Policies for Increasing Economic Growth and Employment in the Short Term Douglas W. Elmendorf, 2010-11 The U S has just suffered through the most severe recession since the 1930s The good news is that the economy appears to be starting to recover In all likelihood the recovery will be dampened by a number of factors including the continuing fragility of some financial markets and institutions declining support from fiscal and monetary policy and limited increases in households spending because of slow income growth lost wealth and a large number of vacant houses Real GDP will increase by 2.4 percent in 2011 Real GDP will accelerate after 2011 For 2012 through 2014 real GDP will increase by an average of 4.4 percent per year which would close the gap between actual output and potential output by the end of 2014 Figures

Power, Norms, and Inflation Michael R. Smith, 2017-09-29 Explanations for inflation had for a long time been ceded to the purview of economists The acceleration in rates of inflation within advanced economies during the 1960s and 1970s however prompted sociologists and political scientists to attempt their own accounts for this phenomenon There are two major competing explanations of the postwar inflation One most commonly held by economists is that inflation has been produced by governments through a combination of policy errors and cynical manipulation of policy for electoral purposes The other often advanced by sociologists and political scientists as an alternative is that inflation has been an outcome of class conflict In his study that ranges widely over the literature in the relevant disciplines Smith examines the strengths and weaknesses of each account with particular attention to the evidence presented in support of class conflict explanations He concludes that on balance the policy error cynical manipulation explanation is better supported than its class conflict rival The clarity with which Smith presents these rival accounts and the critical rigor of his scrutiny make this a work of interest to advanced students in macroeconomic theory and to policy makers

Employment and Inclusive Development Rizwanul Islam, Iyanatul Islam, 2015-02-11 Issues relating to employment and

labour have once again come to the fore of global policy debates in the wake of the widespread unemployment that has accompanied the current financial crisis In the developing world there is a growing realization that productive employment promotion and social protection have to be at the core of inclusive growth and development This book supports the view that employment is a cross cutting issue shaped by macroeconomic and microeconomic policy interventions and provides a capacious framework to analyse the complexity of this global debate It covers a wide range of issues that have received insufficient attention in the discourse of development and labour economics These include the impact of macroeconomic policies on employment labour rights the development of human capabilities and employability youth employment the benefits and costs of labour market flexibility and the importance of social protection for all This important book aims at filling this gap by revisiting old debates and reconnecting them to the contemporary context combining analyses with relevant empirical evidence It will appeal to a diverse readership of academic institutions and think tanks international organizations bilateral donors working on development issues and policy makers in developing countries
