## **Empirical Studies Of Environmental Policies In Europe:**

**Empirical Studies of Environmental Policies in Europe** John W. Maxwell, Jürgen von Hagen, 2012-12-06 John W. Maxwell and Jürgen von Hagen Kelley School of Business Indiana University ZEI University of Bonn Indiana University and CEPR Prior to the 1970s economic studies of the natural environment were chiefly concerned with the optimal extraction of natural resources such as oil, coal, and timber. This focus reflected the commonly held belief that the natural environment was sufficient to sustain the world's population in relative comfort at least in developed nations and was there for the taking. By the late 1960s, however, the spectacular levels of economic growth that had taken place since the Second World War began to exact a visible toll on the natural environment. This visibility prompted growing concern for the environment among activists, government officials, academics, and the public. This concern has followed a general upward though cyclic trend to the present day. Remarkable events during this trend include the issuing of the Brundtland report and the world environmental summits in Rio and Kyoto. Concern for the natural environment has impacted the discipline of economics, resulting in the birth of the field of environmental economics that has recently eclipsed in popularity its parent field of natural resource economics. *The European Environmental Conscience in EU Politics* Thomas Hoerster, Gabriel Weber, 2021-12-06 Based on empirical studies of European energy and environmental policies, this book suggests that in combination these two policy fields form a consensus in the EU which might also become the basis for a new European ideology, namely European sustainability. It asks why an environmental conscience has grown since the late 1960s in the industrialised world and shows that whilst there is undeniable environmental degradation during this time and that a European environmental conscience has mainly developed through successive steps of European integration in energy policy. In this connection between energy and the environment, we find one driver for European integration and indeed European identity. If sustainability should become a European ideology, it will substantially influence the way future Europeans will live. This book will be of key interest to scholars and students of European Studies, International Relations, Political Science, History, Economics, Sustainability Studies, Environmental and Energy Policies in Europe. **Environmental Policy in the European Union** Andrew Jordan, 2012 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts, it includes in depth case studies of contemporary policy issues such as climate change, genetically modified organisms, and transatlantic relations, as well as an assessment of how well the EU is responding to new challenges such as enlargement, environmental policy integration, and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors. *Integration, Growth, and Cohesion in an Enlarged European Union* John Bradley, George G. Petrakos, Julia Traistaru, 2005-12-28 This book contributes fresh theoretical and empirical evidence on patterns of regional production structures specialization regional disparities convergence and divergence processes and evaluation of cohesion policies in both current and future European Union EU member states in the context of increased integration These subjects are addressed in both individual and cross country analyses using innovative methodologies The book is an essential reading for a large audience including researchers and policy makers working in the fields of economic integration transition economics and regional development The thirteen contributions brought together in this book are the result of recent research undertaken in the framework of a larger project initiated and coordinated by the Center for European Integration Studies ZEI of the University of Bonn on determinants of regional specialization growth and convergence in the context of European integration A number of these papers were presented to a conference on European integration regional convergence location of industrial activity and labour market adjustment initiated by the Center for European Integration Studies of the University of Bonn and organized jointly with the Center for European Studies of the University Alexandru Ioan Cuza of Iasi Romania We gratefully acknowledge the financial support from the European Commission Framework Programme and the Center for European Integration Studies of the University of Bonn

**The Origins of Energy and Environmental Policy in Europe** Thomas C. Hoerber, 2013 This book examines the development of a European environmental conscience through successive steps of European integration in energy policy In the 1960s 70s the world was slowly beginning to realise that environment degradation was not sustainable With phenomena such as acid rain it became clear that pollution did not stop at national boundaries and the European environmental conscience developed in parallel to such growing environmental concerns The oil crisis in 1973 was a turning point in the integration process for both energy policy and environment policy and while further integration towards the European energy policy failed the environmental policies took shape in measures such as energy saving The Commission incorporated both energy and environmental policies into the EU policy canon and built an institutional framework responding to the insufficiency of national policy answers and the developing environmental conscience of the European people This book will be of interest to students and scholars of European Integration European Union politics and history and environmental politics and policy

**Regionalism in Europe** Jürgen von Hagen, Mika Widgren, 2012-12-06 Over the past 40 years the European Union has

been a great force of attraction for new members At the same time it has entered a host of bilateral and multilateral regional agreements with non member countries The result of these developments is a rather unique form of regionalism in Europe consisting of deep integration within the European Union and a network of sometimes overlapping arrangements involving the Union Regionalism in Europe Geometries and Strategies After 2000 brings together a collection of studies of the nature and the implications of this unique regionalism in Europe written by a group of renowned economists from various countries The issues discussed in this book range from theoretical and institutional aspects to empirical studies of the EU s regional policy the regional implications of European Monetary Union and empirical studies of the trade and welfare effects of regional arrangements between the EU and other countries

#### **The European Environmental Conscience in the EU**

Marjorie Tendero, Christoph Weber, 2025-02-17 This book analyses how sustainability affects internal decision making within the European Union and its external relations in working towards achieving its long term goal of a climate neutral Europe by 2050 Applying the term European environmental conscience as the perception of environmental degradation leading to a growing public awareness of the issues a notion of common responsibility and European institutions dealing with these growing concerns the book investigates its emergence as a lever for deeper European integration and in fostering a genuine European identity Examining policy areas such as green finance innovation policies and foreign policy it reveals the impact these concerns have for other policy fields This book is of key interest to scholars and students of environmental economics and politics sustainability governance green finance climate policy energy policy and more broadly to European studies and international relations

#### **Environmental Policy in Europe**

Andrew J. Jordan, Duncan Liefferink, 2004-08-02 The continuing development of the European Union EU is transforming policy and politics in its member countries and possibly in an even larger number of potential members This book offers a detailed investigation of the Europeanization of national environmental policy in ten western European countries since 1970 By blending state of the art theories with fresh empirical material on the many manifestations of Europeanization it sheds new light on the dynamics that are decisively reshaping national environmental policy It also offers an original assessment of how far Europeanization has produced greater policy convergence in western Europe Throughout the approach taken is genuinely comparative drawing on the insights provided by leading country specialists

#### **Environmental Leaders and Laggards in Europe**

Tanja A. Börzel, 2017-05-15 No other European laws are so frequently violated as environmental directives This informative and illuminating volume explains why member states have repeatedly failed to comply with European Environmental Law It challenges the assumption that non compliance is merely a southern problem By critically comparing and analyzing Spain and Germany the volume demonstrates that both northern leaders and southern laggards face compliance problems if a European policy is not compatible with domestic regulatory structures The North South divide is therefore much more complex than previously thought Examining each country s capabilities of shaping European policies according to its environmental concerns and economic interests the

book debates the possible outcomes if the European Union does not come to terms with the leader laggards dynamics in environmental policy making It will be a prime resource for anyone concerned with environmental policy making and law particularly within the EU as well as those interested in environmental and political geography **Fiscal Federalism in Unitary States** Per Molander,2012-12-06 Decentralism of political power to regions and local government occurs worldwide in response to demands from the periphery Such devolution of power raises a number of problems political financial and legal By gathering together important papers from a series of workshops sponsored by the SNS Constitutional Project and the Center for European Integration Studies this volume presents a number of these problems from a truly interdisciplinary perspective The authors believe that fiscal federalism while originating in formally federal states is relevant also to the analysis of state local relationships in unitary states with some degree of regional or local authority Among the topics they cover are the division of responsibilities and powers of taxation bailouts systems of equalization and state grants as well as problems related to democracy and citizens rights While the book s primary focus is Nordic its international perspective is enhanced by contributions from Europe Canada and the U S Research Methods in European Union Studies K. Lynggaard,I. Manners,K. Löfgren,2016-01-08 This collection sets a new agenda for conducting research on the EU and learns from past mistakes In doing so it provides a state of the art examination of social science research designs in EU studies while providing innovative guidelines for the advancement of more inclusive and empirically sensitive research designs in EU studies *Environmental and Health Regulation in the United States and the European Union* M. Smith,2012-03-12 During the first decade of the twenty first century the United States increasingly has relaxed its regulatory posture in the face of critical challenges to public health and the environment This is true for regulation of recycling of end of life products including autos and electronic components potentially hazardous chemicals and health claims on food labels Coincidentally the European Union has gravitated toward more restrictive regulation in these very same areas How might we explain these diverging regulatory trajectories of the world s two largest market economies in an era of rising public awareness of dangers to the public and the planet The explanation derives not from cultural differences in willingness to tolerate risk but rather from distinctive regulatory tradeoffs between environment and competitiveness in the United States and environment competitiveness and integration in the EU **Cambridge Yearbook of European Legal Studies, Vol 16 2013-2014** Albertina Albors-Llorens,Kenneth Armstrong,Markus Gehring,2015-01-22 The Cambridge Yearbook of European Legal Studies provides a forum for the scrutiny of significant issues in EU Law the law of the European Convention on Human Rights and Comparative Law with a European dimension and particularly those issues which have come to the fore during the year preceding publication The contributions appearing in the collection are commissioned by the Centre for European Legal Studies CELS Cambridge a research centre in the Law Faculty of the University of Cambridge specialising in European legal issues The papers presented are at the cutting edge of the fields which they address and reflect the views of recognised

experts drawn from the University world legal practice and the institutions of both the EU and its Member States Inclusion of the comparative dimension brings a fresh perspective to the study of European law and highlights the effects of globalisation of the law more generally and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration

**Environmental Governance in Europe** Rüdiger K.W. Wurzel, Anthony R. Zito, A. J. Jordan, 2013-01-01 This path breaking book written by three well known experts makes an extremely valuable contribution to the study of new environmental policy instruments as well as to much wider theoretical debates about governance policy innovation learning and transfer Drawing on an unrivalled comparative empirical study of five different jurisdictions it manages to make many new points about issues that many of us thought had already been settled Martin J. Nikke Free University of Berlin and former deputy chair German Advisory Council on the Environment Germany Much more than a study of environmental policy instruments this book ranges widely and authoritatively over the government to governance debate theories of policy change regulation policy transfer and policy learning Its lessons and conclusions are relevant and timely well beyond the European context of its case studies and it will be essential reading for public policy scholars everywhere for some time to come Jeremy Rayner University of Saskatchewan Canada This book represents a very rare achievement in that it combines detailed and up to the minute empirical analysis of environmental policy over the past four decades with a sophisticated discussion and critique of current theoretical issues in comparative and policy studies generally It unfolds with a keen eye towards understanding the temporal dimensions of policy dynamics both in the specific policy field examined but also in terms of testing key analytical concepts Taken as a whole it provides the most detailed empirical assessment to date of the general government to governance hypothesis with significant implications for policy and governance studies in general Michael Howlett Simon Fraser University Canada and National University of Singapore This book fills an important gap in the environmental governance literature addressing governance at a lower level of abstraction than other texts and examining how it plays out in relation to specific modes and instruments of governing It also contributes towards governance theory building efforts through the development of an empirically relevant analytical framework In so doing it provides a firm underpinning for assessing whether to what extent and in what ways there has been a transition from government towards governance in environmental policy Neil Gunningham Australian National University Theoretically sophisticated and empirically rich this book provides an overview of the introduction development and use of new policy instruments and new modes of environmental governance in the European context taking into account both national and European Union experiences This is a welcome addition to the field Miranda Schreurs Environmental Policy Research Centre and Free University of Berlin Germany European governance has witnessed dramatic changes in recent decades By assessing the use of new environmental policy instruments in European Union countries

including the United Kingdom Germany the Netherlands and Austria this timely book analyses whether traditional forms of top down government have given way to less hierarchical governance instruments which rely strongly on societal self steering and or market forces The authors provide important new theoretical insights as well as fresh empirical detail on why and in what form these instruments are being adopted within and across different levels of governance along with analysis of the often overlooked interactions between the instrument types Providing important new theoretical insights into the governance debate by combining institutionalist and policy learning transfer approaches this book will be invaluable for both undergraduate and postgraduate students The analytical insights as well as a thorough empirical assessment of the use of environmental policy instruments in practice will prove essential for environmental policy specialists practitioners The European Union in International Climate Change Politics Rudiger K.W. Wurzel,James Connelly,Duncan Liefferink,2016-11-25

In recent years climate change has emerged as an issue of central political importance while the EU has become a major player in international climate change politics How can a leaderless Europe offer leadership in international climate change politics even in the wake of the UK s Brexit decision This book which has been written by leading experts offers a critical analysis of the EU leadership role in international climate change politics It focuses on the main EU institutions core EU member states and central societal actors businesses and environmental NGOs It also contains an external perspective of the EU s climate change leadership role with chapters on China India and the USA as well as Norway Four core themes addressed in the book are leadership multilevel and polycentric governance policy instruments and the green and low carbon economy Fundamentally it asks why we have EU institutional actors why certain member states and particular societal actors tried to take on a leadership role in climate change politics and how if at all have they managed to achieve this This text will be of key interest to scholars students and practitioners in EU studies and politics international relations comparative politics and environmental politics The Reality of Precaution Jonathan B. Wiener,Michael D. Rogers,James K. Hammitt,Peter H.

Sand,2013-05-13 The Precautionary Principle has sparked the central controversy over European and U S risk regulation The Reality of Precaution is the most comprehensive study to go beyond precaution as an abstract principle and test its reality in practice This groundbreaking resource combines detailed case studies of a wide array of risks to health safety environment and security a broad quantitative analysis and cross cutting chapters on politics law and perceptions The authors rebut the rhetoric of conflicting European and American approaches to risk and show that the reality has been the selective application of precaution to particular risks on both sides of the Atlantic as well as a constructive exchange of policy ideas toward better regulation The book offers a new view of precaution regulatory reform comparative analysis and transatlantic relations

*Europeanization* P. Graziano,M. Vink,2006-11-28 This cutting edge handbook written by foremost authoritative scholars presents the main theoretical and empirical issues involved in current Europeanization research It evaluates the achievements and shortcomings of the growing literature As an advanced reference book it also sets the parameters for
