**Law Enforcement and the Fight Against Methamphetamine** United States. Congress. House. Committee on Government Reform. Subcommittee on Criminal Justice, Drug Policy, and Human Resources, 2005

The Political Economy of Narcotics Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug

trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America's strategic interest. As a result, US policy approaches emerge as a decisive factor in accounting for the failure of prohibition.

Amphetamines and Ecstasy, 2008      **The Pope's Children** David McWilliams, 2011-01-11 Named for the ironic coincidence of the Irish baby boom of the 1970s which peaked nine months to the day after Pope John Paul II's historic visit to Dublin, *The Pope's Children* is both a celebration and a biting, funny portrait of the first generation of the Celtic Tiger, the beneficiaries of the economic miracle that propelled Ireland from centuries of deprivation into a nation that now enjoys one of the highest living standards in the world.      **International Drug Control Into the 21st Century** Hamid Ghodse, 2008 Providing a comprehensive analysis of drug misuse, dependence, and the ways in which different parts of the world have responded to these problems, this volume examines aspects of the contemporary drug problem, the related debate, and the way in which society is responding to it.      David McWilliams' The Pope's Children David McWilliams, 2005-11-15 Meet *The Pope's Children*, the beneficiaries of the 'Wonderbra Economics' of the Irish baby boom of the 1970s that peaked nine months to the day after the Pope's visit. There are 620,000 of them squeezed into the middle and lifted up by the 'Expectocracy'. Ireland is blurring. Out of this haze has come the 'Full on Nation', the most hedonistic generation ever. David McWilliams' brilliant research and analysis of Ireland is a celebration of success. In an easy-to-read style, he takes us to 'Deckland', that suburban state of mind where you will find the Kells Angels, Breakfast Roll Man, Low GI Jane, and RoboPaddy. Come face-to-face with the 'You're a Star' generation, Billy Bunker, fair trade Frank, Carrot Juice Contrarians, and Bouncy Castle Brendan. We also meet the HiCos, Hibernian Cosmopolitans, the new elite whose distance from Deckland is measured by appreciations and cultivations that Deckland's rampant credit just can't buy. Entertaining and informative, *The Pope's Children* tells of the vast surge of ambition, money, optimism, and hope in Ireland during the boom.      **Drugs and Contemporary Warfare** Paul Rexton Kan, 2009 The relationship between drugs and today's wars has grown more noticeable since the end of the Cold War and will likely gather strength in this era of increased globalization. Many violent groups and governments have recently turned to illicit narcotics in their entrepreneurial quests to stay viable in the post-Cold War world. It is no coincidence that many of the most violent and ongoing conflicts, from the Balkans to the Hindu Kush, from the Andes to the Golden Triangle, occur in areas of widespread drug production and well-traveled distribution routes. Interdisciplinary in its approach, *Drugs and Contemporary Warfare* investigates the convergence of drugs and modern warfare, the violent actors involved in the drug trade, the drugs they produce and distribute, and how these drugs enter into battlefield conflicts and give rise to combat narcosis. Paul Rexton Kan then examines counternarcotics operations and suggests solutions to curb the drug trade's effects on contemporary conflict. He offers several broad strategies that refine assessments, policies, and operations to promote improvement in social, economic, and political conditions. The hope is that these strategies will help citizens create sustainable societies and robust governments in war-afflicted countries struggling under the drug trade's shadow. In a world
