The Economy of Early Renaissance Europe, 1300-1460 Harry A. Miskimin, 1975-09-05 Harry A Miskimin examines the economic structure of early Renaissance Europe in 1300 1460 **The Economy of Early [& Later] Renaissance Europe** Harry A.. Miskimin, 1975 **The European Reformation** Euan Cameron, 2012-03-01 Since its first appearance in 1991 The European Reformation has offered a clear integrated and coherent analysis and explanation of how Christianity in Western and Central Europe from Iceland to Hungary from the Baltic to the Pyrenees splintered into separate Protestant and Catholic identities and movements Catholic Christianity at the end of the Middle Ages was not at all a uniformly decadent or corrupt institution it showed clear signs of cultural vigour and inventiveness However it was vulnerable to a particular kind of criticism if ever its claims to mediate the grace of God to believers were challenged Martin Luther proposed a radically new insight into how God forgives human sin In this new theological vision rituals did not purify people priests did not need to be set apart from the ordinary community the church needed no longer to be an international body For a critical Reformation moment this idea caught fire in the spiritual political and community life of much of Europe Lay people seized hold of the instruments of spiritual authority and transformed religion into something simpler more local more rooted in their own community So were born the many cultures liturgies musical traditions and prayer lives of the countries of Protestant Europe This new edition embraces and responds to developments in scholarship over the past twenty years Substantially re written and updated with both a thorough revision of the text and fully updated references and bibliography it nevertheless preserves the distinctive features of the original including its clearly thought out integration of theological ideas and political cultures helping to bridge the gap between theological and social history and the use of helpful charts and tables that made the original so easy to use **An Economic History of Medieval Europe** Norman John Greville Pounds, 2014-06-06 A clear and readable account of the development of the European economy and its infrastructure from the second century to 1500 Professor Pounds provides a balanced view of the many controversies within the subject and he has a particular gift for bringing a human dimension to its technicalities He deals with continental Europe as a whole including an unusually rich treatment of Eastern Europe For this welcome new edition the first in twenty years text and bibliography have been reworked and updated throughout and the book redesigned and reset [An Austrian Perspective on the History of Economic Thought](#) Murray Newton Rothbard, **The Cambridge History of China** Denis Crispin Twitchett, John King Fairbank, 1978 International scholars and sinologists discuss culture economic growth social change political processes and foreign influences in China since the earliest pre dynastic period *Italy's Many Diasporas* Donna R. Gabaccia, 2013-10-18 Italy's residents are a migratory people Since 1800 well over 27 million left home but over half also returned home again As cosmopolitans exiles and workers of the world they transformed their homeland and many of the countries where they worked or settled abroad But did they form a diaspora Migrants maintained firm ties to native villages cities and families Few

felt much loyalty to a larger nation of Italians Rather than form a nation unbound the transnational lives of Italy s migrants kept alive international regional cultures that challenged the hegemony of national states around the world This ambitious and theoretically innovative overview examines the social cultural and economic integration of Italian migrants It explores their complex yet distinctive identity and their relationship with their homeland taking a comprehensive approach

The Sovereign State and Its Competitors Hendrik Spruyt, 2020-05-05 The present international system composed for the most part of sovereign territorial states is often viewed as the inevitable outcome of historical development Hendrik Spruyt argues that there was nothing inevitable about the rise of the state system however Examining the competing institutions that arose during the decline of feudalism among them urban leagues independent communes city states and sovereign monarchies Spruyt disposes of the familiar claim that the superior size and war making ability of the sovereign nation state made it the natural successor to the feudal system The author argues that feudalism did not give way to any single successor institution in simple linear fashion Instead individuals created a variety of institutional forms such as the sovereign territorial state in France the Hanseatic League and the Italian city states in reaction to a dramatic change in the medieval economic environment Only in a subsequent selective phase of institutional evolution did sovereign territorial authority prove to have significant institutional advantages over its rivals Sovereign authority proved to be more successful in organizing domestic society and structuring external affairs Spruyt s interdisciplinary approach not only has important implications for change in the state system in our time but also presents a novel analysis of the general dynamics of institutional change

The Measure of Civilization Ian Morris, 2014-02-23 A groundbreaking look at Western and Eastern social development from the end of the ice age to today In the past thirty years there have been fierce debates over how civilizations develop and why the West became so powerful The Measure of Civilization presents a brand new way of investigating these questions and provides new tools for assessing the long term growth of societies Using a groundbreaking numerical index of social development that compares societies in different times and places award winning author Ian Morris sets forth a sweeping examination of Eastern and Western development across 15 000 years since the end of the last ice age He offers surprising conclusions about when and why the West came to dominate the world and fresh perspectives for thinking about the twenty first century Adapting the United Nations approach for measuring human development Morris s index breaks social development into four traits energy capture per capita organization information technology and war making capacity and he uses archaeological historical and current government data to quantify patterns Morris reveals that for 90 percent of the time since the last ice age the world s most advanced region has been at the western end of Eurasia but contrary to what many historians once believed there were roughly 1 200 years from about 550 to 1750 CE when an East Asian region was more advanced Only in the late eighteenth century CE when northwest Europeans tapped into the energy trapped in fossil fuels did the West leap ahead Resolving some of the biggest debates in global history The Measure of Civilization puts forth

Venice as the Polity of Mercy Richard MacKenney,2018-12-21 This study re examines Venice s political economy from the viewpoint of its ordinary people or popolani who despite the commonly held view that they were excluded from political life by the nobility or nobili actually organized and ran for themselves hundreds of corporations within the city state Mercy was central to this popolani s Christian values and those who offered mercy to their fellow men and women in temporary hardship were investing in the expectation of reciprocity in their own time of need Beginning by tracing a formative linking of religion economy and polity from the thirteenth to the fifteenth centuries Venice as the Polity of Mercy then chronicles the collapse of this triad during the struggles between church and state in the mid sixteenth and seventeenth centuries followed by a revitalizing reconnection of economy and polity within a different religious climate after the plague of 1630 As such Richard Mackenney s book offers up a revitalized image of Renaissance Venetian society as dynamic rather than static as well as a new understanding of the city s significance through a reconfiguration of its history and artwork Crises and

Transformation in the Mediterranean World Jordi Catalan Vidal,2023-08-16 This edited collection presents an economic history of Catalonia and its economic crises from Roman times to the political difficulties of the present day It considers how the strong identity of the Catalan people has been reinforced in critical episodes such as the commercial revolution of the Late Medieval Age the 1640 rebellion the Succession War of 1705 1714 the industrial revolution of the eighteenth and nineteenth centuries and the strong repression during early Francoism The book also explores how historical parallels from Catalonia s past might shed light on the long term consequences of the Great Recession of 2007 9 and recovery in the EU showing how the typical Mediterranean approach of adjusting to crises by depreciating currencies and expanding public deficits has been less straightforward during the most recent financial crisis A particularly deep slump has contributed to fostering the claim for independence of Catalonia in recent times echoing larger dissatisfaction with EU monetary policy With

a comprehensive overview of major events in Catalonian economic history and their broader implications to European political economy and development this book will be of interest to students and academics in economic history social history and monetary economics Structures and Assertions Thomas Allan Brady,Heiko Augustinus Oberman,James D. Tracy,1993-12-31 Vol 1 **Social Justice in the Ancient World** K D Irani,Morris Silver,1995-10-18 This edited collection focuses on the problem of social justice or more particularly how the demand for social justice was articulated and implemented in ancient civilizations including from east to west the Chinese Indian Iranian Babylonian Assyrian Israelite Egyptian Greek and Roman These essays are supplemented by discussions of the functioning of social justice in early and medieval Islam and in the postmedieval Anglo Saxon world The volume contains extended discussions of specific legal regulations royal edicts and socioeconomic practices in the various civilizations and examinations of their social political and economic consequences Written by leading scholars in their respective fields this volume will be of great interest to researchers dealing with the ancient world and the evolution of political philosophy and legal and economic rights

Commerce Before Capitalism in Europe, 1300-1600 Martha C. Howell,2010-04-12 Later generations have sometimes found such actions perplexing often dismissing them as evidence that business people of the late medieval and early modern worlds did not fully understand market rules **Zecca** Alan M. Stahl,2003-04-01 Winner of the Professional Scholarly Publishing Award in Economics from the Association of American Publishers Within a few months of assuming the position of curator of medieval coins at the American Numismatic Society in 1980 Alan M Stahl was presented with a plastic bag containing a hoard of 5 000 recently discovered coins most of which turned out to be from medieval Venice The course of study of that hoard and a later one containing more than 14 000 coins led him to the Venetian archives where he examined thousands of unpublished manuscripts To provide an even more accurate account of how the Zecca mint operated in Venice in the thirteenth through fifteenth centuries Stahl commissioned scientific analyses of the coins using a variety of modern techniques uncovering information about their content and how they had been manufactured The resulting book *Zecca The Mint of Venice in the Middle Ages* is the first to examine the workings of a premodern mint using extensive research in original documents as well as detailed study of the coins themselves The first of the book s three sections traces the coinage of Venice from its origins in the ninth century as a minor and unofficial regional Italian coinage to its position at the dawn of the Renaissance as the dominant currency of Mediterranean trade The second section entitled *The Mint in the Life of Medieval Venice* illustrates the mechanisms of the control of bullion and the strategies for mint profit and explores the mint s role in Venetian trade and the emergence of a bureaucratized government The third section *Within the Mint* examines the physical operations that transformed raw bullion into coins and identifies the personnel of the mint situating the holders of each position in the context of their social and professional backgrounds Illustrated with photos of Venetian coinage from the world s major collections *Zecca* also includes a listing of all holders of offices related to the medieval Venetian mint and

summaries of all major finds of medieval Venetian coins **The Ship in the Medieval Economy, 600-1600** Richard W. Unger, 1980-01-01 Political Economy and the Rise of Capitalism David McNally, 2024-06-21

From the Introduction This book challenges the conventional wisdom about classical political economy and the rise of capitalism It is written in the conviction that modern interpretations of political economy have suffered terribly from acceptance of the prevailing liberal view of the origins and development of capitalist society By the liberal account capitalism emerged out of the centuries old competitive activities of merchants and manufacturers in rational pursuit of their individual economic self interest Over time this account claims the persistent activity of these classes developed new forms of wealth and productive resources and new intellectual and cultural habits which eroded the existing structure of society The rise of capitalism is thus explained in terms of the rise to prominence of the most productive rational and progressive social groups merchants and manufacturers Not surprisingly classical political economy came to be seen as an intellectual reflection of the ascendance of merchants and manufacturers and as a theoretical justification of their interests and activities This book argues that capitalism was the product of an immense transformation in the social relationships of landed society and that this fact is crucial to understanding the development of classical political economy Without a radical transformation of the agrarian economy the activities of merchants and manufacturers would have remained strictly confined By no inexorable logic of their own were mercantile and industrial activities capable of fundamentally transforming the essential relations of precapitalist society Rather the changes in agrarian economy which drove rural producers from their land forced them onto the labour market as wage labourers for their means of subsistence and refashioned farming as an economic activity based upon the production of agricultural commodities for profit on the market established the essential relations of modern capitalism In what follows these processes are described in terms of the emergence of agrarian capitalism This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988
