use and interact with environmental and natural resource systems To reflect recent progress in both the theory and practice of non market valuation the third edition includes more details on empirical approaches to measurement expanded discussion of the reasons for divergence between willingness to pay and willingness to

accept compensation and increased coverage of econometric issues encountered in estimation In keeping with its cutting edge orientation it also includes more discussion of survey design equilibrium sorting models and the implications of behavioral economics for welfare measurements and benefit cost analysis

Ecosystems and Human Well-Being

Neville Ash, 2010-04-05 The Millennium Ecosystem Assessment MA is the most extensive study ever of the linkages between the world's ecosystems and human well being It is one of the most important conservation initiatives ever undertaken and the ecosystem services paradigm on which it is based provides the standard for practice This manual supplies the specific tools that practitioners of the paradigm need

in order to extend their work into the future The manual is a stand alone how to guide to conducting assessments of the impacts on humans of ecosystem changes It builds on the experiences and lessons learned from the MA global and sub global assessment initiatives with chapters written by well known participants in those initiatives It also includes insights gained from service focused assessment activities since the completion of the MA in 2005 **Benguela: Predicting a Large**

Marine Ecosystem Vere Shannon, Gotthilf Hempel, Coleen Moloney, John D. Woods, Paola Malanotte-Rizzoli, 2006-08-17 This is a book which examines much of what we know and also what we don't know about the Benguela Current Large Marine Ecosystem and its inherent variability Building on recent work and exciting findings about the predictability of the Benguela and other coastal upwelling ecosystems the book takes a look towards the future and highlights the difficulty of making predictions in such a complex and variable region The book illustrates what scientists and managers from developed and developing countries can achieve by working together and it lays a solid base upon which to build wise management and ensure sustainable use of the ecosystem Essential reading and a valuable reference work on the Benguela Current Large Marine Ecosystem Covers what we know about variability in the Benguela and its impacts Provides information on forecasting in the Benguela and offers insight in what is predictable and what is not Discusses key elements of a future integrated observing and forecasting system Capitalizing on Nature Edward B. Barbier, 2011-09-08 The basic unit of nature the ecosystem is a special form of wealth which we can think of as a stock of natural capital However perhaps because this capital is free we have tended to view it as limitless abundant and always available for our use exploitation and conversion Capitalizing on Nature shows how modeling ecosystems as natural capital can help us to analyze the economic behavior that has led to the overuse of so much ecological wealth It explains how this concept of ecosystem as natural capital sheds light on a number of important issues including landscape conversion ecological restoration ecosystem resilience and collapse spatial benefits and payments for ecosystem services The book concludes by focusing on major policy challenges that need to be overcome in order to avert the worsening problem of ecological scarcity and how we can fund novel financing mechanisms for global conservation *Handbook on the Economics of Natural Resources* Robert Halvorsen, David F.

Layton, 2015-02-27 The topics discussed in the Handbook on the Economics of Natural Resources are essential for those looking to understand how best to use and conserve the resources that form the foundation for human well being These include nonrenewable resources mod *Special Issue: The Economics of Non-convex Ecosystems* Partha Dasgupta, 2003

Encyclopedia of Biodiversity,2013-02-05 The 7 volume Encyclopedia of Biodiversity Second Edition maintains the reputation of the highly regarded original presenting the most current information available in this globally crucial area of research and study It brings together the dimensions of biodiversity and examines both the services it provides and the measures to protect it Major themes of the work include the evolution of biodiversity systems for classifying and defining biodiversity ecological patterns and theories of biodiversity and an assessment of contemporary patterns and trends in biodiversity The science of biodiversity has become the science of our future It is an interdisciplinary field spanning areas of both physical and life sciences Our awareness of the loss of biodiversity has brought a long overdue appreciation of the magnitude of this loss and a determination to develop the tools to protect our future Second edition includes over 100 new articles and 226 updated articles covering this multidisciplinary field from evolution to habits to economics in 7 volumes The editors of this edition are all well respected instantly recognizable academics operating at the top of their respective fields in biodiversity research readers can be assured that they are reading material that has been meticulously checked and reviewed by experts Approximately 1 800 figures and 350 tables complement the text and more than 3 000 glossary entries explain key terms

Biodiversity Economics Andreas Kontoleon,Unai Pascual,Timothy Swanson,2007-12-13 Human induced biodiversity loss is greater now than at any time in human history with extinctions occurring at rates hundreds of times higher than background extinction levels The field of biodiversity economics analyses the socio economic causes of and solutions to

biodiversity loss by combining the disciplines of economics ecology and biology This field has shown a remarkable degree of transformation over the past four decades and now incorporates the analysis of the entire diversity of biological resources within the living world Biodiversity Economics presents a series of papers that show how bio economic analysis can be applied to the examination and evaluation of the problem of various forms of biodiversity loss Containing insightful bio economic research by some of prominent practitioners in the field this volume will be an essential research tool to those working on biodiversity issues in the academic policy and private sectors

Implementing Environmental Accounts Rashid M. Hassan, Eric D. Mungatana, 2012-12-02 Leaving aside human and social capital for a future volume the book should be viewed as a crucial first step in developing indicators for total wealth in the countries covered by the case studies which include Kenya Uganda Tanzania Ethiopia Mozambique and South Africa These case studies experiment with implementing the SEAA in sub Saharan nations known to suffer from the resource curse their wealth in resources and commodities has allowed inflows of liquidity yet this cash has not funded crucial developments in infrastructure or education What s more resource driven economies are highly vulnerable to commodity price mutability The new measures of wealth deployed here offer more hope for the future in these countries than they themselves would once have allowed for

Essays on Pollution Control in Economics and Management Science Fouad El Ouardighi, 2025-04-25 The book features contributions that address both environmental economics and environmental management It presents a novel dynamic modeling framework for environmental economics in which environmental absorption efficiency is considered as a time dependent variable with its own dynamics It also introduces several extensions and applications of the model including the possibility of including self regenerating environmental absorption efficiency non cooperative transboundary issues with two superimposed free rider behaviors i e emissions reduction and restoration efforts and deforestation In the environmental management context it puts forward an entirely new dynamic modeling framework Unlike static approaches the model considers both flow and stock variables reflecting the accumulation of pollution over time In turn the book assesses sustainable configurations for supply chain competition providing mathematical insights and managerial recommendations that integrate accumulated pollution aspects and associated negative externalities Overall the book calls for combining environmental economics and environmental management in order to arrive at more realistic empirically grounded models Given its focus the book offers a valuable resource for researchers and graduate students with an interest in addressing pollution control challenges in the fields of economics and management science

Handbook of Environmental Economics Karl-Göran Mäler, Jeffrey R.
