High Performance ,1992 *Choreographing Difference* Ann Cooper Albright,2010-06-01 The choreographies of Bill T Jones Cleveland Ballet Dancing Wheels Zab Maboungou David Dorfman Marie Chouinard Jawole Willa Jo Zollar and others have helped establish dance as a crucial discourse of the 90s These dancers Ann Cooper Albright argues are asking the audience to see the body as a source of cultural identity a physical presence that moves with and through its gendered racial and social meanings Through her articulate and nuanced analysis of contemporary choreography Albright shows how the dancing body shifts conventions of representation and provides a critical example of the dialectical relationship between cultures and the bodies that inhabit them As a dancer feminist and philosopher Albright turns to the material experience of bodies not just the body as a figure or metaphor to understand how cultural representation becomes embedded in the body In arguing for the intelligence of bodies *Choreographing Difference* is itself a testimonial giving voice to some important political moral and artistic questions of our time Ebook Edition Note All images have been redacted

Jewish Men and the Holocaust: Sexuality, Emotions, Masculinity Florian Zabransky, 2024-10-21. During the Holocaust amid death and violence Jewish men were not mere powerless victims. Linking gender studies with a history of sexuality and emotions will highlight intimate agency power struggles negotiations of relationships social dynamics and representations of masculinities. Considering the agency and vulnerability will further convey intimate choices the representation of masculine ideals intimate violence and the expression of various emotions such as honour and love. As research on the Holocaust often links women with sexuality or portrays women as gendered beings it is crucial to excavate the intimate hidden lives of Jewish men and their specific intimate experiences as men. The analysis not only demonstrates how Jewish men remember and make sense of their experiences but also how they chose to form the narrative and how they represented their ordeal in four chapters namely ghettos concentration camps Jewish resistance in the countryside and finally DP camps in the aftermath of the Holocaust. The consideration of these four spaces allows a nuanced innovative understanding of the intimate history of Jewish men during the Holocaust i.e. how some men established male dominated structures and established intimate strategies to find solace and pleasure.

The Politics of Emotions, Candidates, and Choices Heather E. Yates, 2016-05-29. Anchored in the idea that political campaigns matter to electoral outcomes *The Politics of Emotions, Candidates and Choices* analyzes the dynamics of emotional voting and decision making over the course of three presidential elections between 2004 and 2012. Each presidential campaign reflects a unique tone and mood which influences voters perceptions of choices and candidate image. Accounting for the idiosyncratic nature of a campaign environment and a candidate s message this analysis isolates specific emotional dimensions that were influential on voters appraisals of specific campaign issues. Relying on the Affective Intelligence theory and the Transfer of Affect thesis to narrate the causal relationships between voters emotional responses and issue appraisals this book illustrates the specific electoral contexts when voters emotions are trusted as political knowledge and transferred to their beliefs about certain policies.

E. Beamish,Pawan K. Singal,Naranjan S. Dhalla,2012-12-06 It has been known or suspected for centuries that there is an association between mind and emotions and the occurrence of heart disease and sudden death During the past fifty years this relationship has become identified with the concept of Stress a notion developed and popularized by Hans Selye In recent

years there has been an upward surge of interest in stress by scientists in several disciplines and by the general public. Although books, journal articles, seminars, and media programs devoted to stress now abound, the definition, manifestations, mechanisms, and management of stress remain uncertain and controversial. In an attempt to clarify the situation, an International Symposium on Stress and Heart Disease was held in Winnipeg, Canada, June 26-29, 1984, and the proceedings form the basis of this book and its companion volume, *Pathogenesis of Stress-Induced Heart Disease*. Although most species which have ever existed are now extinct, through countless millennia the human species has successfully adapted to changing conditions. Stressors such as ice ages, predators, and parasites, wars, famine, and plague, and now it is coping with rapidly changing social, economic, and political circumstances. Such adaptation occurs at all levels of life: at the molecular level within the cell, at the level of the whole cell, in the groups of cells as organs in the entire organism, or individual, and in some cases in the society in which the individual lives.
