Empire Forestry And The Origins Of Environmentalism:

Empire Forestry and the Origins of Environmentalism Gregory Allen Barton, 2002-10-17 What we now know of as environmentalism began with the establishment of the first empire forest in 1855 in British India and during the second half of the nineteenth century over ten per cent of the land surface of the earth became protected as a public trust Sprawling forest reservations many of them larger than modern nations became revenue producing forests that protected the whole household of nature and Rudyard Kipling and Theodore Roosevelt were among those who celebrated a new class of government foresters as public heroes Imperial foresters warned of impending catastrophe desertification and global climate change if the reverse process of deforestation continued The empire forestry movement spread through India Africa Australia New Zealand Canada and then the United States to other parts of the globe and Gregory Barton's study looks at the origins of environmentalism in a global perspective

Empire Forestry and the Origins of Conservationism and

Environmentalism Gregory Allen Barton, 1999 *Forests and Ecological History of Assam, 1826-2000* Arupjyoti Saikia, 2011-02-07 This book presents a comprehensive account of the transformation of Assam's forests and ecology from early nineteenth century to the end of the twentieth century It locates present day ecological conflicts in the colonial era when contest over forest land and resource began to take new shape Arupjyoti Saikia delineates how forest resources in Assam were mapped and integrated with merchant capitalism since the early nineteenth century He shows how imperial forestry practices led to changes in traditional resource utilization patterns The book also examines the political economy of conservation practices It explores the question of law and conservation role of institutions and organizations and the changing role of the forests in imperial economy The book argues how the making of forest policy in the postcolonial period was defined by the complexities of the political matrix It discusses plantation silvicultural practices protection and regeneration of forests and livelihood practices The author also analyses public debates surrounding ecology and environmental changes in conservation practices after the 1980 Act

The SAGE Handbook of Historical Geography

Mona Domosh, Michael Heffernan, Charles W. J. Withers, 2020-11-25 Historical geography is an active theoretically informed and vibrant field of scholarly work within modern geography with strong and constantly evolving connections with disciplines across the humanities and social sciences Across two volumes The SAGE Handbook of Historical Geography provides you with an international and cross disciplinary overview of the field presenting chapters that examine the history present condition and future potential of the discipline in relation to recent developments and research *Colonialism, Environment and Tribals in South India, 1792-1947* Velayutham Saravanan, 2016-08-12 This book offers a bird's eye view of the economic and environmental history of the Indian peninsula during colonial era It analyses the nature of colonial land revenue policy commercialisation of forest resources consequences of coffee plantations intrusion into tribal private forests and tribal controlled geographical regions and disintegration of their socio cultural political administrative and judicial systems during

the British Raj It explores the economic history of the region through regional and non market economies and addresses the issues concerning local communities Comprehensive systematic and rich in archival material this book will be useful to scholars and researchers in history especially those concerned with economic and environmental history **The Oxford Handbook of Agricultural History** Jeannie M. Whayne,2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture s potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor British Burma in the New Century, 1895-1918 Stephen L Keck,2015-10-06 British Burma in the New Century draws upon neglected but talented colonial authors to portray Burma between 1895 and 1918 which was the apogee of British governance These writers most of them Burmaphiles wrote against widespread misperceptions about Burma **Handbook of Environmental History in Japan** Fujihara Tatsushi,2025-10-01 Japan a land plagued by volcanoes earthquakes and typhoons yet blessed with a climate suitable for all manner of agriculture and forestry and positioned where ocean currents collide and bring an abundance of the ocean s resources to its people a country which moved quickly from an agrarian pre industrial society to become one of the world s great economic powerhouses in only a few decades spoiling water air and land in the process bringing misery to many of its people a country with expansionist desires colonizing neighboring lands leading to war defeat destruction and for the first time in history nuclear devastation and its aftermath a land and its people which share a remarkable resilience and ability to evaluate and correct their mistakes and renew their trajectory towards a better future The sixteen chapters of the Handbook of Environmental History in Japan Democracy in the Woods Prakash Kashwan,2017 Democracy in the Woods examines the trajectories of forest and land rights in India Tanzania and Mexico to explain how societies negotiate the tensions between environmental protection and social justice It shows that the social consequences of environmental protection depend almost entirely on political intermediation of competing claims to environmental resources Nature's Colony Timothy P Barnard,2018-04-27 Established in 1859 Singapore s Botanic Gardens has served as a park for Singaporeans and visitors a scientific institution and a testing ground for tropical plantation crops Each function has its own story while the Gardens also fuel an underlying narrative of the juncture of administrative authority and the natural world Created to help exploit natural resources for the British Empire the Gardens became contested ground in conflicts involving administrators and scientists that reveal shifting understandings of power science and nature in Singapore and in Britain This continued after independence when the Gardens featured in the e greening of the nation state and became Singapore s first World Heritage Site Positioning the Singapore Botanic Gardens alongside the Royal Botanic Gardens at Kew

and gardens in India Ceylon Mauritius and the West Indies this book tells the story of nature s colony a place where plants were collected classified and cultivated to change our understanding of the region and world

The Third Wave of Historical Scholarship on Nigeria Saheed Aderinto, Paul Osifodunrin, 2013-02-22 This festschrift in honor of Professor Ayodeji Olukoju one of Nigeria s brightest historians brings together scholarship representative of the third wave of historical scholarship on Nigeria Olukoju a pioneering historian of Nigerian maritime history also produced significant revisionist scholarship in the areas of economic urban and infrastructure history The contributions in this volume epitomize the groundbreaking directions of his career they are marked by a search for new explanations and venture into uncharted terrain in Nigerian history Aside from its critical engagement of Olukoju s impressive scholarship this volume presents chapters on such underresearched aspects of Nigerian history as sexuality children and youth crime memory and HIV AIDS It offers historical explanations of a host of development challenges confronting Nigeria Africa s most populous country and resilient reinterpretations of the place of history in nation building The contributors pioneering experts in their various subfields bring their research and teaching experience to the fore and deploy neglected data as they unfold topics that shed light on Nigeria its peoples and cultures They show that history both as a daily practice and as an academic endeavor remains vital as Africans seek solutions to the continent s critical development challenges

Tea Environments and Plantation Culture Arnab Dey, 2018-12-13 Rethinks the tea plantation economy of colonial east India by highlighting its human and non human networks and practices

Nature in the History of Economic Thought Nathaniel Wolloch, 2016-10-04 From antiquity to our own time those interested in political economy have with almost no exceptions regarded the natural physical environment as a resource meant for human use Focusing on the period 1600 1850 and paying particular attention to major figures including Adam Smith T R Malthus David Ricardo and J S Mill this book provides a detailed overview of the intellectual history of the economic consideration of nature from antiquity to modern times It shows how even someone like Mill who was clearly influenced by romantic notions regarding the spiritual need for contact with pristine nature ultimately regarded it as an economic resource Building on existing scholarship this study demonstrates how the rise of modern sensitivity to nature from the late eighteenth century in particular was in fact a dialectical reaction to the growing distance of modern urban civilization from the natural environment As such the book offers an unprecedentedly detailed overview of the intellectual history of economic considerations of nature whilst underlining how the history of this topic has been remarkably consistent

Wielding the Ax Thaddeus Sunseri, 2014-08-26 Forests have been at the fault lines of contact between African peasant communities in the Tanzanian coastal hinterland and outsiders for almost two centuries In recent decades a global call for biodiversity preservation has been the main challenge to Tanzanians and their forests Thaddeus Sunseri uses the lens of forest history to explore some of the most profound transformations in Tanzania from the nineteenth century to the present He explores anticolonial rebellions the world wars the depression the Cold War oil shocks and nationalism through

their intersections with and impacts on Tanzania's coastal forests and woodlands In *Wielding the Ax* forest history becomes a microcosm of the origins, nature and demise of colonial rule in East Africa and of the first fitful decades of independence *Wielding the Ax* is a story of changing constellations of power over forests beginning with African chiefs and forest spirits both known as ax wielders and ending with international conservation experts who wield scientific knowledge as a means to controlling forest access The modern international concern over tropical deforestation cannot be understood without an awareness of the long term history of these forest struggles

Tropical Nature Guillaume Blanc, Mathieu Guérin, Grégory Quenet, 2025-03-01 Across Africa and South East Asia the impulse to protect nature often dovetails with the domination of local people From mass displacement to severe restrictions on land use and daily acts of violence conservation work risks reproducing Eurocentric modes of colonialism and worsening the effects of the climate crisis In this insightful and wide ranging study of the colonial history of conservation *Tropical Nature* seeks to provide a much needed history of the Global South from its own perspective Comparing case studies ranging from Ali Bongo's Gabon to the postcolonial African itinerary of the agronomist Arthur Bunting this volume advances a small scale global history that deciphers the relations binding human societies to the non human world

Explorations into Sustainable Development with Forest and Biodiversity Conservation Dr. Ritu Dhir, 2023-06-02 Forests being the lungs of planet Earth are the most important ecosystems They act as carbon sinks and sustain a huge amount of carbon in them They play an extremely important role for the survival of the living beings on this earth From human beings to the flora and fauna of the earth's ecosystem depend on the forests in some way or the other Forests are the repositories of enormous biodiversity on this planet They are an abode to millions of species of animals including human beings, plants and microorganisms They also give massive ecosystem services to mankind and to all the living beings thriving on this earth They regulate climate, water cycles and carbon sequestering on this planet They even provide a livelihood to human beings all over the world They check global warming on this earth The parameter of sustainable development is that forest and biodiversity is conserved for the coming generations also Forests are the most important repositories of terrestrial biological diversity The diversity of life amongst the living beings and their distinct habitats, the interactions between the various components of the biodiversity makes this planet a habitable place for various life forms Forest conservation is extremely important for intergenerational equity and the principle of sustainable development paves the way The forests especially in the domains of forestry and agriculture provide 40% of the world's economy This is due to the biological diversity in the forest ecosystems 70% of the world's poor populace who live in rural areas is directly dependent on biodiversity for their livelihood A rough estimate of 60 million indigenous folks are somehow reliant on forests for their daily needs The Supreme Court of India in *Rural Litigation and Entitlement Kendra v State of Uttar Pradesh* elucidated the importance of ecosystem services as provided by the forests

Colonialism, Development, and the Environment Pallavi V. Das, 2016-03-14 This study explores the confluence of economy and ecology in British India showing

that Britain initiated economic development strategies in India in order to efficiently extract resources from it. It looks specifically at how state railway construction and forest conservation efforts took on a cyclical almost symbiotic relationship.

Consuming Ivory Alexandra Celia Kelly, 2021-05-18 Examines the complex global impact of the ivory trade. The economic prosperity of two nineteenth and early twentieth century New England towns rested on factories that manufactured piano keys, billiard balls, combs and other items made of ivory imported from East Africa. Yet while towns like Ivoryton and Deep River, Connecticut thrived, the African ivory trade left in its wake massive human exploitation and ecological devastation. At the same time, dynamic East African engagement with capitalism and imperialism took place within these trade histories. Drawing from extensive archival and field research in New England, Great Britain and Tanzania, Alexandra Kelly investigates the complex global legacies of the historical ivory trade. She not only explains the complexities of this trade but also analyzes Anglo-American narratives about Africa, questioning why elephants and ivory feature so centrally in those representations. From elephant conservation efforts to the cultural heritage industries in New England and East Africa, her study reveals the ongoing global repercussions of the ivory craze and will be of interest to anthropologists, archaeologists, historians and conservationists.

Green Development Bill Adams, 2008-07-30 The third edition retains the clear and powerful argument of previous editions but has been updated to reflect advances in ideas and changes in international policy. Greater attention has been given to political ecology, environmental risk and the environmental impacts of development.

Nature's Spectacle John Sheail, 2014-06-17 National parks have always been an emotive and iconic symbol ever since the first parks of the modern era were created in the mid nineteenth century. This book, based on original research, delves deeply into their character and significance and the larger context in which they developed. The book celebrates the deserved attractiveness of the parks as wilderness or spectacle to millions of visitors but also emphasises how there was nothing inevitable, self-sustaining or without cost in their magnificence and accessibility. Those early parks were a powerful unifying force as national playgrounds, especially as motor transport democratized their use. However, they also provoked bitter conflict in their dispossession of local communities and perhaps deliberate segregation of people from scenery and wildlife. That first century of national parks, which concluded with the significant break of the Second World War and the subsequent development of more international approaches to conservation, left an uncertain legacy. It was a fragile foundation from which to build what became an integral part of today's conservation movement.
