Economics Of The Tropical Timber Trade:

The Economics of the Tropical Timber Trade Barbier/Burgess,1994-01-01 There is genuine cause for concern over the excessive exploitation of tropical forest in many regions but also many misconceptions about the causes and sources of this exploitation The Economics of the Tropical Timber Trade provides a detailed analysis of the economic linkages between the trade and forest degradation Based on a report prepared for the ITTO it looks at current and future market conditions and assesses the impacts on tropical forests of both the international timber trade and domestic demand The authors examine the causes of deforestation and compare the environmental impacts of the timber trade with other factors such as the conversion of the forest to agriculture Finally they assess the national and international trade policy options and discuss the potential role that interventions in the international timber trade may have in promoting efficient and sustainable use of forest resources This book is of interest to those concerned with forest management and policy trade and environment and with the economics of conservation and resource use *The Economics of the Tropical Timber Trade* Edward B Barbier,Joanne C. Gale,1998-09-14 Gale explains why international negotiations have not produced a sustainable solution to tropical rainforest degradation Using an innovative critical approach to international regimes the author analyzes the structure and operation of the International Tropical Timber Organization ITTO He shows how the timber industry and producing and consuming country governments created a blocking alliance that favoured developmentalist interests and ideas The ITTO bolstered this alliance by permitting environmentalists merely to voice but not to negotiate their concerns

The Economics of International Trade and the Environment Amitrajeet A Batabyal,Hamid Beladi,2001-02-07 Issues related to environmental protection and trade liberalization have moved to the forefront of international policy agendas The Economics of International Trade and the Environment explores from an economic standpoint many of the questions that are germane in increasing our knowledge of environmental policy in the presence of international Annexes A-K International Tropical Timber Organization (UK).,1992 The economics linkages between the international trade in tropical timber ... tropical forests ,1993 International Environmental Economics Günther G. Schulze,Heinrich W. Ursprung,2001

Environmental economics has traditionally been conducted in a closed economy mode Most textbooks on the subject still reflect this restriction international aspects of environmental problems are often not covered at all or dealt with as an afterthought In a world in which many environmental pollutants spill over national borders and national economies have become increasingly integrated this state of affairs is clearly unsatisfactory rational environmental policies undertaken in a globalizing world need to take the international economic and environmental relationships into consideration This perception has given rise to much literature employing an open economy approach to analysing environmental problems and policies After a decade of intensive research the time has come to take stock of the state of the art knowledge It is the objective of this volume to provide a review which will be of interest to scholars and graduate students of economics and political science who wish to familiarize themselves with the main issues and actors in the field of international environmental economics This collection of non technical issue oriented and comprehensive surveys is written by leading specialists in international and environmental economics

Economics of Deforestation Sven Wunder,2000-07-19 Tropical forests are disappearing at an unaltered pace giving way to alternative land uses This book gives an economic perspective on deforestation Following a survey of different deforestation definitions theories and empirical evidence a case study of Ecuador provides a versatile historical picture of factors affecting forest loss throughout different periods regions and ecosystems It is shown that policy and market failures alone cannot explain rapid deforestation decision makers follow a composite economic rationale in their continuous clearing of forests which can only be counteracted by concerted action **General Technical Report**

Products Sector David J. Brooks, 2001 **Economic and environmental effects of Accelerated Tariff Liberalization in the forest products sector a study by the Office of the United States Trade Representative and the White House Council on Environmental Quality**, 2001 **Biodiversity Economics** Andreas Kontoleon, Unai Pascual, Timothy Swanson, 2007-12-13 Human induced biodiversity loss is greater now than at any time in human history with extinctions occurring at rates hundreds of times higher than background extinction levels The field of biodiversity economics analyses the socio economic causes of and solutions to biodiversity loss by combining the disciplines of economics ecology and biology This field has shown a remarkable degree of transformation over the past four decades and now incorporates the analysis of the entire diversity of biological resources within the living world Biodiversity Economics presents a series of papers that show how bio economic analysis can be applied to the examination and evaluation of the problem of various forms of biodiversity loss Containing insightful bio economic research by some of prominent practitioners in the field this volume will be an essential research tool to those working on biodiversity issues in the academic policy and private sectors World Forests, Society and Environment Matti Palo, J. Uusivuori, 2012-12-06 This book addresses current global and regional issues concerning the world's forests societies and the environment from an independent and non governmental point of view A main message is that cooperation on a global scale is not only commendable but essential if solutions to the problems facing the world's forests are to be found To achieve this modern science needs to find a clearer picture of relationships between forests human activity and the environment and of the consequences of environmental change for the ability of societies to survive Part I Editorial Perspectives is analyzing the ongoing globalization processes of forests societies and the environment Part II Society and Environment reviews worldwide trends with significance for the future of forests and forestry While the trends are influenced by forest sector issues that sector is influenced to a much larger extent by external factors such as demography urbanization or technological development Part III Importance of Forests looks at the value of the goods and services of forests tangible and intangible market and non market and concludes that failure to recognize their full value is one of the crucial impediments to sustainable development In Part IV Global Forum scientists take up global forestry themes deforestation trade and the environment climate change biodiversity with the aim of stimulating wider discussion Part V Regional Forum looks at major themes of particular relevance to Africa Asia Pacific Latin America North America and Europe such as farm and agroforestry corruption and concessions urban forestry and environmental conflicts Part VI introduces the special theme forest sectors in transition economies Teams of scientists from Russia and China focus on the implications of the transition from plan to market economy illuminating both the very different nature of the forest sector in the two countries and the different transition paths that they have adopted In the past millennium the entire world has been discovered In the past half century the contribution of forests to the economy worldwide has been perceived while only recently have their societal and environmental benefits been globally recognized Globalization is a demanding process

requiring knowledge and information This book offers knowledge facts and information but also values from diverse human and cultural perspectives about world forests society and environment to help us towards equity in our use of the global forest to create a clearer vision on a unassailable

Forest Politics David Humphreys, 2014-04-08 An important and timely book from the Foreword by Stanley Johnson A complete and absorbing history of a decade of intense international politics offers many insights for future negotiators of sustainable solutions Stephen Bass International Institute for Environment and Development Skillfully navigates the jungle of forest politics leaving us in no doubt that the verbal commitment to save the world's forests has yet to be translated into action on the ground The way forward must clearly lie in political commitments and international cooperation if forests are to continue to preserve life on Earth Francis Sullivan World Wide Fund for Nature Global deforestation and its attendant processes including soil degradation climate change and the loss of biological diversity emerged as international political issues during the 1980s prompting politicians to seek consensus on programmes and policies for the conservation and sustainable management of forests Yet global initiatives have been bedevilled by tensions between the North and South and between governments industry local communities and indigenous peoples Meanwhile rates of deforestation in the tropics are increasing and international political efforts are demonstrably failing Forest Politics carefully traces the evolution of international cooperation on forests from the inception of the controversial International Tropical Timber Organization and the failed Tropical Forestry Action Programme in the mid 1980s to the creation of the Intergovernmental Panel on Forests in the mid 1990s The book also provides a detailed analysis of the negotiating stances of the parties involved in the divisive negotiations that took place prior to the 1992 Earth Summit in Rio de Janeiro and the equally factious negotiations for the International Tropical Timber Agreement of 1994 It provides a fascinating insight into the nature of such processes illustrating the difficulties that arise when concepts such as global commons come into conflict with national sovereignty Complete with annexes of important political documents and making extensive use of primary source material and interviews with participants Forest Politics presents case studies of all the major forest negotiations over the last 13 years It is an essential reference point for policy makers environmental campaigners and students and required reading for all those who care about the future of the world's forests David Humphreys is Research Fellow in Global Environmental Change at the Open University Originally published in 1996

Paradise Lost? Edward B. Barbier, Joanne C. Burgess Barbier, Carl Folke, 2019-09-18 Originally published in 1994 Paradise Lost is the outcome of a unique collaboration between economists and ecologists initiated by the Beijer Institute of the Royal Swedish Academy of Sciences The book examines how the loss of biodiversity is one of the most serious problems the world faces and suggests that new interdisciplinary thinking is required to safeguard both us and the biosphere from the effects of species extinction The book examines how an integrated interdisciplinary approach to the conservation of biodiversity can understand and tackle the issue It provides an overview of the causes of the problem and examines previous approaches to dealing with it The book also

addresses how the loss of biodiversity affects natural systems and provides an examination of environmental policy while discussing how this has been affected by the ecological limits to economic activity This book will be of interest to both academics and students of environmental sciences economics and politics The Tropical Timber Trade Regime F. Gale, 1998-10-14 Gale explains why international negotiations have not produced a sustainable solution to tropical rainforest degradation Using an innovative critical approach to international regimes the author analyzes the structure and operation of the International Tropical Timber Organization ITTO He shows how the timber industry and producing and consuming country governments created a blocking alliance that favoured developmentalist interests and ideas The ITTO bolstered this alliance by permitting environmentalists merely to voice but not to negotiate their concerns
