Chicano Educational Achievement Elena Aragon de McKissack, 2014-04-23 First published in 2000 This study compares two urban schools based

on their ability to provide an effective education for Hispanic students Broderick High School began as an elite Anglo dominated institution and evolved into a school whose student body was 82% Hispanic It is large public and with a history of sporadic racial tension walkouts and a high dropout rate for Hispanic students Escuela Tlatelolco is small private and Chicanocentric Founded in 1970 by Rodolfo Corky Gonzales a leader of the Chicano Civil Rights Movement it was designed to provide Chicano students the opportunity to reinforce pride in their language culture and identity Through interviews of administrators teachers graduates and students at both schools as well as personal observations a significant difference was discovered between the experiences and attitudes of those who attended the public school in the 1960s through 1980s and those who graduated in the 1990s As the public school increased Hispanic administration teaching and operating staff and changed its curriculum to include Hispanic history Hispanic students expressed a greater degree of satisfaction and fulfillment Catalog of Copyright Entries. Badillo,2006-06-19 Latin Americans make up the largest new immigrant population in the United States and Latino Catholics are the fastest growing sector of the Catholic Church in America In this book historian David A Badillo offers a history of Latino Catholicism in the United States by looking at its growth in San Antonio Chicago New York and Miami Focusing on twentieth century Latino urbanism Badillo contrasts broad historic commonalities of Catholic religious tradition with variations of Latino ethnicity in various locales He emphasizes the contours of day to day life as well as various aspects of institutional and lived Catholicism The story of Catholicism goes beyond clergy and laity it entails the entire urban experience of neighborhoods downtown power seekers archdiocesan movers and shakers and a range of organizations and associations linked to parishes Although parishes remain the key site for Latino efforts to build individual and cultural identities Badillo argues that one must consider simultaneously the triad of parish city and ethnicity to fully comprehend the

influence of various Latino populations on both Catholicism and the urban environment in the United States By contrasting the development of three distinctive Latino communities the Mexican Americans Puerto Ricans and Cuban Americans Badillo challenges the popular concept of an overarching Latino experience and offers instead an integrative approach to understanding the scope depth and complexity of the Latino contribution to the character of America s urban landscapes

Religion and Education among Latinos in New York City Segundo Pantoja, 2005-09-01 This volume explores the role of religion in the educational achievement of Hispanics In particular it assesses the influence of religion on parental involvement in children s educational experiences The book compares Catholic and Protestant parents opinions and practices against the backdrop of socio economic factors such as levels of income and schooling In its examination of the relationships between family church and school the study explores how religion and other cultural traits such as family structure language and ethnic identity interact and yield particular educational outcomes The study shows that religion can make a positive difference in the education of Latinos Religion is a resource that parents can tap into for the benefit of their children Teachers school administrators policy makers and religious leaders will find this study useful as they strive to understand and change Latinos educational status *Beyond Black and White* Maxine S. Seller, Lois Weis, 1997-03-13 Most contemporary work on education that takes into account differences among students in schools in the United States focuses on African American and white students rather than recognizing the complexity of the current population *Beyond Black and White* opens a discussion of diversity that goes beyond the notion that white or black can be looked at as any kind of homogeneous groupings While numerous studies focus on the ways in which schools privilege some groups of children and marginalize others such work tends to construe differences along a narrowly constructed black white dichotomy *Beyond Black and White* forces the reader to abandon this construction The book encourages the centering of voices often not heard even in volumes whose aim it is to center historically silenced voices The contributors probe the experiences of Familiar Minorities such as African Americans native Americans and Mexican Americans as well as those among Newcomers such as Haitians Dominicans Indians Salvadorians and Vietnamese In the final section Other Minorities are encountered groups struggling for recognition such as lesbians and gays Appalachians and white working class males This interdisciplinary volume stands as vivid testimony to the myriad of voices in today s schools *Latinos and Politics* F.
