*Transhumanist Dreams and Dystopian Nightmares* Maxwell J. Mehlman, 2012-10-01 What will happen when technology allows us to direct our own evolution Transhumanists advocate for the development and distribution of technologies that will enhance human intellectual physical and psychological capacities even eliminate aging What if the dystopian futures and transhumanist utopias found in the pages of science journals Margaret Atwood novels films like Gattaca and television shows like Dark Angel are realized What kind of world would humans have created Maxwell J Mehlman considers the promises and perils of using genetic engineering in an effort to direct the future course of human evolution He addresses scientific and ethical issues without choosing sides in the dispute between transhumanists and their challengers However Transhumanist Dreams and Dystopian Nightmares reveals that radical forms of genetic engineering could become a reality much sooner than many people think and that we need to encourage risk management efforts Whether scientists are dubious or optimistic about the prospects for directed evolution they tend to agree on two things First however long it takes to perfect the necessary technology it is inevitable that humans will attempt to control their evolutionary future and second in the process of learning how to direct evolution we are bound to make mistakes Our responsibility is to learn how to balance innovation with caution

**Millenarian Dreams and Racial Nightmares** John H. Matsui, 2021-05-19 In *Millenarian Dreams and Racial Nightmares* John H Matsui argues that the political ideology and racial views of American Protestants during the Civil War mirrored their religious optimism or pessimism regarding human nature perfectibility and the millennium While previous historians have commented on the role of antebellum eschatology in political alignment none have delved deeply into how religious views complicate the standard narrative of the North versus the South Moving beyond the traditional optimism pessimism dichotomy Matsui divides American Protestants of the Civil War era into premillenarian and postmillenarian camps Both postmillenarian and premillenarian Christians held that the return of Christ would inaugurate the arrival of heaven on earth but they disagreed over its timing This disagreement was key to their disparate political stances Postmillenarians argued that God expected good Christians to actively perfect the world via moral reform of self and society and free labor ideology whereas premillenarians defended hierarchy or racial mastery or both Northern Democrats were generally comfortable with antebellum racial norms and were cynical regarding human nature they therefore opposed Republicans utopian plans to reform the South Southern Democrats who held premillenarian views like their northern counterparts pressed for or at least acquiesced in the secession of slaveholding states to preserve white supremacy Most crucially enslaved African American Protestants sought freedom a postmillenarian societal change requiring nothing less than a major revolution and the reconstruction of southern society *Millenarian Dreams and Racial Nightmares* adds a new dimension to our understanding of the Civil War as it reveals the wartime marriage of political and racial ideology to religious speculation As Matsui argues the postmillenarian ideology came to dominate the northern states during the war years and the nation as a whole following the Union victory in 1865

**Millennial Dreams and Apocalyptic Nightmares** Angela M. Lahr, 2007-10-31 Conservative evangelicals millennial outlook helped to demarginalize the subculture in the Cold War as secular apocalypticism paralleled and sometimes justified the dispensational

worldview The prospect of nuclear warfare especially in the shadow of the Cuban Missile Crisis and the creation of the state of Israel appeared to be direct fulfillment of biblical prophecy The secular apocalypticism that accompanied these developments combined with conservative evangelicals embrace of anticommunism helped to legitimize evangelicalism in the national secular domain This book examines the Americanization of Cold War evangelicalism and argues that these developments led up to the evangelical subculture's expansion with the rise of the New Christian Right

**Law and the Regulation of Medicines** Emily Jackson, 2012-03-01 The principal purpose of this book is to tell the story of a medicine's journey through the regulatory system in the UK from defining what counts as a medicine through clinical trials licensing pharmacovigilance marketing and funding The question of global access to medicines is addressed because of its political importance and because it offers a particularly stark illustration of the consequences of classifying medicines as a private rather than a public good Two further specific challenges to the future of medicine's regulation are examined separately first pharmacogenetics or the genetic targeting of medicines to subgroups of patients and second the possibility of using medicines to enhance well being or performance rather than treat disease Throughout the emphasis is on the role of regulation in shaping and influencing the operation of the medicines industry an issue that is of central importance to the promotion of public health and the fair and equitable distribution of healthcare resources
