nearly all programmes in higher education The short answer is that it is thought to be conducive to ethical decision making and ethical behaviour In recent years the received idea that competency in moral reasoning implies moral responsibility on the ground has been the subject of critical attention Today researchers in moral education widely regard moral reasoning as but one among at least four dimensions of moral development alongside moral motivation moral character and moral sensitivity Rest 1986 Reflecting these changes educationalists in the diverse fields of medicine education business and applied ethics can now be found openly questioning how to take practical ethics education beyond the development of skills in moral reasoning Frequently topping the list of suggested improvements is to provide support for empathic capacities of response This work gives this proposal the systematic attention that it deserves Contemporary applied ethics and by extension practical and professional ethics education can be considered an offshoot of the broad philosophical doctrine of moral realism Moral realism takes many forms but in broad outline it is an established meta ethical position that emerged as a seemingly attractive alternative to another family of established philosophical positions that sometimes goes under the name of expressivism
