Emergent Complexity The Evolution Of Intermediate Societies Archaeological Ser No 9:

Darwin and Archaeology John P. Hart, John Edward Terrell, 2002-05-30 The last decades of the 20th century witnessed strongly growing interest in evolutionary approaches to the human past Even now however there is little real agreement on what evolutionary archaeology is all about A major obstacle is the lack of consensus on how to define the basic principles of Darwinian thought in ways that are genuinely relevant to the archaeological sciences Each chapter in this new collection of specially invited essays focuses on a single major concept and its associated key words summarizes its historic and current uses and then reviews case studies illustrating that concept s present and probable future role in research What these authors say shows the richness and current diversity of thought among those today who insist that Darwinism has a key role to play in archaeology Each chapter includes definitions of related key words Because the same key words may have the same or different meanings in different conceptual contexts many of these key words are addressed in more than one chapter In addition to exploring key concepts collectively the book s chapters show the broad range of ideas and opinions in this intellectual arena today This volume reflects and clarifies debate today on the role of Darwinism in modern archaeology and by doing so may help shape the directions that future work in archaeology will take **Emergent Complexity** Jeanne E.

Arnold, 1996-01-01 Household Archaeology on the Northwest Coast Elizabeth A. Sobel, D. Ann Trieu Gahr, Kenneth A. Ames, 2006-07-01 Since the late 1970s household archaeology has become a key theoretical and methodological framework for research on the development of permanent social inequality and complexity as well as for understanding the social political and economic organization of chiefdoms and states This volume is the cumulative result of more than a decade of research focusing on household archaeology as a means to gain understanding of the evolution of social complexity regardless of underlying economy **Subject Guide to Books in Print**, 1991 **Forthcoming Books** Rose Arny, 1996-06

Emergence and Change in Early Urban Societies Linda Manzanilla, 2013-11-11 This book gives an overview of different factors involved in the emergence and change in early urban societies in fourth millennium Mesopotamia and Egypt pre Shang China Classic horizon Central Mexico Oaxaca and the Maya Area and Middle Horizon societies in the Andean Region These factors range from centralized storage and redistributive economies agrarian managerial models mercantile network control conflict and conquest conversion of military commanders into administrators political power through monumental cosmic reproduction and elite power through ideological change It discusses specific archaeological data useful in theoretical construction In the Introduction a discussion of different developmental processes of urban societies is made The Eastern Anatolian example emphasizes the role played by interregional exchange networks linking the Mesopotamian plains with the Syro Anatolian regions The emergence of an elite is related with the control of the movement of craft goods and raw materials more than with the appropriation of subsistence goods The Chinese example stresses the importance of conflict provoked by demographic pressures on resources The Mesoamerican cases relate to vast urban developments and

manufacturing centers ideological importance of monumental planning and changing behavior of elites The Andean cases are related either to the transformation of theocratic leadership into military administrators or to the agricultural intensification model **The Collapse of Complex Societies** Joseph A. Tainter, 1995
