Blacks and the Quest for Economic Equality James W. Button, Barbara A. Rienzo, Sheila L. Croucher, 2015-08-26 The civil rights movement of the 1960s improved the political and legal status of African Americans but the quest for equality in employment and economic well being has lagged behind Blacks are more than twice as likely as whites to be employed in lower paying service jobs or to be unemployed are three times as likely to live in poverty and have a median household income barely half of that for white households What accounts for these disparities and what possibilities are there for overcoming obstacles to black economic progress This book seeks answers to these questions through a combined

quantitative and qualitative study of six municipalities in Florida Factors impeding the quest for equality include employer discrimination inadequate education increasing competition for jobs from white females and Latinos and a lack of transportation job training affordable childcare and other sources of support which makes it difficult for blacks to compete effectively Among factors aiding in the quest is the impact of black political power in enhancing opportunities for African Americans in municipal employment The authors conclude by proposing a variety of ameliorative measures strict enforcement of antidiscrimination laws public policies to provide disadvantaged people with a good education adequate shelter and food and decent jobs and self help efforts by blacks to counter self destructive attitudes and activities

Race and Schooling in the South, 1880-1950 Robert A. Margo, 2007-12-01 The interrelation among race schooling and labor market opportunities of American blacks can help us make sense of the relatively poor economic status of blacks in contemporary society The role of these factors in slavery and the economic consequences for blacks has received much attention but the post slave experience of blacks in the American economy has been less studied To deepen our understanding of that experience Robert A Margo mines a wealth of newly available census data and school district records By analyzing evidence concerning occupational discrimination educational expenditures taxation and teachers salaries he clarifies the costs for blacks of post slave segregation A concise lucid account of the bases of racial inequality in the South between Reconstruction and the Civil Rights era Deserves the careful attention of anyone concerned with historical and contemporary race stratification Kathryn M Neckerman Contemporary Sociology Margo has produced an excellent study which can serve as a model for aspiring cliometricians To describe it as required reading would fail to indicate just how important indeed indispensable the book will be to scholars interested in racial economic differences past or present Robert Higgs Journal of Economic Literature Margo shows that history is important in understanding present domestic problems his study has significant implications for understanding post 1950s black economic development Joe M Richardson Journal of American History
