demonstrating specialized uses of the techniques such as in work settings and rehabilitation medicine Meaning in Positive and Existential Psychology Alexander Batthyany, Pninit Russo-Netzer, 2014-04-26 This book is a first attempt to combine insights from the two perspectives with regard to the question of meaning by examining a collection of theoretical and empirical works This volume therefore is destined to become an important addition to psychological literature both from the viewpoint of the history of ideas again this would be one of the first times that positive and existentialist psychologies meet and from the viewpoint of theoretical and empirical research into the meaning concept in psychology **Positive Existential Psychology for the Prevention of Extremism** Alain Ruffion, 2025-07-30 Many scientific works and studies have focused on the phenomena of extremism and violent radicalization However very few resources exist to effectively address this issue from an educational perspective The diagnoses are often fragmented and give prominence to geopolitical and socio political factors Yet an interdisciplinary analysis of the processes of extremism and radicalization indicates the central role of biographical psychological or even psychopathological variables and traumas How can we draw deep lessons from this to innovate in education and truly give ourselves the means to prevent these processes of extremism and radicalization This book deliberately choosing positive and existential psychology as a resource proposes to answer this question with the support of scientific and creative resources that finally address and respond to the root causes These resources are adapted to socio educational professions and understandable by parents They finally restore courage ideas and motivating and positive approaches for all those who want to take up this increasingly widespread and threatening challenge within our societies At the same time these resources make it possible to work on the transmission of values strengths and to contribute to the mental health and fulfilment of our youth a capital theme if there ever was one *Finding Meaning in Life, at Midlife and Beyond* David Guttman, 2008-09-30 Having been mentored by Viktor E Frankl the founder of logotherapy Emeritus Professor David Guttman authored this book so general readers may understand this approach to finding meaning in life at the point when most of us begin deeply wondering over that question at midlife and beyond Especially in this day and age of multiple demands on our time and seemingly non stop obligations we too often find that it is only when the dust settles after a work day or work week or even after retirement when we begin to wonder What is the meaning of life The purpose This book is a new millennium venture into those questions and their answers using logotherapy written by a sage understudy who recalls Frankl with his logotherapy as the epitome of his theory even at 80 years old wise and witty exuding an energy enthusiasm and youthful spirit that belied his years by decades Aging does not diminish our power our energy and our quest for life but reshapes it with new understandings goals and needs But says Guttman we live in a technical and machine based world now in which there is a danger of losing our souls Here readers find a new creative perspective on aging and a fresh spiritual outlook This book will be of interest not only to general readers especially those at midlife and beyond but also to their families friends and students or professionals in the helping professions This unique work provides

knowledge to find meaning in life derived from the fields of philosophy psychology religion and gerontology with case illustrations and vignettes to give readers both intellectual pleasure and practical guidance Existential and Spiritual Issues in Death Attitudes Adrian Tomer, Grafton Eliason, Paul T. P. Wong, 2008 In this new volume death is treated both as a threat to meaning and as an opportunity to create meaning

COVID-19 and Existential Positive Psychology (PP2.0): The New Science of Self-Transcendence Paul T. P. Wong, Claude-Hélène Mayer, Gökmen Arslan, In the era of COVID 19 many people have suffered high levels of stress and mental health problems To cope with the widespread of suffering physical psychological social and economical the positive psychology of personal happiness is no longer the sole approach to examine personal wellbeing Other approaches such as Viktor Frankl's theory of self transcendence provide a promising framework for research and intervention on how to achieve resilience wellbeing and happiness through overcoming suffering and self transcendence The existential positive psychology of suffering complements the positive psychology of happiness which is championed by Martin Seligman as two equal halves of the circle of wellbeing and optimal mental health This Research Topic aims to examine the different approaches to Positive Psychology and their influence on individual wellbeing during the COVID 19 era One of the exciting development in the positive psychology of wellbeing is the mounting research on the adaptive benefits of negative emotions such as shame guilt and anger as well as the dialectical process of balancing negative and positive emotions As an example based on all the empirical research and Frankl's self transcendence model Wong has developed the existential positive psychology of suffering PP2.0 as the foundation for flourishing Here are a few main tenets of PP2.0 1 Life is suffering and a constant struggle throughout every stage of development 2 The search for self transcendence is a primary motive guided by the meaning mindset and mindful mindset 3 Wellbeing cannot be sustainable without overcoming and transforming suffering In this Research Topic we welcome diverse approaches discussing the following points The dialectic process of overcoming the

challenges of every stage of development as necessary for personal growth and self transcendence The role of self transcendence in resilience virtue meaning and happiness The upside of negative emotions The new science of resilience based on cultivating the resilient mindset and character How to make the best use of suffering to achieve our potentials mental health
