It includes examples from both developed and developing nations as well as data and trends from these countries offering a broad arena of study. Key features of this innovative text include topics new to media economics texts such as finance and investment, labor and social aspects, accessible discussion of complicated concepts and their application to media industries, new directions for both theoretical and methodological areas. With the media industries in an ongoing state of change and transformation, The Media Economy offers new reference points for the field to consider when defining and analyzing media markets. out of the Great Crash of 2008 would all have been hard at any time. They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries, extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model. China's economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits. This year's Update explores the challenge of the slowdown in growth and the change in economic structure. Leading experts on China's economy and environment review change within China's new model of growth and its interaction with ageing, environmental pressure, new patterns of urbanisation and debt problems at different levels of government. It illuminates some new developments in China's economy including the transformational potential of internet banking and the dynamics of financial market instability. China's economic development since 1978 is full of exciting change and this year's China Update is again the way to know it as it is happening.
