Emotions In Command A Naturalistic Study Of Institutional Dominance:

Emotions in Command Frank K. Salter, 2017-09-08 This book is part of a quest for a general theory of organizations valid in all cultures Central to Frank Salter's investigation is the question of social power why people obey their superiors His approach is to locate the nature of organizational power in the behavioral details of hierarchical interactions in the institutional settings in which they occur *Emotions in Command* Frank K. Salter, 1995 **New Aspects of Human**

Ethology Klaus Atzwanger, Karl Grammer, Katrin Schäfer, Alain Schmitt, 2007-11-23 Rough and tumble play provided one of the paradigmatic examples of the application of ethological methods back in the 1970s Since then a modest number of researchers have developed our knowledge of this kind of activity using a variety of methods and addressing some quite fundamental questions about age changes sex differences nature and function of behaviour In this chapter I will review work on this topic mentioning particularly the interest in comparing results from different informants and different methods of investigation Briefly rough and tumble play or R and whose general characteristic is that the behaviours seem to be agonistic but in a non serious playful context The varieties of R but this research had a strong practical orientation and lacked the cross species perspective and evolutionary orientation present in Groos work *Verbal Art Across Cultures* Hubert

Knoblauch, Helga Kotthoff, 2001 *The Reciprocal Modular Brain in Economics and Politics* Gerald A. Cory Jr., 2012-12-06 The present work is an extension of my doctoral thesis done at Stanford in the early 1970s In one clear sense it responds to the call for consilience by Edward O Wilson I agree with Wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences I consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which I choose to call interpersonal behavioral ecology The Ecology as a general field has emerged in the last quarter of the 20th century as a major theme of concern as we have become increasingly aware that we must preserve the planet whose limited resources we share with all other earthly creatures Interpersonal behavioral ecology however focuses not on the physical environment but upon our social environment It concerns our interpersonal behavioral interactions at all levels from simple dyadic one to one personal interactions to our larger even global social economic and political interactions Interpersonal behavioral ecology as I see it then is concerned with our behavior toward each other from the most obvious behaviors of war between nations to excessive competition exploitation crime abuse and even to the ways in which we interact with each other as individuals in the family in our social lives in the workplace and in the marketplace

The Neurophysics of Human Behavior Mark E. Furman, Fred P. Gallo, 2000-06-22 How do brain mind matter and energy interact Can we create a comprehensive model of the mind and brain their interactions and their influences Synthesizing research from neuroscience physics biology systems science information science psychology and the cognitive sciences *The Neurophysics of Human Behavior* advances a unified theory of *Oxford Handbook of Evolutionary Psychology* Robin Ian MacDonald Dunbar, Louise Barrett, 2007 The *Oxford Handbook of Evolutionary Psychology* is the definitive comprehensive

and authoritative text on this burgeoning field With contributions from over fifty experts in the field the range and depth of coverage is unequalled It will be an essential resource for students and researchers in psychology **Relational Models**

Theory Nick Haslam,2004-09-22 This book offers a critical introduction to contemporary relational models theory and illustrates the ways in which it has illuminated a wide range of interpersonal phenomena and stimulated research on individual psychology collective behavior and cult **The Evolution of Human Sociality** Stephen K. Sanderson,2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory

Indoctrinability, Ideology, and Warfare Irenäus Eibl-Eibesfeldt, Frank K. Salter, 1998 Violent ethno nationalist conflicts continue to mar the history of the twentieth century yet no satisfactory answer as to why humans are susceptible to indoctrination by ideologies leading to inter group hostility has thus far been found This volume brings together an international team of leading scientists to address this complex issue from disciplines as diverse as anthropology psychology psychobiology sociology philosophy ethology sociology and political science Treating the processes of indoctrination as a biological phenomenon with physiological and psychological aspects these essays explore the answers to this pressing question in humanity s evolutionary past **Welfare, Ethnicity and Altruism** Frank Salter, 2013-03-07 Welfare Ethnicity and Altruism applies the controversial theory of Ethnic Nepotism first formulated by Irenäus Eibl-Eibesfeldt and Pierre van den Berghe to the modern welfare state both are authors in this volume This theory states that ethnic groups resemble large families whose members are prone to cooperate due to kin altruism Recent empirical findings in economics and political science offer confirmatory evidence The book presents two separate studies that compare welfare expenditures around the world both indicating that the more ethnically mixed a population becomes the greater is its resistance to redistributive policies These results point to profound inconsistencies within ideologies of both left and right regarding ethnicity *Ethnic Conflict and Indoctrination* Irenäus Eibl-Eibesfeldt, Frank K. Salter, 1998 Violent ethno nationalist conflicts continue to mar the history of the current century yet no satisfactory answer to the question of why humans are susceptible to indoctrination by ideologies that lead to inter group hostility has so far been found In this volume an international team of leading scientists from many different fields approach this complex issue from a biological perspective treating indoctrinability as a predisposition that has its roots in humanity s evolutionary past **War in Human Civilization** Azar Gat, 2008-03-26 Why

do people go to war Is it rooted in human nature or is it a late cultural invention How does war relate to the other fundamental developments in the history of human civilization And what of war today is it a declining phenomenon or simply changing its shape In this truly global study of war and civilization Azar Gat sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history from the early hunter gatherers right through to the unconventional terrorism of the twenty first century In the process the book generates an astonishing wealth of

original and fascinating insights on all major aspects of humankind's remarkable journey through the ages engaging a wide range of disciplines from anthropology and evolutionary psychology to sociology and political science Written with remarkable verve and clarity and wholly free from jargon it will be of interest to anyone who has ever pondered the puzzle of war

Food and the Status Quest Polly Wiessner, Wulf Schiefenhövel, 1996 This book brings together contributions from different disciplines to investigate from ethological and anthropological perspectives behaviour that appears to have biological roots such as the tendency to seek status through the medium of food

The Drama of the Commons National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, 2002-02-15 The tragedy of the commons is a central concept in human ecology and the study of the environment It has had tremendous value for stimulating research but it only describes the reality of human environment interactions in special situations Research over the past thirty years has helped clarify how human motivations rules governing access to resources the structure of social organizations and the resource systems themselves interact to determine whether or not the many dramas of the commons end happily In this book leaders in the field review the evidence from several disciplines and many lines of research and present a state of the art assessment They summarize lessons learned and identify the major challenges facing any system of governance for resource management They also highlight the major challenges for the next decade making knowledge development more systematic understanding institutions dynamically considering a broader range of resources such as global and technological commons and taking into account the effects of social and historical context This book will be a valuable and accessible introduction to the field for students and a resource for advanced researchers

Contemporary Psychiatry Fritz Henn, Norman Sartorius, Hanfried Helmchen, Hans Lauter, 2013-11-11 Contemporary Psychiatry is an international textbook developed on the basis of the experience with its first three German editions making it a work with long and distinguished tradition It combines the German tradition of phenomenology and diagnosis going back to Kraepelin with the Anglo American tradition and the DSM IV diagnostic system In doing so Contemporary Psychiatry becomes a unique source among psychiatric texts offering a truly international approach to state of the art knowledge and future perspectives of psychiatry The four internationally renowned editors were able to acquire the leading specialists as contributors No less than 120 authors from 10 different countries ensure an extremely high standard and guarantee the consideration of cross cultural aspects A special feature of Contemporary Psychiatry is that it includes chapters on psychiatric disorders caused by extreme circumstances such as for example migration torture rape violence and natural and man made disasters

Rethinking Sociological Theory Stephen K. Sanderson, 2015-11-17 Stephen K Sanderson's latest book recaptures a scientific theoretical sociology one whose fundamental aim is the formulation of real theories that can be empirically tested Sanderson reviews the major theoretical traditions within contemporary sociology explicating their key principles critically evaluating these principles and their applications and showcasing exemplars He judges each tradition by

asking whether it has generated falsifiable research programs Although principally a work of theoretical critique *Rethinking Sociological Theory* is also a valuable textbook for both undergraduate and graduate courses in sociological theory **The Origin and Evolution of Cultures** Los Angeles Robert Boyd Professor of Anthropology University of California, Davis Peter J. Richerson Professor of Environmental Science and Policy University of California, 2004-12-22 Oxford presents in one convenient and coherently organized volume 20 influential but until now relatively inaccessible articles that form the backbone of Boyd and Richerson's path breaking work on evolution and culture Their interdisciplinary research is based on two notions First that culture is crucial for understanding human behavior unlike other organisms socially transmitted beliefs attitudes and values heavily influence our behavior Secondly culture is part of biology the capacity to acquire and transmit culture is a derived component of human psychology and the contents of culture are deeply intertwined with our biology Culture then is a pool of information stored in the brains of the population that gets transmitted from one brain to another by social learning processes Therefore culture can account for both our outstanding ecological success as well as the maladaptations that characterize much of human behavior The interest in this collection will span anthropology psychology economics philosophy and political science **Handbook on Evolution and Society** Alexandra Maryanski, Richard Machalek, Jonathan H. Turner, 2015-11-17 *Handbook on Evolution and Society* brings together original chapters by prominent scholars who have been instrumental in the revival of evolutionary theorizing and research in the social sciences over the last twenty five years Previously unpublished essays provide up to date critical surveys of recent research and key debates The contributors discuss early challenges posed by sociobiology the rise of evolutionary psychology the more conflicted response of evolutionary sociology to sociobiology and evolutionary psychology Chapters address the application and limitations of Darwinian ideas in the social sciences Prominent authors come from a variety of disciplines in ecology biology primatology psychology sociology and the humanities The most comprehensive resource available this vital collection demonstrates to scholars and students the new ways in which evolutionary approaches ultimately derived from biology are influencing the diverse social sciences and humanities **Evolutionary Aesthetics** Eckart Voland, Karl Grammer, 2013-04-17 *Evolutionary Aesthetics* is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life The hypothesis is both in the area of natural beauty and in sexuality with regard to landscape preferences but also in the area of artificial beauty i.e. in art and design that beauty opens up fitness opportunities while ugliness holds fitness risks In this book this adaptive view of aesthetics is developed theoretically presented on the basis of numerous examples and its consequences for evolutionary anthropology are illuminated
