Ecoregions Of Saskatchewan:

The Ecoregions of Saskatchewan G. A. Padbury, Donald F. Acton, Colette T. Stushnoff, University of Regina. Canadian Plains Research Center, Saskatchewan. Saskatchewan Environment and Resource Management, 1998 This book describes the ecoregions of Saskatchewan following a hierarchical framework for terrestrial ecosystems in Canada The introduction reviews ecological land classification and the various interrelated factors that are involved in the development of ecosystems geology water climate vegetation soils wildlife and human impacts The main section describes the province within the context of the four ecozones and 11 ecoregions that were identified in the framework For each ecoregion the book provides a description of the physical setting such as geology climate as well as the biological features that have developed in response to this physical environment The impact of human activities on the ecology of the area concludes each of these descriptions Appendices include lists of animal plant species found in Saskatchewan and a glossary

Ecological Classification of Saskatchewan's Mid-boreal Ecoregions Using Resource Maps and Aerial Photographs John David Beckingham, Ian George William Corns, V. A. Futoransky, Northern Forestry Centre (Canada), 1999 This guide has been developed to provide insight in applying ecological information to classify and map forest land in mid boreal Saskatchewan It begins with an overview of the province's ecological classification system and a review of the five types of information sources of ecological information It then describes the four steps used to determine the ecosite phase level of a site from aerial photographs and associated sources Section 5 contains keys to identifying the ecosite phase through the interpretation of resource information Section 6 provides five examples of typical toposequences found in mid boreal regions of Saskatchewan Each example includes an aerial photo stereogram of the selected area an example transect a forest inventory and soil survey maps of the area and interpreted landscape profile and summary tables The final sections include references and a glossary Appendices include lists of ecological units and soil types information on the ecology identification of tree species and soil classification information

Wetland Environments James S. Aber, Firooza Pavri, Susan W. Aber, 2012-08-24

Wetlands swamp marsh bayou tundra and bog are places that are rarely visited and often misunderstood but they have in fact conspicuous roles in the physical biological and cultural geography of the world They are intrinsically beautiful environments where one may see the natural and essential values in the interaction of water soil vegetation wildlife and humans Wetlands occur at the confluence of unique terrestrial hydrological and climatic conditions that give rise to some of the most biodiverse regions of the world They also play vital roles in the cycling and storage of key nutrients materials and energy through the Earth's system A complete study of wetland environments requires the assessment of their physical and

biological attributes properties and functions of these ecosystems and the economic political and social aspects that mediate their use globally A systems approach is taken throughout this book which emphasizes the interactions between these elements of wetland ecosystems Moreover selected case studies from across the world are used to illustrate wetland characteristics and circumstances This book is intended to foster a greater awareness and appreciation of wetlands promote a culture of conservation and wise management and spread the knowledge that wetlands are important indeed crucial elements of the global environment Our attempts to understand manage and enhance wetlands in the twenty first century are part of the larger effort to maintain a sustainable Earth Readership Introductory or intermediate level undergraduates taking courses on wetland environments Additional resources for this book can be found at www.wiley.com/go/aberwetland

Transcending Boundaries Rabel J. Burdge, 2001-04 A compilation of abstracts of papers presented at the 8th International Symposium on Society and Resource Management held June 17-22 2000 The abstracts explore the social dimensions of managing spatial landscapes for various purposes The theme of the symposium Transcending Boundaries Natural Resource Management from Summit to Sea provided participants with the opportunity to explore the challenges of working across conceptual cultural and physical boundaries The symposium focused on how social science research is being brought to bear on the exploration of boundary issues in resource management *Terrestrial Ecoregions of North America* Taylor H. Ricketts, 1999 Lauded in the New York Times science section as a sweeping analysis of the ecosystems of the United States and Canada this volume represents an unparalleled source of information and data for scientists and conservationists working in North America Using a rigorous ecoregion based approach rather than the more common state by state analysis a team of scientists from World Wildlife Fund has produced a stunning and comprehensive assessment of the current status of biodiversity in North America north of Mexico *Terrestrial Ecoregions of North America* begins with six chapters that present the rationale for the ecoregion approach describe the biological distinctiveness of North American ecoregions assess the level of threats facing each present a conservation agenda for the next decade and set forth recommendations for preserving and restoring biodiversity In addition nineteen essays by leading scientists address specific topics such as the effect of cattle on riparian areas and the problem of invasive exotic plant species Following the main text are substantial appendixes that describe each ecoregion in detail including information on unique features of the ecoregion that set it apart from the others its biological distinctiveness threats to habitats and wildlife and important sites for conservation activities that enhance biodiversity conservation in the ecoregion conservation partners working in the ecoregion including addresses and other contact information the relationship of the ecoregion to other classification schemes literature cited for that ecoregion One of the most useful and unique features of the book is the series of thirty full color maps that present essential information about the ecoregions and the biodiversity they contain in a compelling and easily understood graphical format The ecoregion based approach has been adopted by many conservation groups as the most

effective way to ward off massive losses of biodiversity and this volume provides a road map to that important new strategy With a significant number of previously unpublished data sets and new analytic approaches Terrestrial Ecoregions of North America is both a guidebook for describing the biological wealth of the continent and a handbook for restoring and conserving it It will be an essential reference for anyone concerned with biodiversity conservation in North America
