Employability In A High Performance Economy:

Employability in a High Performance Economy Barry G. Sheckley, Lois Lamdin, Morris T. Keeton, 1993 Long term health 312 922 5909 Paperback 24 95 each Hardcover 34 95 each 2 50 shipping handling first book 0 75 book thereafter Illinois residents add 8 percent sales tax Call for discount information *Handbook of Online Learning* Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute's focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there's a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e.g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute's 26 years of teaching in nontraditional distributed learning environments Portfolio Development and the Assessment of Prior Learning Elana Michelson, Alan Mandell, 2023-08-11 For over thirty years portfolios have been used to help adult learners gain recognition for their prior learning and take greater control of their educational experiences The portfolio has become a distinctive means of assessing

such learning serving as a meaningful alternative to conventional papers and standardized testing Portfolio Development and the Assessment of Prior Learning Perspectives Models and Practices provides a primer of flexible approaches to shaping and conducting portfolio development courses It offers practitioners in the field an extensive range of model assignments readings and classroom activities each organized around a specific theme Academic Orientation The Meaning of Education Personal Exploration Learning from the Outsider Within The World of Work and Careers and Dimensions of Expertise Twelve case studies by practitioners in the field then show how academics in the US and around the English speaking world have adapted the portfolio to changing circumstances in order to deliver academically rich educational services for adults These case studies highlight portfolio development in the context of web based instruction changing institutional imperatives service to historically disenfranchised groups partnerships with industry and cross institutional cooperation In addition to serving as a valuable hands on resource for practitioners Portfolio Development and the Assessment of Prior Learning locates portfolios and assessment in a broad social and intellectual context Thus the authors also offer an historical overview of the usefulness of portfolios in the assessment of prior learning and then consider their use in the future given current trends in higher education for adults The book explores the implications of a changing educational landscape in which new student populations budgetary pressures and understandings of knowledge both enrich and challenge student centered approaches such as portfolios The approaches and case studies are not only valuable to adult educators but equally to faculty in higher education concerned with the development of competency and outcomes based assessment

Assessment in Higher Education Samuel J. Messick, 2013-12-16 Assessment in Higher Education brings together in one place most of the major issues confronting higher education in the 1990s These include enhancing student access development and success in higher education transforming admissions testing to meet expanding educational needs resolving the politics of accountability by assessing quality outcomes of higher education assuring fair assessment responsive to human diversity and facing the technological future of higher education An integrative thread that weaves through all of these issues is the concept of equity especially as it bears on social justice in education and on fairness in assessment Another integrative thread is the role of computer and multimedia technology not only in improving the efficiency and power of all the functions of higher education assessment but also in revolutionizing the delivery of higher education itself
