Empiricism And The Philosophy Of Mind

John McDowell

Empiricism And The Philosophy Of Mind:

Empiricism and the Philosophy of Mind Wilfrid Sellars, Richard Rorty, Robert Brandom, 1997-07 The most important work by one of America's greatest twentieth century philosophers Empiricism and the Philosophy of Mind is both the epitome of Wilfrid Sellars' entire philosophical system and a key document in the history of philosophy First published in essay form in 1956 it helped bring about a sea change in analytic philosophy It broke the link which had bound Russell and Ayer to Locke and Hume the doctrine of knowledge by acquaintance Sellars' attack on the Myth of the Given in Empiricism and the Philosophy of Mind was a decisive move in turning analytic philosophy away from the foundationalist motives of the logical empiricists and raised doubts about the very idea of epistemology With an introduction by Richard Rorty to situate the work within the history of recent philosophy and with a study guide by Robert Brandom this publication of Empiricism and the Philosophy of Mind makes a difficult but indisputably significant figure in the development of analytic philosophy clear and comprehensible to anyone who would understand that philosophy or its history **Knowledge, Mind, and the Given**

Willem A. DeVries, Timm Triplett, Wilfrid Sellars, 2000-01-01 This book serves three purposes and it serves them very well First it patiently accurately and comprehensively supplies the necessary information about the historical and contemporaneous ideas, views, problems and theories which constitute the conceptual setting for Sellars' theses and argumentation Second it provides a careful and lucid section by section interpretative explanation of Sellars' own principal views and claims and crucially undertakes to support them And third it offers its readers the beginnings of an engaged critical discussion of Sellars' critique of givenness and epistemological foundationalism What is particularly impressive about this work is its marvelous clarity a highly polished accessible text Jay F. Rosenberg, Taylor Graduate Professor of Philosophy, University of North Carolina, Chapel Hill **Empiricism and the Philosophy of Mind** Wilfrid Sellars, 1956

The Minds of the Moderns Janice Thomas, 2009-01-01

Knowledge, Mind, and Theory Shawn Akbar, 2003

Intentionality and the Myths of the Given Carl B. Sachs, 2015-10-06 Intentionality is one of the central problems of modern philosophy How can a thought, action or belief be about something Sachs draws on the work of Wilfrid Sellars, C. I. Lewis and Maurice Merleau-Ponty to build a new theory of intentionality that solves many of the problems faced by traditional conceptions *Phenomenology and The Ghost in The Machine: An Investigation into Wilfrid Sellars, Jean-Paul Sartre, Gilbert Ryle and The Concept of Mind* Tim Hoswell, 2016-12-12 Take a journey through Jean-Paul Sartre's trans-phenomena of consciousness into Gilbert Ryle's Linguistic Behaviourism and on to the outer reaches of Wilfrid Sellars' Rylean ancestors and their Messianic Behaviourism Jones *Phenomenology and the Ghost in the Machine* begins by investigating a historical connection between Jean-Paul Sartre and Gilbert Ryle The book exploits this connection to explore an attractive relationship between ordinary language and consciousness thus providing plenty of chances for readers to learn Sartre's phenomenology and Ryle's linguistic analysis of the mind along the way This work is a one-way ticket to the outer reaches of

the mind arguing that language is insufficient to ground a theory of mind because it fails to capture sublinguistic layers of thought Only a first person science exploring the nature of mind and heralded by a return to a Pre Fregeian Psychologism can penetrate these mysteries of thought **Mind, Language, and Metaphilosophy** Richard Rorty, 2014-02-13 The definitive collection of the early work of one of the most influential and original philosophers of our time Empiricism, Perceptual Knowledge, Normativity, and Realism Willem A. DeVries, 2009-11-26 These essays were written to celebrate the 50th anniversary of the lectures which became Wilfrid Sellars's Empiricism and the Philosophy of Mind one of the crowning achievements of 20th century analytic philosophy Both appreciative and critical they engage with his treatment of crucial issues in metaphysics and epistemology **Wilfrid Sellars** Willem A. DeVries, 2014-12-18 Wilfrid Sellars 1912-89 has been called the most profound and systematic epistemological thinker of the twentieth century Robert Brandom He was in many respects ahead of his time and many of his innovations have become widely acknowledged for example his attack on the myth of the given his functionalist treatment of intentional states his proposal that psychological concepts are like theoretical concepts and his suggestion that attributions of knowledge locate the knower in the logical space of reasons However while many philosophers have begun to acknowledge Sellars's inspiration in their work their interpretation of his thought has not always been the most accurate His writings are difficult Individually his essays are complex and sometimes rely on doctrines and arguments he put forward elsewhere Each of his articles is deepened and strengthened by seeing it in its systematic context but he never wrote a unified exposition of his system which therefore has to be pieced together from numerous disparate sources Willem deVries addresses these difficulties specifically and provides a careful reading and remarkable overview of Sellars's systematic philosophy that will become the standard point of reference for all philosophers seeking to understand Sellars's hugely significant body of work John McDowell Jakob Lindgaard, 2008-04-07 John McDowell Experience Norm and Nature combines original essays by leading contemporary philosophers with point by point responses by McDowell himself to explore the central themes of one of the most innovative philosophers of our day Provides original and critical essays examining McDowell's reading and appropriation of Sellars Kant and Hegel in his own philosophy Explores McDowell's notions of perceptual experience and his proposed rethinking of our conception of nature in light of the challenges that reason and normativity introduce Includes an original essay by McDowell that includes significant developments of his conception of perceptual experience Offers thorough and penetrating responses by McDowell to his critics *Pragmatism in Transition* Peter Olen, Carl Sachs, 2017-10-13 This collection is an attempt by a diverse range of authors to reignite interest in C I Lewis's work within the pragmatist and analytic traditions Although pragmatism has enjoyed a renewed popularity in the past thirty years some influential pragmatists have been overlooked C I Lewis is arguably the most important of overlooked pragmatists and was highly influential within his own time period The volume assembles a wide range of perspectives on the strengths and weaknesses of Lewis's contributions to metaphysics

epistemology semantics philosophy of science and ethics Wilfrid Sellars Willem deVries,2005-11-28 Wilfrid Sellars 1912-1989 has been called the most profound and systematic epistemological thinker of the twentieth century Many of his ideas have become widely acknowledged including his attack on the myth of the given his functionalist treatment of intentional states his proposal that psychological concepts are like theoretical concepts and his suggestion that attributions of knowledge locate the knower in the logical space of reasons Notoriously difficult to understand Sellars essays are not only complex but were never situated within a unified exposition of his thought Willem deVries addresses these difficulties and provides a careful reading and remarkable overview of Sellars systematic philosophy This clear comprehensive and authoritative work will become the standard point of reference for all philosophers seeking to understand Sellars s hugely significant body of work **Sellars and Davidson in Dialogue** Willem A. deVries,Marc A. Joseph,2025-06-27 Wilfrid Sellars and Donald Davidson were two of the most influential American philosophers of the 20th century This volume explores the deep similarities and differences between these two philosophers Both Sellars and Davidson worked through the mid to late 20th century re evaluation of the empiricist inheritance that shaped what became analytic philosophy and both are critical of key elements of that picture In the broadest terms both philosophers challenge the solipsistic mentalistic conception of knowledge and meaning that informs the tradition and set in its place systems of interrelated views that prioritize a holistic and social conception of mind action and language At the same time there are several differences in method and philosophical semantics that divide Sellars and Davidson The chapters in this volume address the deep relations of Sellars and Davidson s views on mind language and knowledge They demonstrate how despite coming from different assumptions and methodologies Sellars and Davidson converge on a view that essentially erases the philosophy of language as a separate discipline and embeds it in the philosophy of action Sellars and Davidson in Dialogue will appeal to scholars and advanced students interested in the history of analytic philosophy epistemology philosophy of language and philosophy of mind Logical Thinking in the Pyramidal Schema of Concepts: The Logical and Mathematical Elements Lutz Geldsetzer,Richard L. Schwartz,2012-11-30 This new volume on logic follows a recognizable format that deals in turn with the topics of mathematical logic moving from concepts via definitions and inferences to theories and axioms However this fresh work offers a key innovation in its pyramidal graph system for the logical formalization of all these items The author has developed this new methodology on the basis of original research traditional logical instruments such as Porphyrian trees and modern concepts of classification in which pyramids are the central organizing concept The pyramidal schema enables both the content of concepts and the relations between the concept positions in the pyramid to be read off from the graph Logical connectors are analyzed in terms of the direction in which they connect within the pyramid Additionally the author shows that logical connectors are of fundamentally different types only one sort generates propositions with truth values while the other yields conceptual expressions or complex concepts On this basis strong arguments are developed against

adopting the non discriminating connector definitions implicit in Wittgensteinian truth value tables Special consideration is given to mathematical connectors so as to illuminate the formation of concepts in the natural sciences To show what the pyramidal method can contribute to science a pyramid of the number concepts prevalent in mathematics is constructed The book also counters the logical dogma of false contradictory propositions and sheds new light on the logical characteristics of probable propositions as well as on syllogistic and other inferences

An Essay Concerning Human Understanding (Vol. 1) John Locke,2024-08-21 An Essay Concerning Human Understanding by John Locke is a foundational text in the philosophy of empiricism exploring the nature of human knowledge and the mind Published in 1689 this Enlightenment masterpiece challenges the notion of innate ideas proposing instead that the mind begins as a tabula rasa or blank slate shaped by experience Locke meticulously dissects the formation of ideas distinguishing between simple ideas derived from sensory experience and complex ideas constructed by the mind He examines primary and secondary qualities emphasizing that our perception of the world is mediated by these qualities Locke s exploration of personal identity introduces a psychological criterion laying the groundwork for modern discussions on self and consciousness The essay also delves into language knowledge and belief offering insights into intuition mathematics and moral philosophy An Essay Concerning Human Understanding remains a pivotal work in the categories of Philosophy Epistemology and Enlightenment Studies influencing thinkers like David Hume and George Berkeley Locke s clear and methodical approach invites readers to reconsider the origins and limits of human understanding

The Life of the Mind Gregory McCulloch,2005-07-08 This study presents an original and striking conception of the mind and its place in nature The product of over twenty years thinking on these issues McCulloch s book is a bold and significant contribution to philosophy

Having the World in View John McDowell,2013-09-02 This is a decisive volume that seeks to heal the divisions in contemporary philosophy

Philosophy, Mind, and Cognitive Inquiry David J. Cole,J.H. Fetzer,T.L. Rankin,2012-12-06 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology concerning the mental capabilities of other species to ideas related to artificial intelligence and computer science While primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and methodological studies will also appear from time to time No problem within the field of cognitive inquiry is more difficult than that of developing an adequate conception of the nature of mind and of its mode of operation Our purpose in compiling the present volume has been to contribute to the pursuit of this objective by bringing together a representative cross section of the principal approaches and the primary players who are engaged in contemporary debate on these crucial issues The book begins with a comprehensive introduction composed by David Cole the

senior editor of this work which provides a background for understanding the major problems and alternative solutions and ends with a selected bibliography intended to promote further research If our efforts assist others in dealing with these issues they will have been worthwhile J H F David J Cole et al eds Philosophy Mind and Cognitive Inquiry ix Unity of Knowledge (in Transdisciplinary Research for Sustainability) - Volume I Gertrude Hirsch Hardon, 2008-12-31 Unity of Knowledge in Transdisciplinary Research for Sustainable Development theme is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Today there is a social need for a comprehensive unity of knowledge that would provide orientation and ensure action in the context of the complex problems of modern civilization Based on an intellectual need for unity of knowledge different concepts of unity of knowledge have emerged in the course of the history of ideas The intellectual need for unity can be directed at the world science action or the individual It can involve the quest for the unity of the world based on a principle that is immanent in it the unity of science as a theoretical methodical or epistemological unity the unity of action as a correlation of scientific pragmatic and moral knowledge or finally unity as the educational task of the individual The concepts associated with unity of knowledge can go in two directions The first assumes that there is a unity existing in the world that can be perceived by man It is thought of as an order of being i e an ontological unity of the plurality of phenomena that consist in their common nature The other direction is based on the assumption that unity is a construction of a subject based on its cognitive principles and structures Thus it is not something that can be discovered as an existing objective order and is instead subjective These two volumes present some aspects of Unity of Knowledge in Transdisciplinary Research for Sustainable Development in three parts The purpose of the first part is to trace back the core ideas in transdisciplinary thinking in the history of western philosophy and science to locate socially the concerns of transdisciplinary research and to give an account of the development of transdisciplinary research The second group of chapters deals with methodological and management problems related to transdisciplinary research with regard to problem identification and structuring of research questions with knowledge integration in problem investigation as well as with evaluation An outline of the institutional measures and transformations to enable and support transdisciplinary research is given in the third part Institutional strategies build on organizational arrangements and links across academic institutions in education and research on networks between science and society for joint knowledge production in temporally limited settings of research programs or projects but they also set up new institutions such as centers for advanced studies national offices agencies and networks These two volumes are aimed at a wide spectrum of audiences University and College Students Educators Research Personnel and all those concerned with sustainable development
