**Landscapes of Promise** William G. Robbins, 2009-11-23 *Landscapes of Promise* is the first comprehensive environmental history of the early years of a state that has long been associated with environmental protection. Covering the period from early human habitation to the end of World War II, William Robbins shows that the reality of Oregon's environmental history involves far more than a discussion of timber cutting and land use planning. Robbins demonstrates that ecological change is not only a creation of modern industrial society. Native Americans altered their environment in a number of ways, including the planned annual burning of grasslands and light burning of understory forest debris. Early Euro American settlers who thought they were taming a virgin wilderness were merely imposing a new set of alterations on an already modified landscape. Beginning with the first 18th century traders on the Pacific Coast, alterations to Oregon's landscape were closely linked to the interests of global market forces. Robbins uses period speeches and publications to document the increasing commodification of the landscape and its products. Environment melts before the man who is in earnest wrote one Oregon booster in 1905 reflecting prevailing ways of thinking. In an impressive synthesis of primary sources and historical analysis, Robbins traces the transformation of the Oregon landscape and the evolution of our attitudes toward the natural world.

**The Greening of Sovereignty in World Politics** Karen Litfin, 1998 This is the first book to connect two important subfields in international relations: global environmental politics and the study of sovereignty, the state's exclusive authority within its territorial boundaries. The authors argue that the relationship between environmental practices and sovereignty is by no means straightforward and in fact elucidates some of the core issues and challenges in world politics today. Although a number of international relations scholars have assumed that transnational environmental organizations and institutions are eroding sovereignty, this book makes the case that ecological integrity and state sovereignty are not necessarily in opposition. It shows that the norms of sovereignty are now shifting in the face of attempts to cope with ecological destruction but that this greening of sovereignty is an uneven, variegated, and highly contested process. By establishing that sovereignty is a socially constructed institution that varies according to time and place with multiple meanings and changing practices, *The Greening of Sovereignty in World Politics* illuminates the complexity of the relationship between sovereignty and environmental matters and casts both in a new light.

**Sustaining the Earth** John Young, 1990 Environmental issues, once the benign hobby of the few, have become everyone's urgent concern. As we approach the end of the 20th century and as these issues become more pressing, John Young's tour de force is a welcome, timely assessment of the environmental movement and a call to arms for an effective attack on the problems.
