The Regulation of Organised Civil Society Jonathan Garton,2009-06-25 Although much has been written on organised civil society the loose collective of organisations that operate outside the public sector the private market and the family unit over the past 30 years there has been little jurisprudential analysis This is in spite of the fact that a number of jurisdictions including England New Zealand Northern Ireland and Scotland have recently implemented major reforms to the regulatory frameworks in which civil society organisations operate with a particular emphasis on the charitable sectors Redressing the balance this monograph considers from first principles when it is appropriate to regulate organised civil society and how that regulation might best be accomplished Four broad issues are addressed a whether the activities undertaken by civil society organisations are distinct from the activities undertaken by the state or the market either because they are pursued in unique ways or because they produce unique outcomes b if so whether it is justifiable to regulate organised civil society activities in a sector specific way c if it is whether the peculiar characteristics of these activities make one type of regulation more appropriate than another and d whether it is appropriate to distinguish between charities and other civil society organisations for regulatory purposes The monograph integrates the traditionally separate disciplines of civil society theory and regulation theory to provide answers to these questions and advance a rudimentary theory of regulation specific to organised civil society

decades that have contributed to the development of a concentrated research agenda on nonprofit organizations Long neglected as a topic of theorizing and empirical investigation by mainstream economics in particular these initial theories of nonprofit organizations from the late 1970s and early 1980s continue to shape theoretical and conceptual efforts Importantly their influence extends beyond economics and informs sociological and politics science approaches to the set of organizations and institutions located between the market firm and the state agency as well While the theoretical map of nonprofit research has expanded beyond these early attempts and now include several other major theories such as stakeholder approaches supply side or entrepreneurial theories institutional theories and comparative approaches This work suggests that it is time to take stock and reexamine some of the basics from which these economic theories operate **Effective**

Property Ownership and Private Higher Education in China Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country's flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country's existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is

argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes
