Empire of Knowledge Vinay Lal, 2002-10-20 During the media frenzy over the Millennium celebrations there was hardly any mention of the fact that for the majority of the world there was no Millennium at all This linear understanding of time is a specifically Western and Christian concept This is just one of many examples that Vinay Lal uses to demonstrate that nearly every idea which we take for granted in the west is part of a politics of ideas Oppression is usually associated with class struggle and other forms of economic monopoly Lal looks beyond this deconstructing the cultural assumptions that have emerged alongside capitalism to offer a devastating critique of the politics of knowledge at the heart of all powerbroking Other topics examined are the concept of development which has provided a mandate for surreptitious colonisation and the idea of the nation state something we have lived with for no more than two centuries yet is accepted without question Linking this to the emergence of international governance through the United Nations the US and imperial economic bodies such as the IMF and WTO Lal explains how such universalism came to dominate the trajectory of Western thought

Out of Joint Nomi Claire Lazar, 2019-05-28 How constructions of time shape political beliefs about what is possible and what is inevitable To secure power in a crisis leaders must sell deep change as a means to future good But how could we know the future Nomi Claire Lazar draws on stories across a range of cultures and contexts ancient and modern to show how leaders use constructions of time to frame events These frames carry an implicit promise to secure or subvert an expected future shaping belief in what is possible and what is inevitable Ranging imaginatively across history and geography this elegant book probes temporal sources of order and transformation Its analytical wisdom discloses how calendars and representations of time shape political legitimacy dispositions and action Ira Katznelson author of *Fear Itself* *The New Deal* and *The Origins of Our Time* Great political leaders for good or ill seek to

Globalization and Time Luchien Karsten, 2013-05-07 The process of globalization has brought about countless changes in societies communities regions and economies across the globe It has been analyzed from many perspectives as a result and much has been written to muddy the waters of our understanding of this important concept In going back to the real origins of the global economy this book demonstrates that understanding this phenomenon as a battle against time will bring a new clarity to the subject The process of globalization was accompanied by the mastering of social time thereby producing a progressive increase in the speed of business transactions both in manufacturing and in services The context is the development of international trade in western societies and the creation of business institutions to drive forward growth The account takes a long view beginning with early European exploration in the B C period and ending with the establishment of multinational enterprises in the 20th century Using an impressive range of sources this unique book will be valuable reading for students and academics involved with the study of international business economic history business history and politics among other disciplines

State and Society in Communist Czechoslovakia Roman Krakovsky, 2018-05-30 Across central and eastern Europe after World War II the newly established communist regimes promised a drastic social revolution that would transform the world at great pace and pave the way to a socialist future Although many aspects of this utopian project are well known such as fast paced industrialisation collectivisation and urbanisation the regimes even sought to transform the ways in which their citizens interacted with each other and the world around them Using a unique analytical model based on an amalgam of anthropology sociology history and extensive archival research award winning scholar Roman Krakovsky here considers the Czechoslovakian attempt to reinvent the world time and space included in this all encompassing way Ranging from WWII to the fall of the Berlin Wall his innovative analysis variously considers the impact of Stakhanovism the impossible to achieve production targets intended to assert socialism s future potential the attempt to replace Sunday s Christian attributes with socialist ones and the profound changes brought about to the public and private spheres including the culture of informing and the ways this was circumvented Across a wide range of case studies Krakovsky demonstrates both the far reaching extent of the communist vision and the inherent flaws and contradictions that gradually destabilised it This in depth perspective is vital reading for all scholars of twentieth century history and politics

The Great Encounter Jayme A. Sokolow, 2016-07-08 Traditional histories of North and South America often leave the impression that Native American peoples had little impact on the colonies and empires established by Europeans after 1492 This groundbreaking study which
