Ecovillages A Practical Guide To Sustainable Communities:

Ecovillages Jan Martin Bang, 2005-09-01 A unique combination of permaculture design and ecovillage planning with examples from around the world

Permaculture Craig Gibsone, Jan Martin Bang, 2015-06-22 Permaculture design as divine creative activity Permaculture looks for the patterns embedded in our natural world as inspirations for designing solutions to the many challenges we are presented with today It is a philosophical spiritual and practical approach to the use of the land integrating microclimate functional plants animals soils water management and human needs into intricately connected highly productive systems In essence permaculture uses observation as basis for creating sustainable and effective human settlements The authors discuss the components Earthshare Fairshare and Peoplecare with a specific emphasis on the spiritual aspects of the design process Topics range from soil and plants energy sources and house design to alternative economics group process governance and spiritual nurturing and enquiry Examples of existing permaculture structures from around the world most notably from the Findhorn Community Eco Village bring the concepts to life First hand accounts of how people got started on their permaculture project lend a personal touch The first book to look at the spiritual aspects as well as the practical implementation of permaculture design

Eco-Aesthetics Malcolm Miles, 2014-05-08 By moving beyond traditional aesthetic categories beauty the sublime the religious Eco Aesthetics takes an inter disciplinary approach bridging the arts humanities and social sciences and explores what aesthetics might mean in the 21st century It is one in a series of new radical aesthetics promoting debate confronting convention and formulating alternative ways of thinking about art practice There is no doubt that the social and environmental spheres are interconnected but can art and artists really make a difference to the global environmental crisis Can art practice meaningfully contribute to the development of sustainable lifestyles Malcolm Miles explores the strands of eco art eco aesthetics and contemporary aesthetic theories offering timely critiques of consumerism and globalisation and ultimately offers a possible formulation of an engaged eco aesthetic for the early 21st century

Environmental Policy is Social Policy - Social Policy is Environmental Policy Isidor Wallimann, 2014-07-08 This book argues that social and environmental policy should be synthetically treated as one and the same field that both are but two aspects of the same coin if sustainability is the goal Such a paradigm shift is indicated important and timely to effectively move towards sustainability This book is the first to take this approach and to give examples for it Not to synthetically merge the two fields has been and will continue to be highly insufficient inefficient and contradictory for policy and public administration aiming for a transformation towards a sustainable world In general social problems are dealt with in one policy corner and environmental problems in another Rarely is social policy at large concerned with its impact on the environment or its connection with and relevance to environmental policy Equally environmental problems are generally not seen in conjunction with social policy even though much environmental policy directly relates to health nutrition migration and other issues addressed by social

policy This book intends to correct the pattern to separate these very significant and large policy fields Using examples from diverse academic and applied fields it is shown how environmental policy can and should be thought of as social policy and how social policy can and should simultaneously be seen as environmental policy Tremendous benefits are to be expected

Ecomuseums 2nd Edition Peter Davis,2011-06-02 **Utopianism: A Very Short Introduction** Lyman Tower

Sargent,2010-09-23 One of the leading scholars in the field of utopian studies examines utopianism and its history publisher description **Ecopsychology** Peter H. Kahn, Jr.,Patricia H. Hasbach,2012-07-20 An ecopsychology that integrates our totemic selves our kinship with a more than human world with our technological selves We need nature for our physical and psychological well being Our actions reflect this when we turn to beloved pets for companionship vacation in spots of natural splendor or spend hours working in the garden Yet we are also a technological species and have been since we fashioned tools out of stone Thus one of this century s central challenges is to embrace our kinship with a more than human world our totemic self and integrate that kinship with our scientific culture and technological selves This book takes on that challenge and proposes a reenvisioned ecopsychology Contributors consider such topics as the innate tendency for people to bond with local place a meaningful nature language the epidemiological evidence for the health benefits of nature interaction the theory and practice of ecotherapy Gaia theory ecovillages the neuroscience of perceiving natural beauty and sacred geography Taken together the essays offer a vision for human flourishing and for a more grounded and realistic environmental psychology **Urban Utopias** Malcolm Miles,2007-11-21 Utopia tends to generate a bad press regarded as impracticable perhaps nostalgic or contradictory when visions of a perfect world cannot accommodate the change that is necessary to a free and self organizing society But people from diverse backgrounds are currently building a new society within the old balancing literal and metaphorical utopianism and demonstrating plural possibilities for alternative futures and types of settlement Thousands of such places exist around the world including intentional communities eco villages permaculture plots religious and secular retreats co housing projects self build schemes projects for low impact housing and activist squats in urban and rural sites This experience suggests however that when planning and design are not integral to alternative social formations the modern dream to engineer a new society cannot be realized The book is structured in four parts In part one literary and theoretical utopias from the early modern period to the nineteenth century are reconsidered Part two investigates twentieth century urban utopianism and contemporary alternative settlements focusing on social and environmental issues activism and eco village living Part three looks to wider horizons in recent practices in the non affluent world and Part four reviews a range of cases from the author s visits to specific sites This is followed by a short conclusion in which a discussion of key issues is resumed This book brings together insights from literary theoretical and practical utopias drawing out the characteristics of groups and places that are part of a new society It links today s utopian experiments to historical and literary utopias and to theoretical problems in utopian thought *Eco-Homes* Doctor Jenny

Pickerill,2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us

Communes in America, 1975-2000 Timothy Miller,2019-03-26 Communes in America 1975 2000 is the final volume in Miller s trilogy on the history of American intentional communities Providing a comprehensive survey of communities during the last quarter of the twentieth century Miller offers a detailed study of their character scope and evolution Between 1975 and 2000 the American communal experience evolved dramatically in response to social and environmental challenges that confronted American society as a whole Long accepted social norms and institutions family religion medicine and politics were questioned as the divorce rate increased interest in spiritual teachings from Asia grew and alternative medicine gained ground Cohousing flourished as a response to an increasing sense of alienation and a need to balance community and private lives At the same time Americans became increasingly concerned with environmental protection and preservation of our limited resources In the face of these social changes communal living flourished as people sought out communities of like minded individuals to pursue a higher purpose Organized topically each chapter in the volume provides basic information about various types of communities and detailed examples of each type from ecovillages and radical Christian communities to pagan communes and cohousing experiments Miller also takes a step back to look at the prevalence of communal living in American life over the twentieth century Based on exhaustive research Miller s final volume provides an indispensable survey and guide to understanding utopianism s enduring presence in American culture

The Tiny House Movement Tracey Harris,2018-10-15 The Tiny House Movement Challenging Consumer Culture features in depth interviews with movement residents builders and advocates as well as the author s insights from her fieldwork of living tiny In it we learn how the movement is challenging consumerism overwork and environmental destruction and facilitating a more meaningful understanding of home This book highlights that the tiny house movement is more than a lifestyle choice and that the movement challenges the consumerist lifestyle In Canada and the United States we are taught that bigger is better and that constant growth in our personal wealth accumulation and in the economy is a sign of our success We sacrifice well being and life satisfaction because of our relationship with stuff This leads to personal debt and unsustainability in our relationships communities and the environment This is the first book to examine

the tiny house movement as a challenge to consumer culture by demonstrating its potential to offer individual collective and societal change

The Communal Idea in the 21st Century, 2012-09-28

The idea of a better society as associated with the communal idea is investigated from both theoretical perspectives and through contemporary experiences around the world This idea leaves nobody indifferent Whatever the hardship that its concretization implies however once it does materialize it cannot as such avoid new challenges tensions and unexpected claims This means at varying degrees negations of and removals from the utopian inspiration Humans are able to create unprecedented conditions of life under most ambitious inspirations but are unable to safeguard their achievements from change alterations and contradictions In this however another aspect of the utopian realizations is that they ultimately leave room for new utopist thinking and enrolment As far indeed the utopian inspiration draws its vitality from potent civilizational codes its renewal from ashes is as unavoidable as its self betrayal through materialization Contributors included Eliezer Ben Rafael Rami Degany Amitai Etzioni Maria F lling Albers Yiftah Goldman Ruth Kark Yossi Katz John Lehr Graham Meltzer Bill Metcalf Timothy Miller Yaacov Oved Michal Palgi Donald E Pitzer Shulamit Reinharz Lyman Tower Sargent Gy rgy Sz ll Menachem Topel Katherine Trebeck and Chris Warhurst
