Economie Et Sociata Dans La France De Louest Du Moyen Age Aux Temps Modernes:

La France à l'époque moderne - 5e éd. Guy Saupin, 2024-10-09 Comprendre la France d'Ancien Régime implique de se distancier de réflexes mentaux trop contemporains. L'état moderne se construit dans une économie pré industrielle entraînée par le commerce des produits agricoles dans une société où les libertés sont longtemps confondues avec les privilèges des ordres sociaux et dans une culture largement vivifiée par la religion. La formation de l'état nation est l'œuvre d'une monarchie sacralisée perspective absolutiste où le souverain ne parvient pas à adapter la redéfinition de la nation au siècle des Lumières. Après un lent dégageant des conceptions féodales la monarchie n'est pas capable de maîtriser la question du pluralisme religieux ni d'imposer une réforme progressive de la société pour en tirer une fiscalité à la hauteur de ses ambitions. Le refus politique d'association de la nation à la gestion de l'état longtemps maîtrisé grâce à l'attachement des lites au partage financier des ressources de l'état fort finit par asphyxier la monarchie lorsque l'enlisement des réformes se paie par la faillite. Pour cerner la vraie nature de l'absolutisme français de sa naissance à sa crise ultime huit chapitres thématiques replacent l'état royal dans son environnement géographique économique social religieux et culturel. Trois chapitres dégagent ensuite les caractéristiques essentielles de chaque siècle enfin des synthèses approfondissent quelques questions fondamentales pour l'histoire de la France moderne.

Contemporary Monastic Economy Isabelle Jonveaux, 2023-06-02 This book examines the economy of contemporary Catholic monasticism from a sociological perspective considering the ways in which monasteries engage with the capitalist world economy via a model which aims less at performance per se than at the fulfilment of human and religious values Based on fieldwork across several countries in Europe Africa and South America it explores not only the daily work and economy in monastic communities in their tensions with religious life but also the new interest from society in monastic products or monastic management With attention to present trends in monastic economy including the growth of ecology and the role of monasteries in the social and economic development of their localities the author demonstrates that monastic economy consists not solely in the subsistence of religious communities outside the world but in economic activity that has a real impact on its local or even more global environment in part through transnational networks of monasteries As such Contemporary Monastic Economy A Sociological Perspective will appeal to scholars of religious studies and sociology with interests in contemporary monasticism

Medieval Agriculture, the Southern French Countryside, and the Early Cistercians Constance H. Berman, 1986

Histoire & sociétés rurales, 2005

Governments of the Universitates Fabrizio Titone, 2009

As part of his study of the urban history of the Aragonese crown Titone examines the transformation of civic institutions in Sicilian cities during the 1300s and 1400s and analyzes the seats of power the people who wielded power and the channels and mechanisms through which it was mediated He covers the establishment of Aragonese rule the polycentric system of cities from the time of Martin I to Alphonso V urban magistracies in the Alphonsian period financial and fiscal policy during the reign of Alphonso V and socio professional groups and electoral competition from the time of Martin I to Alphonso V *Lordship in France, 1500-1789* James Lowth Goldsmith, 2005 This book the final installment of a two volume history of French lordship examines the role of lordship in old regime society the internal structures and administration of lordship including the seigneurial dues domain farms forests and common lands and serfdom and seigneurial justice In addition the book reviews the regional patterns of lordship and concludes with an examination of lordship from 1770 to 1789 the years immediately preceding the French Revolution Les marins de la Loire dans le commerce maritime nantais au XVIIIe siècle Murielle Bouyer, 2009

Between Crown and Community Hilary Bernstein, 2004 The sixteenth century was an important period of transition in France in which antagonistic religious beliefs led to prolonged civil wars and a growing state apparatus competed with medieval notions of political authority and the social order Poitiers a mid-sized provincial capital actively experienced these tensions Early known as a center of Reformed belief it became a stronghold of ultra Catholic sentiment by 1575 In examining sixteenth century Poitiers Hilary J Bernstein argues that civic governments and the French monarchy enjoyed a mutually beneficial and reinforcing relationship rather than an antagonistic one that disparate urban groups shared a political language for defining the identity and interests of the city that helped to balance the exclusive nature of urban government and that French provincial cities did not suffer inevitable decline at the hands of the developing state but instead continued to help define the nature of early modern political culture Though Poitiers continued to celebrate the traditions and institutions of local rule it sought throughout the century to maintain a strong bond with the monarchy Bernsteins meticulous research in the rich archives of Poitiers allows her to analyze early modern rhetorical culture and reveal the processes of daily decisionmaking Using contemporary printed sources she compares Poitiers to other cities and draws general conclusions about royal policies toward provincial cities *Between Crown and Community* illustrates in precise and sometimes dramatic fashion the actual performance of politics the interaction of political identities rhetorical strategies and ritual practices with the civic traditions of the premodern urban world **Working with Limestone** Vibeke Olson, 2017-05-15 This new volume in the AVISTA series focuses on the study of medieval limestone As the principal building material in the Middle Ages and a prized medium for architectural sculpture limestone played a significant role in medieval artistic manufacture The choice of material inherently informed the final product thus understanding the material and its uses gives

insight into the medieval creative process and the production driven choices that were made by masons and sculptors Quality limestone was a highly sought after commodity that was often shipped across great distances yet in other instances masons made do with locally available resources Through an intensive study of medium many broader topics can be addressed for instance the economics of medieval construction the artistic process or the application of modern technology in understanding and preserving medieval buildings and sculpture The papers collected in this volume present the depth and scope of recent scholarship in the field through a wide ranging overview of the state of the discipline of medieval stone studies They address such methodological approaches to the study of limestone as the use of neutron activation analysis to determine quarries of origin issues of labor and transportation as well as issues faced in the cleaning and conservation of limestone This volume is the first comprehensive study in English that investigates limestone as an essential component of large scale medieval artistic production and as such it is a valuable resource for both students and scholars in the field

Agricultural and Pastoral Landscapes in Pre-Industrial Society Fèlix Retamero, Inge Schjellerup, Althea Davies, 2014-12-01

Through a series of case studies this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre industrial communities in the construction of varied landscapes and cultural heritage Landnam from the Old Norse for taking of land deals with colonization including the drivers and processes through which colonizers developed an understanding of the productive potential and limitations of their new lands Fields and field systems Field walls are a distinctive and apparently timeless characteristic of many pre industrial farming landscapes but they present many the challenges to their study such as the effects of plowing abandonment and land use change and of urban development in fertile lowland zones which may eradicate reduce or conceal past systems of land use and division The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modeling approaches emphasized Agro pastoralism focuses on the complex time space adaptations devised for managing cultivation and livestock production particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources The contributions focus on mountainous areas where temporary migrations in the form of transhumance provided access to a diversity of resources based around seasonal constraints on their availability and productivity **La Nature et le roi** Patrick

Boucheron, Jean-Pierre Devroey, 2019-09-04 Le règne de Charlemagne est un moment politique fondateur qui marque pour nous la construction des institutions locales de l'Europe chrétienne Revenant sur cet épisode clé de l'histoire européenne Jean Pierre Devroey en tire des réflexions très actuelles Et si la réinvention carolingienne du pouvoir et le désir de refonder les lois avaient eu affaire avant tout avec la croissance démographique et la menace de la faim Et si cette histoire vieille de douze siècles

pouvait clarifier le monde d'aujourd'hui. Des siècles durant les sociétés européennes eurent en effet affronter des calamités naturelles meurtrières. Confrontant les textes anciens et les découvertes de l'archéologie, l'immense bibliographie rassemblée sur les dynamiques environnementales qu'il s'agisse de climatologie, de biologie ou de paléocologie, Jean-Pierre Devroey parvient à faire revivre la peur de l'effondrement qui hanta les sociétés européennes du haut Moyen Âge et l'extraordinaire effort créatif qui permit leur résilience. L'heure où notre société est en proie à l'inquiétude environnementale, il offre une leçon de prudence et d'optimisme. Professeur à l'Université libre de Bruxelles et membre de l'Académie royale de Belgique, Jean-Pierre Devroey est un spécialiste des sociétés du haut Moyen Âge.

Concise Biographical Companion to Index Islamicus Wolfgang Behn, 2004-09-01. This first of the ultimately three volumes Who's Who in Islamic Studies presents the scholarly world at long last with its own biographical encyclopaedia. Taking as a starting point the inventory of authors from the renowned Index Islamicus, the author Wolfgang Behn, Berlin, has systematically collected numerous data on the lives and works of the tens of thousands of authors listed in the Index Islamicus from 1665 to 1980. This Biographical Companion will be an indispensable reference tool for the serious student and scholar of Islamic Studies. It enables the user to quickly gain knowledge on the life work and professional background of almost every major and minor author and thus to place each author in his/her proper perspective. A tremendous achievement and a true must for every library.
