Proceedings of the 2025 10th International Conference on Financial Innovation and Economic Development (ICFIED 2025) Maizaitulaidawati Md Husin,Tomoki Fujii,Xiaodong Lai,Azlina Binti Md Yassin,2025-05-02 This is an open access book Financial globalization plays a huge role in promoting the development of the world economy and the optimal allocation of world resources stimulates the accelerated development of the international division of labor and increases the international flow of production factors such as industrial transfer capital transfer and technology transfer It enables developing countries to make up for the lack of their own capital and technology and obtain industrial evolution technological progress and institutional innovation thereby accelerating the speed of economic development it also enables developed countries to open up cheap labor raw material markets and broad consumer markets prolonging product value More profits ease the economy the contradiction of stagflation and restore economic growth At the current stage the overall environment of the international financial market is relatively stable and the market environment has been improved to some extent However due to the complexity and diversity of the world economy coupled with the national characteristics of some countries There is great uncertainty in international policies which has greatly affected the stability of the international financial market In addition the current international environment is changing The conflict between Russia and Ukraine the epidemic and the Taiwan issue have all had an impact on the international economic situation This is also the difference between this conference and previous conferences we hope to have a deeper discussion on the current situation **Market Power and the Economy** Wallace C. Peterson,2012-12-06 A situation in economics that is little short of scandalous is the

almost total neglect by mainstream economics of the importance of power in economic affairs Power in this context means the ability to bend market forces in one's favor influencing and shaping key economic variables such as prices wages and other income determinants As John Kenneth Galbraith aptly observes a dominant fact in economic life is the desire of people everywhere and in all circumstances to get control over their personal lives and their incomes to escape from the tyranny of the market Power is the means to this end Ever since Adam Smith economists have been fascinated by and lavish in their praise for the workings of the market All modern textbooks are built around Smithian ideas about markets and the way the invisible hand works through competition for society's betterment Yet one can search nearly in vain through leading texts under graduate and graduate alike for any reference to market or economic power This is the situation in spite of the fact that the drive for power the urge to get control over one's income permeates the economy as much as does competition This is a scandal For a discipline that claims for itself the mantle of a science one which wants to be accorded the same respect given the natural sciences it is almost incomprehensible that it should ignore a major force at work in the real economic world
